Introducing **ALOCOL Cream**

*Now making Alocol available
in 3 convenient forms*

ALOCOL, the well-known brand of Colloidal Aluminium Hydroxide is now obtainable as a stable and palatable cream, thus presenting, with Alocol Powder and Alocol Tablets, three convenient ways of administering Alocol to meet every condition and preference.

Alocol Cream—equally with Alocol Powder and Tablets—is a most effective antacid for the neutralisation of hyperacidity in the treatment of dyspepsia, peptic ulcer and other conditions which irritate the gastric tract.

***Alocol Cream, like Alocol Powder
& Tablets, has these Advantages:***

- Owing to its high reactivity it quickly neutralises excess acidity.
- It has a reserve of neutralising power and can thus control for a prolonged period the gastric acidity at the level most conducive to healing.
- It does not produce alkalisation nor a condition of alkalosis.

ALOCOL CREAM is supplied in bottles of 9 fl. oz.

ALOCOL CREAM FORMULA—Alocol 6.0 parts approx.; Glycerin 5.0 parts; Ol. Menth. Pip. 0.005 parts; Aq. Chlorof. 4.0 parts; Aq. Dest. to 100.0 parts. The normal dose is 1 to 3 teaspoonfuls between meals and at bed-time.

Complete chemical history of 'Alocol' with convincing clinical reports and supply for trial sent free to physicians on request.

In comparison with the population as a whole, the professional classes seem especially prone to Diabetes Mellitus.

In the treatment of Diabetes Mellitus, the use of Insulin is now universal. Insulin-Boots is prepared from pure crystalline Insulin and tested in accordance with the regulations made under the Therapeutic Substances Act, 1925.

Supplied in rubber-capped vials as below:

20 units per c.c. Vials of 5, 10 and 25 c.c.
40 units per c.c. Vials of 5 and 10 c.c.
80 units per c.c. Vials of 5 and 10 c.c.

For sustained control of gastric hyperacidity

NOVASORB

(Hydrated Magnesium Trisilicate)

Novasorb provides for sustained control over gastric hyperacidity without producing an alkaline condition in the stomach. It thus presents a desirable improvement over the older antacids, where control is limited to the immediate reaction and where continued administration of excess alkali may induce alkalosis.

High adsorptive properties

Will not give rise to alkalosis

With suitable doses, does not destroy peptic activity

A safe antacid for general use

The Novasorb brand of hydrated magnesium trisilicate was developed and introduced by Evans Fine Chemical Works and is based on original observations and clinical trials (*Brit. Med. J.*, 1936, 1, 143, 205 and 254).

For Parous Women

WHILE Tampax—both in principle and in application—has enjoyed the approval of members of the Medical Profession for many years now, the need of an additional product of greater absorbency has been stressed—particularly for use by parous women.

This need is now fulfilled by Super Absorbent Tampax No. 2, designed to cater for a heavy flow.

With a 40% increase in absorptive capacity, this new Tampax No. 2 makes available to many thousands more women the complete freedom, comfort and hygiene of which the name "Tampax" is symbolic. Available in America for some years, only shortage of raw materials and machinery during the War period prevented its manufacture in this country.

For normal requirements, the original Regular Tampax No. 1 is completely adequate.

Tampax may be confidently recommended by Physicians for use by married women during normal menstruation. Its use by unmarried girls should not be advocated when the size of the hymeneal aperture would cause difficulty in insertion and withdrawal.

Sanitary Protection **TAMPAX** Worn Internally

has won the approval of Doctors everywhere

If you require a sample packet of Super Absorbent Tampax No. 2 or Regular Tampax No. 1, please write to: Medical Inquiries, Tampax Limited, 110 Jermyn Street, London, S.W.1.

Ambulatory Treatment with
'AVLON'
brand

PENICILLIN OILY INJECTION

The use of suspensions of penicillin in oil has proved to be a practical and effective means of delaying the absorption of penicillin after intramuscular or subcutaneous injection.

A single dose of Penicillin Oily Injection maintains bacteriostatic blood levels of penicillin for periods considerably longer than those which obtain when aqueous solutions are employed so that the necessity for injections to be given at frequent intervals is obviated.

The preparation thus presents a most convenient alternative to the multiple injection technique. The patient has the advantage of being on an ambulatory basis and of receiving only one or two injections per day.

'Avlon' brand Penicillin Oily Injection is issued as a homogeneous suspension in 10 c.c. vials, each c.c. containing 125,000 units of penicillin calcium salt.

THE PRACTITIONER'S CARD-INDEX GUIDE TO TREATMENT

Deliveries—
Early Feb.

Prepared and edited by medical specialists
experienced in medical publishing

This digest of treatment in the form of a card-index system is an original idea which is finding a ready welcome with the medical profession. A world survey of medical literature has been made and a digest, concise but sufficiently comprehensive to enable the reader to apply treatment, is supplied on cards filed in a special metal box. This is brought up to date every three months.

The complete Index consists of approximately 350 cards, including a list of pharmaceutical specialities with manufacturers' names and addresses and telephone numbers. The initial cost of £5 5s. includes four quarterly replacements of cards. Subsequently the cost of the replacement service is £2 2s. per annum.

