## SYMPTOMATIC RELIEF OF INFLUENZA

An outstanding advantage of Veganin\* is the rapidity of its action. In influenza, headache and muscular pain are promptly alleviated; the temperature is reduced; exhaustion and restlessness yield to its sedative influence. The distressing "influenza cough" is relieved and beneficial sleep ensured. By conserving the patient's defensive energies, Veganin acts prophylactically against bronchial and pneumonic complications.

HOMOGENIZED FOODS

**Easy to digest SOUPS & VEGETABLES**

**for Babies . . . and for special diets**

By Libby's patented process of Homogenization ★ the cells containing the valuable food elements of Vegetables, Soups and Fruits are broken open making the nutrient readily assimilable by the most delicate digestive system. Also, tough irritating fibres are eliminated and the bulk evenly spread throughout the product. Thus it is possible to give all the goodness of these foods at a very early age — without the digestive strain which would normally ensue. Excellent, too, for adults requiring a smooth diet.

★ Homogenized Foods have been forced through tiny valves under high pressure — a much more effective process than the usual 'straining' through wire mesh. Clinical data and laboratory reports gladly supplied on request. Write to Libby, McNeill & Libby Ltd., Forum House, 15/16 Lime Street, London, E.C.3.

Page from a policeman's  
notebook . . .

"Trafalgar Square, 11.20 a.m. Man knocked down by bus . . ." To the constable, the note is a matter of routine, with none of the glamour that might accrue from a report on a pearl robbery. To the hospital surgeon, however, it may mean a case that requires the highest professional skill.

Wounds sustained in street accidents are among those for which Compound Flavazole Powder is particularly suitable as an antiseptic. Flavazole, a new antiseptic discovered in Boots' laboratories, is a chemical compound containing equimolecular proportions of proflavine base and sulphathiazole in the form of Compound Flavazole Powder (Flavazole 2%, Sulphathiazole 98%). It is recommended for local application to open wounds, either before stitching (in emergencies) or after stitching. Bacteriological investigations show that Flavazole is effective against more organisms than the majority of antiseptics previously used for this purpose.

## DUO-THERAPY UNIT Model IX

combining two standard ray therapy lamps

### The ALPINE SUN ULTRA-VIOLET LAMP

Familiar to every physician, the Alpine Sun proves as useful in general practice as indispensable in hospital. It is the accepted standard equipment for systemic ultra-violet irradiation, and its application evokes marked response in all conditions of calcium deficiency (notably pregnancy and post-partum debility), in many skin diseases, most forms of tuberculosis and other far-ranging indications. The Model IX Alpine Sun is a high pressure mercury arc lamp, unique in its high intensity, constant output, smooth movements and perfect reliability.

### The 'SOLLUX' THERAPEUTIC INFRA-RED LAMP

Both an analgesic and a circulatory stimulus, infra-red irradiation gives rapid benefit whenever inflammation, infection, or tissue repair are in progress. The Sollux Lamp embodies all facilities for this comprehensive therapy—luminous or dark sources, regulation of intensity, localizers and filters.

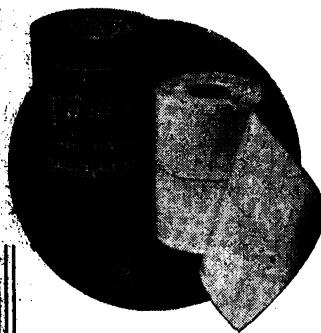

The Duo-therapy Unit combines these two standard actinotherapy lamps in one mobile, powerful, economical combination. Ask for leaflet No. M.160.

## Anethaine anaesthesia internationally accepted

'Anethaine' stood trial in the hardest of all proving grounds — the widely scattered theatres of war. Confirmation of its success is today's acknowledgment by medical men throughout the world that 'Anethaine' (amethocaine hydrochloride) is outstanding among local anaesthetics, high in activity and of relatively low toxicity.

Uses for 'Anethaine' are not restricted to major surgery. In ointment form it gives rapid relief from the minor pain and pruritus common to so many everyday accidents and affections — burns, haemorrhoids and insect stings, for instance. It is also valuable as an antiseptic lubricant in instrumental examinations, substantially reducing the discomfort to the patient. Of particular practical merit is the innocuous nature of 'Anethaine' Ointment; it may be safely prescribed for patients' personal application when desired.

## THE FIRST YEAR OF LIFE

### FOR SUCCESSFUL INFANT NUTRITION

At no other stage is the correct nutrition of the infant more important than in the first year of life. Breast feeding, if possible, remains the unchallenged method of laying this foundation of health. But if natural feeding fails, Cow & Gate Milk Foods provide a reliable and dependable substitute

#### HALF CREAM

When foods other than breast milk are first introduced, some children require a reduced fat intake. In a smaller number of cases it is advisable to continue with the low fat content for several months. The half cream food, which contains the same vitamin and iron supplements as the full cream variety, has this reduction of fat with an addition of carbohydrate in the form of milk sugar.

