Why ANDREWS is the Ideal Tonic Laxative

Andrews is a pleasant tasting, effervescent aperient with tonic properties, and is a valuable aid to Inner Cleanliness.

Andrews is beneficial in most digestive disorders, feverish conditions, the ailments of children, and in pregnancy and lactation. Its use may be discontinued without reaction when the need for it ceases.

Andrews justifies the description of "Ideal Tonic Laxative" because:—

FIRST . . Patients like taking Andrews, because its brisk effervescence is immediately refreshing and stimulating, it sweetens the mouth and helps to clean the tongue.

NEXT . . Andrews allays gastric discomfort, heartburn and nausea by diminishing the stomach's acidity and relieving flatulence.

THEN . . Andrews increases bile flow, relieves hepatic congestion, and improves digestion. It is partly absorbed from the intestine as alkali, and therefore helps to correct acidity in the blood and to stimulate kidney function.

FINALLY . . Acting by osmosis, Andrews clears the bowels gently and entirely without irritation.

Approx. active constituents:

Acid. Tart.	32% to 36%
Acid. Cit.	3% to 6%
Sod. Bicarb.	40% to 44%
Mag. Sulph.	17% to 21%
Other constituents	up to 1%

"It sees sex as a whole; as a purely natural phenomenon with definite physical facts & laws, & as a force involving some of the highest spiritual faculties of man. It makes the problem clear, suggests definite methods for solving it, & should help effectively others besides parents & teachers to grasp a nettle, which, unless grasped firmly, will continue to sting—sometimes to death"—*Sir Richard Livingstone*
