

# MORE HELP FOR THE DOMESTIC STAFF

**B**OTH nursing and domestic staff do quicker and better work when they are equipped with modern appliances.

Even the simple gas ring can save hours every week by putting quick-boiling service just where it is needed — in ward kitchens, staff pantries and bedrooms. Gas cookers, water heaters, coffee making sets, toasters, etc. not only make for punctual meals but can handle a wide variety of diets with ease.

Gas-heated laundry equipment means improved output and the new gas fires, with completely silent burners which never light back, turn bedrooms into comfortable bed-sitting-rooms for leisure periods.

BRITISH GAS COUNCIL | GROSVENOR PLACE LONDON SW1

## The new **HANOVIA ALPINE SUN** MODEL VIII clinical ultra-violet ray **LAMP**

In this improved post-war model, ultra-violet radiation is generated by the powerful and compact extra high pressure quartz arc tube (S.220 type). It now operates in an accurate inner reflector which produces irradiation as uniform as sunlight over the whole human trunk. So effective is the combination that an ordinary tonic dose with this lamp averages only one minute. All adjustments are quick, smooth, simple. Renowned for over thirty years as standard clinical equipment, the Alpine Sun achieves still higher standards of excellence in this new version. Early delivery can be made. We shall be glad to send a full illustrated description—ask for leaflet 'The Alpine Sun Lamp.'