#### FULL CREAM

This product conforms approximately to the fat content of average breast milk, and is prepared from finest quality milk powder made by the Cow & Gate Improved Roller Process, under scientifically controlled conditions.

It contains 320 International Units Vitamin D and 1 milligram of Iron per ounce.

### COW & GATE MILK FOODS

### the NEW analgesic . . .

First reports on the use of 'Physeptone' in general practice indicate that an outstanding advance has been made in the treatment of severe pain. With few exceptions, it may with advantage replace morphine, to which it is equal or superior in analgesic effect. 'Physeptone' does not unduly depress respiration, constipate, or induce narcosis or mental apathy; it may be given continuously for long periods without diminution of effect.

'Physeptone' is available in ampoules of 10 mgm. in 1 c.c. in boxes of 12 at 9/-, plus 2/3 purchase tax. For oral administration it is available as 'Tabloid' brand compressed products, 5 mgm., in bottles of 25 at 4/6, plus 1/1½ purchase tax, and bottles of 100 at 16/10, plus 4/2½ purchase tax (SUBJECT TO PROFESSIONAL DISCOUNT).

**IMPORTANT:** 'Physeptone' was brought under the Dangerous Drugs Act and Regulations on January 1st, 1948.

## 10,000 MEDICAL MEN

Aren't Likely To Be Wrong . . .

It is our good fortune to be of service to thousands of medical men—both in hospitals and in private practice.

The items we find most useful to them are our standardised Case History (visible) records, our Accounts (visible) records and our desk-top units.

The visible records afford the doctor a simple method of controlling his case-histories and accounts, visually, of signalling interviews and special cases and of annotating diagnoses,

prescriptions, family histories, etc. Portable books holding these records make patients on the "visiting" list a simple problem.

The desk unit is a species of silent "secretary" in that it brings forward reminders of appointments and other matters, houses all relevant papers, etc., and, if necessary, provides a covered-in file with a slotted-in record in front for annotating. These latter folders are also widely used for X-ray negatives and the like.

Full details (and free specimen records) will be sent to you if you will just write "Records" on your note-paper or visiting card.

## 'Haliverol'

*The result of long and varied experience  
in Vitamin research and Vitamin assay*

'Haliverol' is a rich source of the fat-soluble vitamins A and D. It is standardized to contain in each grammie 27,000 International units of Vitamin A and 5,400 International units of Vitamin D, and each capsule contains 4,500 International units of Vitamin A and 900 International units of Vitamin D.

'Haliverol' provides a markedly active preparation and assures adequate intake of these vitamins without imposing unpalatable medication or altering the dietetic balance.

It is standardized, and complete reliance may be placed on its vitamin activity.

The Parke, Davis & Co. Laboratories have the benefit of 28 years' experience in vitamin study, and of extensive manufacturing operations, especially in the production of halibut-liver oil. These laboratories not only did pioneer work in vitamin preparations, but also, in co-operation with another laboratory, developed the first commercial production of vitamin preparations from halibut livers.

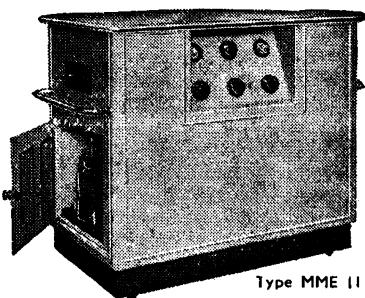

'Haliverol' is available in vials of 5 c.c. and 50 c.c. each with a dropper. It is also supplied in packages of 25 and 100 capsules.

## INCREASED PREVALENCE OF HYPERACIDITY

One legacy of war-time strain persists. It is evidenced by the number of patients exhibiting symptoms of gastrointestinal disorder.

The same stress factors of overwork, hurried, irregular meals and the inability to relax completely still prevail.

In such instances, \*'Milk of Magnesia' is invaluable in securing rapid control of discomfort. A colloidal suspension of magnesium hydroxide, it soothes the inflamed mucosa, and neutralizes the excess acid, without liberation of gas. Furthermore, its mild laxative action ensures removal of toxic waste products.

'Milk of Magnesia' may be prescribed with confidence equally in the mild case of dyspepsia or the acute ulcer stage, where sustained alkaline treatment is essential.

\*'Milk of Magnesia' contains approximately 8.45% Magnesium Hydroxide in colloidal suspension.

FAR and wide, the many important qualities of PYREX Brand Glassware have proved of sterling value to the Scientist, the research worker and the commercial manufacturing chemist alike.

