

A Delicious Concentrated **VITAMIN FOOD**

TO the physician requiring a product which incorporates important vitamins in a form acceptable to every patient, "Vimaltol" presents special advantages.

"Vimaltol" is made from specially prepared malt extract of high protein content, yeast—one of the richest sources of vitamin B₁—and Halibut Liver Oil, an important source of vitamins A and D. It is also fortified with additional vitamins and mineral salts, and is deliciously flavoured with orange juice.

"Vimaltol" is thus an important aid in the treatment of the many abnormal conditions resulting from the deficiency of one or more of the essential vitamins in the average everyday dietary.

The routine use of "Vimaltol" helps normal development of the growing organism and the maintenance of correct metabolism, while raising the general resistance against infection.

"Vimaltol" has thus a very wide application in general practice for patients of all ages. It can be prescribed with advantage at all seasons.

LIVER *at meal times*

In a Palatable, Readily Acceptable Form.

Proteolysed Liver A & H is prepared by a process which eliminates the nauseating flavour of raw liver. Its palatability has been further improved by its presentation in a paste form. It may be readily incorporated in the normal diet by its inclusion in soups or as a sandwich spread.

In pernicious anæmia and other megalocytic anæmias, proteolysed liver has proved effective in cases which have failed to respond to extracts of liver in general use.

Tested throughout production and carefully standardised for strength

MORE WORK has probably been carried out in research laboratories on the perfection of processes for the most economical manufacture of insulin than on any other drug.

As one of the pioneer manufacturers of insulin in this country, Boots have constantly investigated possibilities of improved production methods during the past quarter of a century.

Insulin-Boots is prepared by the most efficient processes

known to-day. Its purity, sterility and activity are ensured by stringent tests at the various stages of production, and every batch is accurately standardised for strength.

SevenSeaS is vitamins plus

Popular belief always credited Cod Liver Oil with nutritional values over and above those of the Vitamin A and D that it contains in abundance. Recent scientific research has justified an ancient belief in yet another specific direction.

Unsaturated fats (and Cod Liver Oil is more unsaturated than any other edible oil or fat) are often deficient in normal diets. They have special values in promoting general health and particularly the proper nutrition and health of the skin.

The method of preparation of SevenSeaS at sea from sea-fresh livers ensures that the delicate unsaturated fatty acids of the oil are presented in an undamaged and readily digestible form. A daily teaspoonful of SevenSeaS provides unsaturated fatty acids at the recommended minimum level of approximately 1% of the calorie intake.

Current rationing difficulties make the prescription of SevenSeaS of still greater value.

towards CONTROL of the COMMON COLD

While the primary infecting agent in the common cold remains a subject for continued research, enough is known about the secondary invaders to produce a useful vaccine for prophylaxis and treatment.

Inoculation with Cold Dissolved Vaccine *Glaxo* releases the antigens of a variety of these secondary organisms and can therefore do much to prevent or lessen the disabling symptoms of the cold's acute phase. The antigens are in solution and immediately available to stimulate antibody production. For immunisation, three injections of Cold Dissolved Vaccine *Glaxo* at weekly intervals may suffice for the entire winter. For treatment, the course can be condensed into two or three days without risk of undue reaction.

Introducing

A NEW COMBINED

ANTIPEPTIC THERAPY

Following extensive work by the Warner Research Staff and after stringent clinical trials, we are pleased to announce the introduction of Gelusil*, a new combined antipeptic preparation and distinct advance in antacid therapy.

In recent years, ordinary aluminium hydroxide gels and magnesium trisilicate have deservedly taken the foremost place in the treatment of peptic ulcer. Used separately, they have many advantages — and some disadvantages. Gelusil combines, in each tablet, the undoubted therapeutic virtues of both drugs while obviating their drawbacks. This new approach to antipeptic treatment is made possible by the unique properties of a specially processed, partially dehydrated aluminium hydroxide gel having all the essential virtues of ordinary alumina and none of its defects.

