

Confidence in Antisepsis

'Dettol' is an efficient bactericide. It is persistent. It is stable. It is non-poisonous, non-staining. Clear and clean, it is even pleasant in use. These properties have combined to distinguish 'Dettol' and to win professional confidence. 'Dettol' can be used at fully effective strengths without danger or discomfort. Moreover, germicidal efficiency is maintained when blood or pus—even in considerable quantity—is present.

SCIENTIFIC GLASSWARE

An aid to health and hygiene

To augment the progress and to ensure the successful outcome of practical scientific research experiments and manufacturing processes, the use of reliable glassware becomes a vital necessity.

PYREX Brand Scientific Glassware, owing to its low co-efficient of expansion of '0000032, is impervious to the effects of sudden thermal changes, and, as acids have no effect upon its surface, this remarkable glassware is both safe and dependable in all chemical processes.

It has been found possible through this low co-efficient of expansion, to make the many types of PYREX glass vessels of more robust build than glass of ordinary composition, thus reducing the risk of breakage in everyday handling.

As an aid to health and hygiene PYREX Brand Scientific Glassware has proved a worthy benefactor to the nation in every sphere of production.
