

'AVLON'

brand

PENICILLIN LOZENGE B.P.

For Oral and Throat Infections

Designed for slow disintegration when sucked in the mouth, 'Avlon' Penicillin Lozenges provide a convenient, pleasant and effective means of maintaining bacteriostatic concentrations of penicillin in the saliva.

Indicated in the prophylaxis and treatment of infections of the mouth and throat, the lozenges have proved highly effective in ulcerative conditions of the oral mucous membrane, e.g., Vincent's angina and in pharyngitis, sore throat and laryngitis. 'Avlon' Penicillin Lozenges each contain 500 international units of penicillin calcium salt and are issued in convenient air-tight containers of 25.

Obtainable from your usual suppliers.

Ph.192f

The best rest she'd ever had . . .

"In all my life I've never been so comfortable" she said, though she could not move from her bed. Each night, she enjoyed deep sleep; each day, blissful comfort. Not once did she complain or get restless. The soft springs of Intalok yield to the contour of the body, yet give correct scientific support which the lay human calls comfort. Patients relax satisfactorily on the Intalok mattress.

Intalok mattresses mean a real economy to hospitals. They give many years of comfortable service without attention other than turning occasionally from side to side or end to end to equalize wear. Ticking is detachable and may be laundered separately. Intalok springing is rust-proof. It GAINS by stoving. It is guaranteed for 10 years.

Constant

FARADISM-FREE cutting current

The cutting current of the Universal Diathermy is valve-generated—no spark gaps to adjust, no points to clean. Output is smooth, consistent, and entirely free from spurious faradic impulses. The surgeon will appreciate these advantages in an exceptionally wide range of operative procedures, since the Universal Diathermy has been specially designed for all-purpose hospital use. Additional facilities include diagnostic accessories, electric cautery, and built-in centrifugal suction unit. Full description of this Marconi valve-operated instrument on request.

The Universal Diathermy, Type MME II
