

THE THERAPY OF ASTHMA

The treatment of asthma demands consideration of underlying causes and factors. The former are variable, but the underlying factor—bronchospasm—is always the same.

Whether the cause is removable or not, the bronchospasm can be treated successfully with FELSOL.

Chronic cases yield to patient treatment with FELSOL—the preparation which has long enjoyed the confidence of the medical profession and has been prescribed consistently by doctors in hospital, private practice and Government Departments.

NO MORPHIA . . . NO NARCOTICS

Each dose contains

Phenazone 0.47 Iodopyrine 0.03

Antipyrine Aceto-salicylas 0.40

Caffeine 0.10

Ext. Viscum Album 0.01

Ext. Brachycladii 0.01

Local Sulphonamide Therapy in air-borne infections

Low surface tension gives
more rapid penetration:
only 37 DYNES per cm.

'Albucid' Soluble Naso-Pharyngeal Solution greatly curtails the disability due to common cold or influenzal attacks, since it prevents the secondary infections caused by common naso-pharyngeal organisms. The unusually low surface tension ensures even dispersal over, and rapid penetration of, the inflamed mucosa. 'Albucid' Soluble can be presented in a neutral solution (pH 7.4). It is non-toxic, non-irritant, readily absorbed and of high chemotherapeutic activity. The solution may be painted or sprayed.

In Bottles of one Fluid Ounce × 10%

'ALBUCID' SOLUBLE

NASO-PHARYNGEAL SOLUTION

Fully descriptive literature will be sent on request

'Albucid' is the registered name which distinguishes sulphacetamide of British Schering manufacture.

*An Ideal
Stand-by*

IN WASTING DISEASES

To replace the tissue wastage and decrease in energy associated with wasting diseases is a problem often rendered more difficult by the fact that there is frequently an associated anorexia and enfeeblement of the digestive and assimilative processes.

'Ovaltine' has proved to be the ideal stand-by in many such cases, because it is an energizing and reconstructive nutrient, complete in all the essential food elements. It is almost invariably well tolerated even by disordered stomachs and is practically completely absorbed into the blood stream.

The unique dietetic value of 'Ovaltine' is derived from its content of important food substances—milk, eggs and malt extract, with a cocoa flavouring.
