

Chemotherapy WITH 'ALBUCID' IN THE COMMON COLD

It is generally held that the common cold is due to infection by a virus against which no chemotherapeutic measures have so far been found to be effective.

In the very distressing secondary infections, however, sulphonamides have been employed with varying success. Outstanding in this series is 'Albucid' Soluble, which is freely water-soluble. The low surface tension in which it is presented in

'ALBUCID' SOLUBLE NASO-PHARYNGEAL SOLUTION

renders this preparation most effective whether in prophylaxis or treatment. Dispersal over the mucous membrane is rapid, penetration is marked, and it can be sprayed or painted on without causing irritation. Non-toxic—it is indicated in the mixed infections of coryza, tonsillitis, laryngitis, œsophagitis, etc.

Descriptive literature sent on request.

'Albucid' is the registered name which distinguishes sulphacetamide of British Schering manufacture.

OF PROVEN MERIT "WANDER" BRAND Malt Extract & Cod Liver Oil

THE therapeutic qualities and effectiveness of "Wander" Brand Malt Extract and Cod Liver Oil have been demonstrated by practical experience over many years. It is a preparation of outstanding pharmaceutical excellence.

The cod liver oil used is the best obtainable and the malt extract is specially prepared by the manufacturers, A. Wander, Ltd., who are probably the world's largest producers of medicinal malt extract, upon the manufacture of which there are no greater authorities.

The makers have also specialised for many years in the combination of malt extract and cod liver oil, and the proportions of these two ingredients which are combined in "Wander" Brand are those most generally required by the medical profession.

Thus "Wander" Brand Malt Extract and Cod Liver Oil is a product on which the physician can rely confidently, knowing that it cannot be surpassed.

INTOLERANCE TO STILBOESTROL THERAPY

Gastric derangement, accompanied by nausea and vomiting, may on occasions interfere seriously with the valuable medication provided by Stilboestrol therapy.

Where intolerance is experienced, a compatible gastric sedative will be found in 'BiSoDoL' Powder. This well-balanced antacid-digestant—with its peptonising and amylolytic agents—helps to combat any anorexia.

Composed of bismuth subnitrate, magnesium carbonate, sodium bicarbonate, papain, diastase and peppermint oil, 'BiSoDoL' will be found to be an ideal alkaline sedative.

DOSAGE: One teaspoonful to be given shortly before each dose of Stilboestrol. This dose may be safely increased where acute nausea is marked.

FORMULA: Magnesii carbonatis levis, 39.27. Sodii bicarbonatis, 56.09. Bismuthi subnitrat, papaini, diastasi, aa 1.40. Olei menthae piperitae, 0.44.
