

Gently Borne

The rhythmic movement of the gentle wave carries the fallen leaf harmlessly to the shore. Similarly, the gentle rhythmic movement of the peristaltic wave induced by Agarol assures certain evacuation.

The exceptionally stable emulsion of pure medicinal mineral oil softens and lubricates the intestinal contents and thus prepares the ground for the peristaltic stimulus provided by the highly purified white phenolphthalein present in Agarol.

The three principal requirements for the relief of constipation are adequately furnished by Agarol: softening, lubrication, peristaltic stimulation.