As a reliable safeguard against infection, as a stimulus to appetite and as a nutrient tonic during all phases of rapid growth, Ostomalt is a most valuable aid. In addition to malt extract and concentrated orange juice, Ostomalt contains glycerophosphates and measured amounts of the therapeutically important vitamins A and D. There is no fishy oil in Ostomalt and no useless bulk; teaspoonful doses suffice. The 'completeness' of Ostomalt together with its pleasant orange flavour are decisive advantages when prescribing for children and convalescents. A regular daily dose is a material aid to the growth of healthy tissue and a firm defence against relapse.

★ A successful treatment for CHILBLAINS

In 1942 research was carried out to try and determine what effect various kinds of work and conditions had on the prevalence of chilblains. Over 3,000 women between the ages of 20-40 were questioned.

While therapeutics were no particular part of the investigation, one special ointment was given a trial in various parts of the country. Medical Officers reported that, under the influence of this ointment, pain from chilblains was alleviated and rapid healing was general. Some of the reports said that the ointment was the best remedy yet produced (see 'Lancet' Nov. 9th, 1946).

At this time of the year many of your patients will doubtless complain of pain, irritation, and sometimes misery caused by chilblains, and the Perivale Laboratories therefore have prepared Perivale Chilblain Ointment made according to the formula of that used in the 1942 research. It consists of: Phenol 1%, Camphor 6%, Balsam of Peru 2%, Paraffin and Lanoline base to 100 parts by weight. It is advised that the affected parts be immersed in hot water at bedtime, dried carefully and the ointment applied, or that the ointment be rubbed in night and morning.

A trial sample will willingly be sent to you on request.

APPOINTMENTS

HIS MAJESTY'S COLONIAL SERVICE COLONIAL MEDICAL SERVICE

The Colonial Medical Service offers an interesting career and provides unique opportunities for applying medical science in territories which are undergoing rapid development. There are immediate openings in many parts of the Colonial Empire and applications are invited from both men and women doctors who are British subjects and possess qualifications registrable in the United Kingdom. Medical Officers are usually appointed in the first instance for general duties. This implies all-round ability with a balanced outlook upon both preventive and curative medicine. Officers are also required for public health duties, in which case the D.P.H. or some experience of health work is necessary. Ample opportunities exist for field investigation, while officers with special aptitude are encouraged to obtain such higher qualifications as will enhance their value to the Service. Officers are from time to time seconded or appointed to medical laboratories in the larger territories. In the West African territories improved salary scales and conditions of service have recently been introduced. In most of the other territories the terms of service are being actively reviewed, and meanwhile temporary cost-of-living allowances are being paid over and above the existing salaries. At present initial *basic* salaries, i.e. irrespective of any cost-of-living allowance and of any credit that may be allowable for war service or professional experience, vary between £600 and £925 according to locality. There are, in addition, numbers of super-scale posts in the administrative and specialist grades which are normally filled by promotion within the Service. Free passages for an officer and wife are generally provided both on first appointment and when travelling on leave of absence. Where Government quarters are provided a small rent is usually payable. Good leave conditions and an adequate pension scheme are in force. The Colonial Medical Service is a unified service and members are eligible for transfer from one territory to another, either with or without promotion. Selected candidates may be required to take a course in tropical medicine either before proceeding overseas (in which case they would receive an allowance) or on first leave. Candidates for permanent service must have been born on or after January 1, 1907. Contract appointments are also available in certain territories for doctors born before this date. Further particulars may be obtained from, and applications should be addressed to, the Director of Recruitment (Colonial Service), Colonial Office, 15, Victoria Street, London, S.W.1.

BOROUGHES OF STALYBRIDGE AND DUKINFIELD JOINT MEDICAL OFFICER OF HEALTH

Applications are invited from registered medical practitioners, including those serving in H.M. Forces, for the permanent appointment of Medical Officer of Health for the two Boroughs. The salary will be at the rate of £960 per annum, rising by three annual increments of £50 to a maximum of £1,110 per annum, plus cost-of-living bonus. Applicants must be registered in the Medical Register as holders of a Diploma in Sanitary Science, Public Health, or State Medicine. The appointment will be subject to the Sanitary Officers' (Outside London) Regulations, 1935, and the person appointed will be required to undertake the performance of all duties imposed upon a Medical Officer of Health by statute and by any orders, regulations or directions from time to time made or given by the Minister of Health, to whose approval also the appointment will be subject, and to any by-laws or instructions of the Councils. It is probable that the successful applicant will also be appointed at an increased salary as Divisional Medical Officer under the Cheshire County Council's Scheme (of which the two Boroughs form exclusively one Division) under the National Health Service Act, 1946. Applicants should possess experience in school medical work, and the successful candidate will not be permitted to engage in private or consultant practice. Every effort will be made to provide the successful applicant with housing accommodation. The appointment is subject also to the Local Government Superannuation Act, 1937, and the successful candidate will be required to pass a medical examination for that purpose. Further particulars of duties, conditions of appointment, and form of application may be had on application to the undersigned, and applications, marked "Medical Officer of Health," accompanied by copies of not more than three recent testimonials, must be sent to the undersigned not later than February 14, 1948. Canvassing will disqualify.—H. D. Elston Macvittie, Town Clerk Stalybridge, Town Clerk's Office, Stalybridge.

