Why **ANDREWS** is the Ideal Tonic Laxative

Andrews is a pleasant tasting, effervescent aperient with tonic properties, and is a valuable aid to Inner Cleanliness.

Andrews is beneficial in most digestive disorders, feverish conditions, the ailments of children, and in pregnancy and lactation. Its use may be discontinued without reaction when the need for it ceases.

Andrews justifies the description of "Ideal Tonic Laxative" because :-

FIRST . . Patients like taking Andrews, because its brisk effervescence is immediately refreshing and stimulating, it sweetens the mouth and helps to clean the tongue.

NEXT . . Andrews allays gastric discomfort, heartburn and nausea by diminishing the stomach's acidity and relieving flatulence.

THEN . . Andrews increases bile flow, relieves hepatic congestion, and improves digestion. It is partly absorbed from the intestine as alkali, and therefore helps to correct acidity in the blood and to stimulate kidney function.

FINALLY . . Acting by osmosis, Andrews clears the bowels gently and entirely without irritation.

Approx. active constituents:

Acid. Tart.	32% to 36%
Acid. Cit.	3% to 6%
Sod. Bicarb.	40% to 44%
Mag. Sulph.	17% to 21%
Other constituents	up to 1%

*From now on, sister, **SLEEP**
will do more good than we can*

There is a time reached in the treatment of all ills when doctor and nurse can let the natural recuperative forces of the body do their work unaided. It is then that sound, refreshing sleep becomes the most important thing of all. The Vitamin B, phosphorus and calcium in Bourn-vita are valuable for the nerves. Bourn-vita contains malt, milk, eggs and chocolate, is particularly light and easily digestible—which is important in many cases of convalescence—and induces perfect natural sleep.