Besides being highly resistant to all acids (other than hydrofluoric and glacial phosphoric) PYREX Brand Scientific Glassware with its low coefficient of expansion of  $3.2 \times 10^{-6}$  per degree centigrade is immune to the effects of sudden thermal changes.

This latter feature permits the basic structure of PYREX Brand Scientific Glassware to be much more robust than that of ordinary glass. The additional physical strength thus afforded gives a wide margin of safety, and incidentally reduces replacement costs to a percentage far below that of more fragile glass.

## When patients need more VITAMIN C

In the many cases where supplementary Vitamin C is called for, Rose Hip Syrup is an excellent choice. It is extremely palatable, simple to administer, and is readily tolerated by patients of all ages.

Scott & Turner's Rose Hip Syrup provides an ample intake of Vitamin C in all scorbutic and sub-scorbutic conditions—loss of weight, proneness to infection, anorexia and disordered blood picture. It is made from freshly-gathered rose hips which are exceptionally rich in ascorbic acid, and is prepared in accordance with the Ministry of Health standard (200 mgs. ascorbic acid per 100 mls.).

With its added sugar syrup, Scott & Turner's Rose Hip Syrup is pleasantly sweet. It may be given undiluted, or diluted with water or milk; or added to porridge, cereals and milk puddings. A dessertspoonful contains approximately 25 mgs. ascorbic acid. From chemists only, 1/9 per 6-oz. bottle.

Sample bottle for clinical trial on request.

## EQUIPMENT GETS ITS 'MEDICAL'

Regular inspection—so vital to the proper care of medical equipment—is an important part of the B.O.C. service. At regular quarterly intervals, in conformity with B.S.I. recommendations, the B.O.C. Maintenance Service Scheme is designed to operate in Hospitals, Dental Surgeries, etc., throughout the country. Apparatus is thoroughly overhauled and left in perfect working condition and certain rubber parts are replaced free of charge. A leaflet fully descriptive of this Service will be sent on request, or the Company's Representatives will gladly explain the Scheme. The Service covers maintenance to all Anaesthetic, Analgesic and Oxygen Therapy Apparatus including Pipeline installations, and caters for large Hospital equipment or the country midwife's gas-air apparatus. Apart from this annual service arrangement, the Company's Engineers also deal with urgent or routine work to apparatus on users' premises.

## PRE-NATAL DIET and the course of PREGNANCY

The normal functioning of the reproductive organs during pregnancy depends, among other things, upon the plentiful intake of vitamins and minerals.

Medical opinion is gaining ground that there is an increased need for Vitamin B in late pregnancy and the early puerperium. Its administration during the period before childbirth has resulted in less vomiting and nausea and in marked improvement in the nutritional value of the breast milk. In order to assure the building of the foetal bones *in utero* and afterwards during breast-feeding, the importance of Vitamin D and of calcium and phosphorus is also established.

In Supavite Capsules the practitioner has at hand a combination of these and other essential vitamins and minerals in a scientifically balanced form of particular value in maternity cases.

## The filter tip absorbs

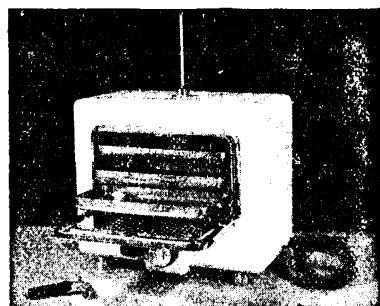

throat irritants

Five protective layers go to make up the filter tip of every du Maurier cigarette. Three layers of white vegetable tissue with alternate layers of fine cellulose protect the membranes from the irritant action of pyridine bases and other non-volatile bodies. Although no shred of tobacco can pass the lips and no unfiltered smoke can impinge on the tongue, the du Maurier tip allows the full flavour and fragrance of finely selected tobacco to pass unimpaired

## APPOINTMENTS

### HIS MAJESTY'S COLONIAL SERVICE COLONIAL MEDICAL SERVICE

The Colonial Medical Service offers an interesting career and provides unique opportunities for applying medical science in territories which are undergoing rapid development. There are immediate openings in many parts of the Colonial Empire and applications are invited from both men and women doctors who are British subjects and possess qualifications registrable in the United Kingdom. Medical Officers are usually appointed in the first instance for general duties. This implies all-round ability with a balanced outlook upon both preventive and curative medicine. Officers are also required for public health duties, in which case the D.P.H. or some experience of health work is necessary. Ample opportunities exist for field investigation, while officers with special aptitude are encouraged to obtain such, higher qualifications as will enhance their value to the Service. Officers are from time to time seconded or appointed to medical laboratories in the larger territories. In the West African territories improved salary scales and conditions of service have recently been introduced. In most of the other territories the terms of service are being actively reviewed, and meanwhile temporary cost-of-living allowances are being paid over and above the existing salaries. At present initial basic salaries, i.e. irrespective of any cost-of-living allowance and of any credit that may be allowable for war service or professional experience, vary between £600 and £925 according to locality. There are, in addition, numbers of super-scale posts in the administrative and specialist grades which are normally filled by promotion within the Service. Free passages for an officer and wife are generally provided both on first appointment and when travelling on leave of absence. Where Government quarters are provided a small rent is usually payable. Good leave conditions and an adequate pension scheme are in force. The Colonial Medical Service is a unified service and members are eligible for transfer from one territory to another, either with or without promotion. Selected candidates may be required to take a course in tropical medicine either before proceeding overseas (in which case they would receive an allowance) or on first leave. Candidates for permanent service must have been born on or after January 1, 1907. Contract appointments are also available in certain territories for doctors born before this date. Further particulars may be obtained from, and applications should be addressed to, the Director of Recruitment (Colonial Service), Colonial Office, 15, Victoria Street, London, S.W.1.

