

## For Gastric or Duodenal Ulcer

IN view of the increasing adoption of intensive alkaline medication for gastric and duodenal ulceration, the selection of a suitable antacid agent is a matter of considerable importance to the general practitioner.

'Alocol' allows of antacid therapy in a particularly effective, safe and reliable form, and replaces with advantage mixtures of sodium bicarbonate, magnesia, bismuth, etc. It does not produce any unpleasant secondary reactions, even when taken in large doses and over a long period of time.

'Alocol' neutralises excess gastric acidity to the most favourable degree without provoking the danger of alkalosis, thus producing a markedly soothing effect on the gastric mucosa, with the prompt relief of pain and discomfort.

'Alocol' is available in Powder and Tablet form.

**Powder**—The normal dose is 1 gramme before and after meals.

**Tablets**—Each tablet contains Alocol, 0.5 gm.; P. Sacch. Alb., 0.4 gm.; Cocoa Powder, 0.035 gm.; Excipient, q.s. The normal dose is 2 tablets before and after meals.

# ALOCOL

Colloidal Hydroxide of Aluminium

Complete chemical history of 'Alocol' with convincing clinical reports and supply for trial sent free to physicians on request.

## ARRESTING

## The Male Climacteric

### BY PERORAL HORMONE THERAPY

The mental fatigue and diminished bodily energy which characterise the male climacteric respond readily to male hormone therapy in the form of ORAVIRON (British Schering brand of methyl testosterone in tablet form). Depression and nervous instability are eliminated, and the general condition, both mental and physical, shows a steady improvement.

'ORAVIRON' is presented in tablet form in the following sizes: TUBES of 20 x 5 mg tablets; TUBES of 20 x 10 mg tablets; BOTTLES of 100 x 5 mg tablets; BOTTLES of 100 x 10 mg tablets.
