## In the campaign against illness this winter

We have been warned that extra care is needed this winter if epidemics are to be avoided. It behoves us therefore to make the best possible use of the available protective foods.

Marmite is a yeast extract of proved value as a vitamin product and for its anti-anaemic properties. And it is often preferable to order a dietary adjunct than a pill.

## A NEW RANGE of Children's Shoes

For more than a century Clarks have been famous for children's shoes. Now they have produced an entirely new range built on new lasts. Here, you see the natural imprint of a child's foot beside the silhouette of the new shoe shape. Notice the space left for forward toe growth. *Supplies are scarce — Clarks make more than ever but demand far exceeds production.*
