Plan for Saving

Decide how much you want to save in a year. Divide the total by twelve. Sign a Banker's Order Form instructing your bank to buy this amount of National Savings for you every month. The Bank will do the rest free, and without putting you to any more trouble.

You can make a single purchase of Savings Certificates or invest a regular monthly sum in this way. In ten years' time each 10/- Certificate becomes 13/-. With Income Tax at 9/-, that's an increase equal to a taxable yield of £4.16.8 per cent. If you are paying more than 9/- in the £ the investment is even more attractive.

You can hold 1,000 Units of the new Savings Certificates in addition to holdings of Certificates of earlier issues. Ask your Bank for an Order Form.

THE FIRST YEAR OF LIFE

FOR SUCCESSFUL INFANT NUTRITION

At no other stage is the correct nutrition of the infant more important than in the first year of life. Breast feeding, if possible, remains the unchallenged method of laying this foundation of health. But if natural feeding fails, Cow & Gate Milk Foods provide a reliable and dependable substitute.

HALF CREAM

When foods other than breast milk are first introduced, some children require a reduced fat intake. In a smaller number of cases it is advisable to continue with the low fat content for several months. The half cream food, which contains the same vitamin and iron supplements as the full cream variety, has this reduction of fat with an addition of carbohydrate in the form of milk sugar.

FULL CREAM

This product conforms approximately to the fat content of average breast milk, and is prepared from finest quality milk powder made by the Cow & Gate Improved Roller Process, under scientifically controlled conditions.

It contains 320 International Units Vitamin D and 1 milligram of Iron per ounce.

COW & GATE MILK FOODS

Particulars of these and other Cow & Gate preparations for specialised infant feeding will be gladly forwarded on request.

Here we introduce

THE NEW MODEL IX ALPINE SUN LAMP

This is the new model for ultra-violet ray therapy (general body irradiation). It incorporates so many points of technical and mechanical excellence that it almost calls to be depicted in the transatlantic or St. Sebastian manner—with arrows directed to all the vital spots. As a practitioner, however, you will be more interested in what you could accomplish with the lamp for your patients. With this Alpine Sun you would be equipped to have 'the most vitalizing of all measures' administered under your own direction and supervision. You would be able to build resistivity and develop reactive capacity, assisting other forms of treatment. And you would be applying this protean therapy in the most effective and economical manner possible,

M159/1

for whilst the cost of this unit is moderate, no better lamp can be bought at any price. Just write for our leaflet M159.

Ribena therapy in infective diseases

In all acute febrile illnesses the bodily demand for vitamin C is greatly increased and should be met by an extra-dietary supply. Extensive experimental work has led to the view that the vitamin plays a vital rôle in the defence mechanisms of the body, though its exact mode of action has not yet been elucidated. In diphtheria, scarlet fever, rheumatic fever and puerperal fever, Ribena is particularly indicated, its glucose content being of advantage as a cardiac stimulant.

Ribena Blackcurrant Syrup is also particularly apposite to conditions of high temperature since it can be administered, suitably diluted, as a cooling drink.

With its standardised content of not less than 20 mg. ascorbic acid per fluid ounce, the physician can be assured of a satisfactory vitamin C intake; plus the lesser known factors associated with the vitamin in its *natural* form.

Casualties in circumstances of this sort frequently call for ophthalmic surgery.

One of the most suitable anaesthetics in use for eye surgery is Soluble Thiopentone, given as a total anaesthetic by intravenous injection. The eyes remain fixed and after-sickness is negligible.

Soluble Thiopentone has other important advantages — ease of administration, ease of portability, quiet respiration, non-inflammability. It is usually given intravenously, but may be administered *per rectum* as a basal anaesthetic.

Soluble Thiopentone is a mixture of 100 parts by weight of the mono-sodium derivative of 5-ethyl-5-(1-methylbutyl)-thiobarbituric acid, and 6 parts by weight of exsiccated sodium carbonate.

Vitamin Therapy - its uses and limitations

Safeguarding diet in pregnancy

During the last three months of pregnancy the foetus acquires 70 per cent. of its total bodyweight, two-thirds of its calcium phosphate, three-quarters of its protein and four-fifths of its iron. This partly accounts for the greatly increased nutritional demand of this period. Failure to supply any of these may result in severe depletion of the mother.

Further, a shortage of vitamin D may interfere with the utilization of calcium and limitation in the supply of the factors of the B complex may induce metabolic disturbances and even, in some cases, give rise to toxæmia.

Pregnavite has been designed to meet the special needs of pregnancy.

PREGNAVITE A single supplement for safer pregnancy

The recommended daily dose provides :

vitamin A	2,000 i.u.	vitamin E	1 mg.	iodine	not less
vitamin D	300 i.u.	nicotinamide	25 mg.	manganese	than 10
vitamin B ₁	0.6 mg.	calcium	160 mg.	copper	p.p.m. each
vitamin C	20 mg.	iron	68 mg.

I-SO-GEL, a granular preparation of certain dried mucilaginous seeds, has the property of reproducing the normal stimulus to intestinal peristalsis by increasing the intestinal bulk, through absorption of water in the alimentary canal.

I-SO-GEL contains no purgatives and is a purely natural laxative with a smooth mechanical action, specially suitable for the constipation of diabetes.

