

# The "UNIVERSAL" Operation Table

is now in full production. It has been designed to meet the requirements of modern surgery. The table top is mounted on a hydraulic base with foot pedals for raising or lowering the table, and is completely stable and rigid. The base is mounted on heavy castors, and the table top may also be rotated independently of the base. Both these movements are fitted with foot operated locking levers. The table top is capable of a full range of movements, including a lateral tilt up to 30 degrees, and extreme Trendelenburg and reverse Trendelenburg positions. The movements are controlled by worm and nut or steel tubes working in steel sleeves. A built-in adjustable kidney bridge is provided, and the foot section is quickly detachable. Accessories, of which a full scale is available, are attached by sliding blocks on steel bars, running the length of the table on either side, and they are extremely rigid when in position. The table is fitted with a polished stainless-steel top. The other parts are finished in metallized stoved enamel and chromium plate. It is manufactured throughout to a high degree of precision by:—

## THE MINISTRY OF FOOD

# Vitamin Supplements

The Welfare Foods Service operated by the Ministry of Food in consultation with the Ministry of Health provides the following supplements for expectant mothers and young children.

### CONCENTRATED ORANGE JUICE (5d. per bottle or free).

Expectant mothers can get one bottle (6 fluid oz.) every 9 days. Infants under 6 months can get one bottle every 4 weeks. Children over 6 months and under school age can get one bottle every 2 weeks. This provides the following average daily amounts of vitamin C.

Expectant mothers 40 m.g.  
Infants under 6 months 13 m.g.  
Children over 6 months  
and under school age 26 m.g.

### COD LIVER OIL COMPOUND (with added vitamin D). Free.

All the above classes can get one bottle every 6 weeks, providing the following average daily amounts of vitamins A and D.

Vitamin A 4,000 i.u.  
Vitamin D 700 i.u.

### CHOCOLATE COATED vitamin A & D Tablets (with added calcium phosphate B.P. and potassium iodide). Free.

Available to expectant mothers as an alternative to the cod liver oil compound.

The dose is one tablet daily, containing—

Vitamin A 4,000 i.u.  
Vitamin D 800 i.u.  
Calcium phosphate B.P. 250 m.g.  
Potassium iodide 0.13 m.g.

The local Food Office will be glad to give full information about this service. Doctors are asked to bring it to the attention of expectant mothers and mothers of children under school age.

Professional enquiries should be addressed to The Ministry of Food, Welfare Foods Division, Mount Royal, Colwyn Bay.

Issued by the Ministry of Food, London, S.W.1.