A similar course may be held in September, 1948. Fee for graduates not claiming expenses from Government sources, 10 guineas.

**PAEDIATRICS AND OPHTHALMOLOGY**

Short courses of instruction in Paediatrics and Ophthalmology are run in conjunction with the courses in Medicine and Surgery. They are primarily intended for those who wish additional experience in these subjects. A small fee is charged and the numbers are limited.

Applications for enrolment to Director of Post-Graduate Studies, University New Buildings, Edinburgh, 8. Applicants for courses in Obstetrics and Gynaecology, Internal Medicine and Surgery, should supply particulars of qualifications and post-graduate experience.

**UNIVERSITY OF OXFORD, RADCLIFFE TRAVELLING FELLOWSHIP, 1948.** An examination for a FELLOWSHIP of the annual value of £300, and tenable for two years, will be held during Hilary Term, 1948, at the University Museum, on February 16, 1948. Candidates must have passed all the examinations required by the University for the Degree of Bachelor of Arts and for the Degree of Bachelor of Medicine. They must not have exceeded four years\* from the time of passing the last examination required for the Degree of Bachelor of Medicine. The successful candidate must before election declare that he intends to devote himself during the period of his tenure of the Fellowship to the study of Medical Science and to travel abroad with a view to that study. The Fellowship will be vacated *ipso facto* by a Fellow who spends more than twelve months in the whole within the United Kingdom. The Regius Professor of Medicine and the Examiners present a yearly report on the work done by each Fellow to the Electors, who may, if they think the report unsatisfactory, declare the Fellowship forfeited. Candidates will be required to submit an essay of not more than six thousand words on some subject, chosen by themselves, connected with the science or practice of Medicine, including pre-clinical subjects. With this essay they should submit a statement indicating the sort of work they would like to do during the period of tenure of the Fellowship, should they be successful. They will be examined *viva voce* on the date advertised. All intending candidates should send their names, addresses, qualifications and *curriculum vitae* together with the above-mentioned essay and statement regarding the nature of the work desired to the Regius Professor of Medicine, University Museum, on or before January 31, 1948. (For the Radcliffe Examiners) A. W. M. Ellis, Regius Professor of Medicine.

\*Under the provisions of Decree (9) of January 29, 1946, as amended by Decree (21) of January 28, 1947 (Examination Statutes, 1947-48, page 503). Candidates are permitted, until September 30, 1951, to exclude any period of approved war service at the rate of one term for each completed four months of service in reckoning their standing.

**UNIVERSITY OF LEEDS.**—A TEN WEEKS' COURSE for the Final F.R.C.S. examination will be held in Leeds General Infirmary, beginning on February 24. The number of candidates will be limited to fifteen. For Nervous and Mental Disorders

President: The Most Hon. the MARQUESS OF EXETER, K.G., C.M.G., A.D.C. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

**WANTAGE HOUSE.**—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Vichy Douche, Scotch Douche, Electrical baths, Plomberies treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

**MOULTON PARK.**—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens and orchards of Moulton Park. Occupational Therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

**BRYN-Y-NEUADD HALL.**—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone Nos.: 2356 and 2357 Northampton), who can be seen in London by appointment.

## BANKS OFFER

# New Service

Our Bank is ready and willing to help you to invest your money in National Savings Certificates. All you have to do is to sign a Banker's Order form, either for a single block of National Savings Certificates, or for a steady month-by-month amount. Your Bank will do the rest without trouble to you, and without charging for their services.

Remember, that with Income Tax at 9/-, the new National Savings 10/- Certificates, when held for 10 years, are the equivalent of a taxable investment yielding £4 16s. 8d. per cent. If you are paying more than 9/- in the £ they are even more attractive. Savings Certificates are a profitable gilt-edged investment and you can now hold 1,000 units of the new issue in addition to permitted existing holdings of Certificates of earlier issues. See your Bank Manager about it today.