Junior Fellowships are normally of the annual value of £600 for three years, but candidates younger than those usually elected or whose promise for Medical Research must be judged mainly on work outside that field may be awarded a lower rate of £500 for the first two years. Candidates are asked to state whether they would be unable to accept this lower rate. Candidates must have taken a degree in a faculty of a University in the British Empire or a Medical Diploma registrable in the United Kingdom. Election to Junior Fellowships are rarely made above the age of thirty-five years. The Trustees are desirous of furthering research in Mental Diseases and in the general allotment of Fellowships will give some preference to a candidate proposing research on approved lines in that subject. Applications from candidates must be received by May 14. It is necessary for candidates to submit evidence that they can be given accommodation in the departments where they propose to work, which must be either in Great Britain or Ireland. Forms of application and all information may be obtained by letter only, addressed to: Dr. A. N. Drury, C.B.E., F.R.S., Secretary, Beit Memorial Fellowships for Medical Research, Lister Institute, Chelsea Bridge Road, London, S.W.1. For Overseas candidates, forms of application may be obtained from: The Secretary, South African Medical Council, P.O. Box 205, Pretoria, South Africa. The Secretary, Universities Commission, Box 4061, G.P.O., Sydney, Australia. The Department of Health, Wellington, New Zealand. The Canadian Medical Association, 184, College Street, Toronto, Canada.

EDINBURGH POSTGRADUATE BOARD FOR MEDICINE

OBSTETRICS AND GYNAECOLOGY
A four weeks' course in Obstetrics and Gynaecology has been arranged for July 19 to August 13, 1948. It will be conducted in the Edinburgh Royal Infirmary and the Simpson Memorial Maternity Pavilion by the Senior Staff and the Clinical Teaching Staff, and will consist of approximately 80 hours lectures, operating sessions, clinical work and pathological demonstrations. The class will be limited to a minimum of 12 and a maximum of 20. Only those with considerable postgraduate experience in Obstetrics and Gynaecology should apply as the course is intended for those wishing to specialize and is not a General Refresher Course. Fee 20 guineas.

INTERNAL MEDICINE

The course lasting 12 weeks, suitable for graduates wishing a refresher course, or to specialize in Medicine, which begins on Monday, April 12, 1948, is full. A similar class commences on October 4, 1948. These courses consist of 300 hours' instruction comprising lectures, clinical demonstrations and ward visits. Fee 35 guineas.

GENERAL SURGERY

The five months' course of Postgraduate Surgery arranged to start on Monday, March 29, 1948, is full. A similar course will begin on Monday, October 18, 1948, and is suitable for surgeons requiring a refresher course in the current outlook on General Surgery, or for graduates preparing to specialize in Surgery; approximately 280 hours of instruction are provided. Fee 35 guineas.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

The Twelfth General Fortnight Refresher Course, primarily for demobilized Medical Officers (Class II) and for Insurance Practitioners, will commence at 9 a.m. on Monday, May 3, 1948. 20 hours are devoted to lectures covering a wide range of subjects, with emphasis on recent advances in treatment. 50 hours are allotted to clinical demonstrations and ward visits. A similar course may be held in September, 1948. Fee for graduates not claiming expenses from Government sources, 10 guineas.

PAEDIATRICS AND OPHTHALMOLOGY

Short courses of instruction in Paediatrics and Ophthalmology are run in conjunction with the courses in Medicine and Surgery. They are primarily intended for those who wish additional experience in these subjects. A small fee is charged and the numbers are limited.

Applications for enrolment to Director of Postgraduate Studies, University New Buildings, Edinburgh, 8. Applicants for courses in Obstetrics and Gynaecology, Internal Medicine and Surgery, should supply particulars of qualifications and postgraduate experience.

Infant Feeding— The Logical Approach

Nature has provided for the human infant a milk of specific composition and having clearly defined characteristics. Consequently, it is logical to conclude that a satisfactory substitute for human milk should conform as closely as possible to the nutritional standard of breast milk. It is this rational principle which governs the manufacture of Humanised Trufood.

	Protein	Fat	Lactose
HUMAN MILK	1.3	3.4	6.9
HUMANISED TRUFOOD	1.6	3.4	6.5

PROTEIN The composition of the protein of Humanised Trufood is adjusted to approximately an equal ratio of casein and soluble protein.

FAT The fat is presented in the form of a finely diffused emulsion.

LACTOSE Lactose is the only carbohydrate present and forms 50/55% of the total solids.

DEHYDRATION The Powder is produced by the spray process and on reconstitution with water, presents the closest possible approximation to human milk.

1 OZ. OF POWDER PROVIDES:—			
0.3 mg. Iron	600 I.U. Vitamin A		
150 mg. Calcium	320 I.U. Vitamin D		
150 mg. Phosphorus			
146 Calories
