

NEUTRALIZATION of HYPERACIDITY

Above all else the patient suffering the distress of gastric hyperacidity seeks *immediate* relief.

Prompt alkali medication will, in many cases, ensure the patient's co-operation in carrying out other measures necessary for his complete recovery.

'BiSoDoL,' accurately standardized and readily miscible with milk or water, is a palatable and promptly-acting antacid powder composed of bismuth subnitrate, magnesium carbonate, sodium bicarbonate, papain, diastase and peppermint oil.

DOSAGE: One teaspoonful to be given shortly before each dose of Stilboestrol. This dose may be safely increased where acute nausea is marked.

FORMULA: Magnesii carbonatis levis, 39.27. Sodii bicarbonatis, 56.09. Bismuthi subnitratiss, papaini, diastasi, aa 1.40. Olei menthae piperitae, 0.44.

Para-Nasal Infections

treated with

ALBUCID SOLUBLE

Naso-Pharyngeal Solution

Albucid Soluble Naso-Pharyngeal Solution provides a highly efficient method of applying local sulphonamide therapy to the naso-pharyngeal mucosa. By its use, rapid bacteriostatic control of the very prevalent infections of the naso-pharynx is simply and safely obtained.

Whether sprayed or painted over the affected area it ensures even dispersal over, and rapid penetration of, inflamed mucosa in all cases of para-nasal infection. Its effective action is due to its remarkably low surface tension of only 37 dynes per cm. Moreover, Albucid Soluble is the only sulphonamide that can be presented in a neutral solution (pH 7.4). It is readily absorbed and of a high chemo-therapeutic activity.

IN BOTTLES OF ONE FLUID OUNCE × 10%.

'Albucid' is the registered name which distinguishes sulphacetamide of British Schering manufacture.

Fully descriptive literature will be sent on request.

CONCENTRATED

OXO

A Superb Beeftea

Beeftea, made from Concentrated OXO, contains the physiological stimulants of beef which aid assimilation, promote muscular activity and act as restoratives in debility.

Concentrated OXO

contains 0.5-0.6 Mg/Gm of the Vitamin Niacin
(References: Nature, 1944, 153, 99, BMJ,
1943, 11, 601).

Efficient Salicylate Medication

'ALASIL' is an analgesic, antipyretic and sedative of established value. It provides the physician with an efficient form of salicylate medication which combines the advantages of high tolerability and greater freedom from the possibility of unpleasant gastro-intestinal sequelæ.

This tolerability is due to the fact that 'Alasil' is a combination of acetylsalicylic acid and Dibasic Calcium Phosphate together with 'Alocol' (Colloidal Hydroxide of Aluminium), a powerful gastric sedative and antacid.

For these reasons 'Alasil' can be administered with confidence—over prolonged periods if necessary—to children, adults, the aged, and patients with finely balanced digestive capacities.

Each tablet contains 5 grs. Acetylsalicylic Acid, 6 grs. 'Alocol' (Colloidal Hydroxide of Aluminium), and 1½ grs. Dibasic Calcium Phosphate.

Alasil