Literature and samples will be supplied on request.

*Each tablet contains approximately 7½ grains
Magnesium Trisilicate and partially dehydrated
Aluminium Hydroxide Gel corresponding to 4
grains Aluminium Hydrate.*

Vitamin Therapy - its uses and limitations

BRIDGING THE GAP

More care, skill and knowledge than ever before are required in the buying and preparation of food if all nutritional requirements are to be fully met by available supplies.

During this winter we may expect to see patients who, through lack of knowledge or shortage of time, have failed to maintain their normal standard of nutrition.

For many, the greatest help that can be given is the provision of a supplement which will balance the average gap between supply and requirement.

Such a supplement, designed especially for this purpose, is

SAFE SULPHONAMIDE THERAPY with 'SULPHAMEZATHINE'

During the past year a number of eminent authorities have expressed a preference for 'Sulphamezathine' and have drawn attention to its outstanding advantages in the treatment of bacterial infections.

The following special characteristics of 'Sulphamezathine' administration are of importance in medical practice.

- 'Sulphamezathine' is one of the least toxic of the sulphonamides. It is well tolerated and rarely produces unpleasant effects of any kind.
- Renal complications are almost unknown. Additional fluids and alkalis are unnecessary.
- Excretion of 'Sulphamezathine' is relatively slow, so that effective blood levels can be easily maintained.

'Sulphamezathine' is available, in tablet form (0.5 gramme) for oral use and as the sodium salt in sterile solution for parenteral administration.

The antiseptic and antipruritic principle in WRIGHT'S COAL TAR SOAP

The unique preparation, Liquor Carbonis Detergens, was first introduced by Wright's in 1862. It isolates, from the inert non-therapeutic substances, the valuable antiseptic and antipruritic agents known to be in Coal Tar. Since its introduction Liquor Carbonis Detergens has achieved a high place in dermatological practice, and is repeatedly chosen as the foremost medicament for skin diseases.

The continuous application of new methods in research and manufacture makes Wright's Liquor Carbonis Detergens today a product improved both in appearance and antiseptic value.

This preparation gives Wright's Coal Tar Soap its renowned health-giving qualities. Soothing to the tenderest skin, and thorough in its cleansing, Wright's is in every way the safest toilet and nursery soap for daily use.

WEATHERING THE FORTIES

The Roaring Forties were a searching test of seaworthiness for the sailing ship. So for men are the Forties—in years of age—a period of stress, revealing any latent defect. It is then that many observe the first symptoms of hypertension.

If business commitments allow no easing of physical and mental strain, symptomatic treatment is indicated. This improves the patient's psychological state and tends to check progress of the condition.

'Theominal' is a preparation combining vasodilator, sedative and antispasmodic properties. Its wide use in hypertension attests its value.

BOWDEN HOUSE Harrow-on-the-Hill

Diagnostic Week.—All patients spend the first week of their stay in undergoing a careful investigation. Clinical, pathological, and radiological diagnoses are used as routine, and each patient has at least one session of narco-analysis. For this an inclusive fee of 25 guineas is made. The patients come in with no commitment on either side for further treatment.

Those who are anxious to remain, and appeal to the staff to be suitable, undergo intensive psychotherapy as before. The fees for this are 12 to 20 guineas a week, inclusive of regular specialist treatment.

THE RETREAT, YORK

The Pioneer Hospital, opened 1796, for the humane treatment of those suffering from Nervous and Mental Disorder.

This Hospital of 230 beds, administered by a Committee of the Society of Friends, combines what is best in the investigation and treatment of nervous illness with a sympathetic and friendly atmosphere. During 1946 309 patients were admitted, of whom no fewer than 262 were voluntary cases. Much curative work is accomplished in our mental hospitals to-day, and the recovery rate compares very favourably with that of our general hospitals.

For information and terms of admission apply to the Physician-Superintendent, Arthur Pool, M.R.C.P., D.P.M. (Tel.: York 54551.)