It is valuable also in mucous colitis, dysentery, hæmorrhoids, and intestinal flatulence. After the performance of colostomy, I-so-gel gives excellent results by solidifying the fæces.

successful radiography

of the uterus and adnexa

In radiological diagnosis of pathological conditions of the uterus, fallopian tubes and the ovaries, considerable progress has been achieved by the use of Pyelosil 50,* a valuable and safe radiographic contrast medium (normally employed in pyelography). Pyelosil 50 readily reaches the organs to be examined and presents shadows of high density for an adequate period. It has the added advantage of being free from local irritant effect, is rapidly absorbed after the examination, and is eliminated completely in the urine. Examination can be carried out without pain and with a minimum of discomfort.

Solution of Diodone. Ampoules: 20 cc. and 5 x 20 cc.

* Pyelosil is also available in 35% and 70% concentrations for specialist purposes.

THE ANTI-PYOCYANEA COMPOUND

HERE is an important new bactericide and antiseptic. Phenoxyetol (Nipa) is B-phenoxethyl-alcohol, specially purified and standardised, for use in medical treatment and for pharmaceutical preparations.

Phenoxyetol is effective against certain gram-negative organisms, including *Ps. pyocyanea*. It is used by local application in the treatment of infected wounds . . . abscesses . . . indolent ulcers . . . associated with *Ps. pyocyanea*. It should not be used for parenteral injections.

Phenoxyetol is very effective in pyocyanea infections of burns or superficial wounds. It is especially useful in the preparations of surfaces for skin grafting associated with *Ps. pyocyanea*, and may also be used together with Penicillin in solutions and creams.

MILD SILVER PROTEINATE B.P.C.

Mild Silver Proteinate is well known as an effective bactericide which can be applied in solution to mucous membranes without causing irritation or damage to sensitive tissues. Its clinical uses include the treatment of ophthalmic infections, vaginitis and urethritis, infections of the nose and throat, etc. The 'Avlon' product is characterised by its relatively low hygroscopicity and ease of solubility—factors which are particularly advantageous in the preparation of solutions.

'Avlon' brand Mild Silver Proteinate is issued in containers of 25 grammes.

AS THE TISSUES WEAKEN WITH THE YEARS

SECRETORY dysfunction and muscular atrophy of the senile intestinal wall result in:

1. **Inadequate mucinous lubrication** of intestinal contents. Agarol* provides replacement by colloidal agar-agar similar to natural mucin in its lubricant qualities.
2. **Inadequate peristalsis.** Agarol re-activates peristalsis. White phenolphthalein induces gentle stimulation sufficient to overcome intestinal atonicity.
3. **Inadequate moisture.** Faecal hardening in the colon is corrected by Agarol: delay is eliminated and a moist, well formed stool passed. Each tablespoonful of Agarol ensures the retention of 100 c.c. of water in the stool.

helps to reduce infant
skin irritations

Johnson's Baby Lotion is a smooth, snow-white, antiseptic lotion, an oil-in-water emulsion, homogenised under pressure to permit extreme dispersion. It leaves a *discontinuous* film on the skin, enabling perspiration to escape and thereby helping to prevent irritation. This also materially reduces the incidence of heat rash. Johnson's Baby Lotion has been subjected to extensive laboratory and clinical tests and has proved itself a big step forward in baby skin care.

APPOINTMENTS

HIS MAJESTY'S COLONIAL SERVICE COLONIAL MEDICAL SERVICE

The Colonial Medical Service offers an interesting career and provides unique opportunities for applying medical science in territories which are undergoing rapid development. There are immediate openings in many parts of the Colonial Empire and applications are invited from both men and women doctors who are British subjects and possess qualifications registrable in the United Kingdom. Medical Officers are usually appointed in the first instance for general duties. This implies all-round ability with a balanced outlook upon both preventive and curative medicine. Officers are also required for public health duties, in which case the D.P.H. or some experience of health work is necessary. Ample opportunities exist for field investigation, while officers with special aptitude are encouraged to obtain such higher qualifications as will enhance their value to the Service. Officers are from time to time seconded or appointed to medical laboratories in the larger territories. In the West African territories improved salary scales and conditions of service have recently been introduced. In most of the other territories the terms of service are being actively reviewed, and meanwhile temporary cost-of-living allowances are being paid over and above the existing salaries. At present initial basic salaries, i.e. irrespective of any cost-of-living allowance and of any credit that may be allowable for war service or professional experience, vary between £600 and £800 according to locality. There are, in addition, numbers of super-scale posts in the administrative and specialist grades which are normally filled by promotion within the Service. Free passages for an officer and wife are generally provided both on first appointment and when travelling on leave of absence. Where Government quarters are provided a small rent is usually payable. Good leave conditions and an adequate pension scheme are in force. The Colonial Medical Service is a unified service and members are eligible for transfer from one territory to another, either with or without promotion. Selected candidates may be required to take a course in tropical medicine either before proceeding overseas (in which case they would receive an allowance) or on first leave. Candidates for permanent service must have been born on or after January 1, 1908. Contract appointments are also available in certain territories for doctors born before this date. IN STRICT CONFIDENCE

A traditional feature of the relationship between Banker and customer is the confidence that each reposes in the other. The privileged information available to a Banker in a customer's account is always regarded as "Strictly confidential" and is never divulged to unauthorised persons. On the other hand if you need confidential advice on business matters you will find the Manager of any branch of Lloyds Bank ready to place his experience and specialised knowledge at your disposal.

DOCTOR!

MAKE SURE OF
YOUR NEW CAR!

In the difficult days, when basic petrol is suspended and a greater proportion of British made cars is destined for export, you should immediately register your new car requirements with us. This course will enable us to have the model you desire allocated to you at the earliest possible moment.

For the last twenty years our work has consisted of giving advice and service to the medical profession in connection with cars.

We are contracting agents for practically every leading make of British car, and in our hands your interests will be well served.
