

## THE THERAPY

## OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the underlying cause is not discoverable or changes from time to time—now irritant dusts, now bacterial infection, etc. The underlying factor is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.

## Control of Head Lice

It is now possible to kill lice and nits in the head by the simple application of Semprolia Insecticide, a combination of Lethane 384 Special and a White Oil, faintly scented with Citronella.

NO ODOUR DISTINCTIVE  
OF THE TREATMENT

Simple application by massaging into the scalp. No combing is required—indeed, it is contra-indicated except *after* treatment for removal of dead nits. Treatment is economical—individual application half to two drachms only.

Sample, details of packages for clinical use and home treatment and prices, on application.

## BUSINESS ENTERPRISE AFTER THE WAR

Small and medium-sized businesses in all branches of industry and trade must have every opportunity of contributing, by their enterprise and initiative, towards the nation's economic well-being after the war. They must be given full support in developing British trade at home or in overseas markets.

Changes due to war conditions call for a far-sighted policy concerning the financial aid they may need. This Bank through its branch managers, will therefore be prepared to consider enquiries from promising undertakings, whether old or new, conducted under good management. It will base its consideration of each proposal as much upon the prospective borrower's integrity and business capacity as upon his material resources.
