THE THERAPY OF ASTHMA

The treatment of asthma resolves itself into a consideration of underlying factors and causes. Often in ASTHMA the underlying cause is not

discoverable or changes from time to time—now Irritant dusts, now bacterial infection, etc. The underlying factor is fortunately always the same—bronchospasm.

Thus sometimes causative agents can be removed or mitigated but always the underlying factor—bronchospasm—can be treated, successfully, with FELSOL.

Most cases of Asthma are chronic and demand patience in treatment—persistence with FELSOL will yield the highest possible percentage of successes.

NO MORPHIA NO NARCOTICS

Phenazone 0.47 Iodopyrine 0.03
Antipyrine Aceto-salicylas 0.40
Caffeine 0.10
Ext. Viscum Album 0.01

duties

MIDLAND BANK LIMITED

ULTRA-VIOLET

and

Infra-Red

THE present-day range of Watson ultra-violet and infra-red equipment covers every requirement for treatment or prophylaxis. Although design has been simplified to save materials and labour, there is no loss of efficiency, and prices have not been unduly increased.

We offer the benefit of our long experience in planning physiotherapy departments, and a nation-wide organization for after-sale service.
