

## For Head Colds Sinusitis — Nasal Catarrh

One of the outstanding advantages of 'Benzedrine' Inhaler is that its vapour diffuses throughout the entire nasal cavity. It exerts a prompt and lasting decongestive action in areas that are inaccessible to liquid inhalants, and rapidly promotes easy, natural breathing. Its timely use often cuts short incipient head colds, and prevents the onset of serious complications, such as sinusitis. Children specially welcome this simple form of treatment. Samples gladly sent on request.

Each tube is packed with amphetamine 0.325 gm., oil of lavender 0.097 gm., and menthol 0.032 gm.
