

Why **ANDREWS** is the Ideal Form of Laxative

Andrews is a pleasant tasting, effervescent aperient with tonic properties, and is a valuable aid to Inner Cleanliness.

Andrews is beneficial in most digestive disorders, feverish conditions, the ailments of children, and in pregnancy and lactation.

Andrews justifies the description of "The Ideal Form of Laxative" because:—

FIRST . . Patients like taking Andrews. It is pleasant-tasting. Its brisk effervescence is immediately refreshing and stimulating. It sweetens the mouth and helps to clean the tongue.

NEXT . . Andrews allays gastric discomfort, heartburn and nausea by diminishing the stomach's acidity and relieving flatulence.

THEN . . Andrews increases bile flow, relieves hepatic congestion and improves digestion. It is partly absorbed from the intestine as alkali, and therefore helps to correct acidity in the blood and to stimulate kidney function.

FINALLY . . Acting by osmosis, Andrews clears the bowels gently yet entirely without irritation.

Approx. active constituents:

Acid. Tart.	32% to 36%
Acid. Cit.	3% to 6%
Sod. Bicarb.	40% to 44%
Mag. Sulph.	17% to 21%
Other constituents ..	up to 1%

'I hurt myself in the Playground'

DOCTORS are always being called upon to treat abrasions and sores which have originated from a fall or an accident in the playground. A dressing is required that is quickly applied, promotes healing, is disinfectant and soothing, and is easily removable without discomfort or injury to healing tissues.

For these reasons Optrex Tulle is very valuable in the Surgery for it is a wide mesh gauze impregnated with petroleum jelly and balsam of Peru. The gauze absorbs exudates, the petroleum jelly is soothing and facilitates

the removal of the dressing from raw surfaces without pain, whilst the balsam of Peru has antiseptic properties and stimulates healing. We are glad to announce that supplies of Optrex Tulle are again available.

Announcing **SULPHARSAN**

brand of

Sulpharsphenamine

for intramuscular injection

Prepared and tested in accordance with the Therapeutic Substances Regulations 1931 under U.K. Manufacturing Licence No. 18

SULPHARSAN is a sodium salt of a methylenesulphurous acid derivative of 3 : 3'-diamino-4 : 4'-dihydroxyarsenobenzene. It consists mainly of a sodium salt of 3 : 3'-diamino - 4 : 4' - dihydroxyarsenobenzene - NNN' - trimethylene-sulphurous acid and is a light yellow, free-flowing powder.

SULPHARSAN dissolves easily and completely in water, giving a solution nearly neutral in reaction. Such a solution causes no pain on injection and is well tolerated. It is unnecessary, therefore, to use special solvents for Sulpharsan.

Disappearance of spirochaetes within 48 hours and rapid normal healing of the lesions follow the use of this product.

Each batch is clinically tested before issue.

Approved by the Minister of Health for the purposes of the Public Health (Venereal Disease) Regulations, 1916.

Issued in ampoules of 0.15 : 0.3 : 0.45 : 0.6 gm.
