A COMBINED POLLEN VACCINE
Indicated in

- SEASONAL HAY FEVER ● CORYZAL ASTHMA

Advances in the field of Allergy have shown that patients derive more benefit from treatment with a combined pollen vaccine than the more usually practised treatment with simple extract of Timothy Grass Pollen.

KAYLENE-OL

in Influenza

No treatment for influenza is complete unless attention is paid to the bowel, where stasis and toxic absorption may prolong the asthenia that so often remains long after the acute attack subsides.

Kaylene-ol is indicated for Gastric Influenza, also for influenza characterised by inflammation in the nose and throat with the inevitable ingestion of toxins and infected discharges.

Kaylene-ol acts as a gentle laxative, helps in the neutralisation of intestinal toxins and restores to the bowel its dynamic functions. Kaylene-ol also obviates post-influenzal depression.

The regular use of Kaylene-ol in the winter months is also one of the most effective methods of preventing colds, catarrhal conditions of the chest and intestinal toxæmia in association with asthma and chilblain circulation.

SevenSeaS is vitamins *plus*

Popular belief always credited Cod Liver Oil with nutritional values over and above those of the Vitamin A and D that it contains in abundance. Recent scientific research has justified an ancient belief in yet another specific direction.

Unsaturated fats (and Cod Liver Oil is more unsaturated than any other edible oil or fat) are often deficient in normal diets. They have special values in promoting general health and particularly the proper nutrition and health of the skin.

The method of preparation of SevenSeaS at sea from sea-fresh livers ensures that the delicate unsaturated fatty acids of the oil are presented in an undamaged and readily digestible form. A daily teaspoonful of SevenSeaS provides unsaturated fatty acids at the recommended minimum level of approximately 1% of the calorie intake.

Current rationing difficulties make the prescription of SevenSeaS of still greater value.

STANDARD OIL:

Vitamin A 20,000 I.U. ; Vitamin D 2,500 I.U. per oz.

CONCENTRATED:

Vitamin A 60,000 I.U. ; Vitamin D 6,000 I.U. per oz.

The **HECSON** SUPER ELASTIC TRUSS for the Treatment of Hernia

Strap is fixed to Pad at A.
Therefore greater pressure
is exerted at B, when the
strap is pulled tightly.

Where treatment of Hernia by surgical methods is undesirable for any reason, the HECSON super elastic truss can be confidently recommended. The Special Feature of the HECSON Truss is that the perineal or under strap is attached to the top of the pad instead of the lower margin as in the ordinary elastic or old spring truss. Thus it becomes part of the leverage mechanism for increasing the pressure of the pad at its base.

COMBINED PROTECTION WITH 3 INJECTIONS

By the use of 'Wellcome' brand Diphtheria-Pertussis Prophylactic D.P.P., children may be immunised against the two diseases in a course of three injections. The product contains Diphtheria Prophylactic A.P.T. plus Whooping Cough Vaccine (Alum Precipitated). Immunisation with 'Wellcome' Diphtheria Prophylactic A.P.T. has markedly reduced the incidence of and mortality from diphtheria. Although Whooping Cough Vaccine does not confer a degree of immunity comparable with that induced by diphtheria prophylactics, wide experience amongst clinicians indicates its value in reducing the incidence and severity of the disease.

- It does not produce alkalisation nor a condition of alkalosis

ALOCOL CREAM is supplied in bottles of 9 fl. oz.

The general action of Bynin Amara is manifested by increased tone of the nervous, muscular, and cardio-vascular systems. It stimulates the digestive organs, improves the flagging appetite, corrects anæmia, and aids nutrition generally.

The marked asthenia and nervous depression which are prominent features of the post-influenzal state yield rapidly to its influence. Whenever there is any indication of lowered resistance a course of Bynin Amara is a valuable safeguard against infection.

Vitamin Therapy—its uses and limitations

In pursuit of protein

So accustomed have we become to thinking of Bemax mainly as a rich natural source of the vitamin B complex that its high protein content is not always fully appreciated.

Compare, for example, the *protein* content of bacon and Bemax. The 2-oz. bacon ration should provide, in a week, about 6.2 grammes of first-class protein. One daily tablespoonful of Bemax will provide, in the same period, more than 30 grammes of *first-class* protein.

For those who are able to supplement their diet with Bemax no lowering of the protein intake need occur.

The CONTROL of BILIARY FLOW

Pathological conditions where there is evidence of an insufficient and impeded flow of bile call for treatment which maintains its movement and keeps cholesterol in solution.

Relief of biliary stasis is aided by Veracolate, which contains the combined bile-salts—sodium taurocholate and glycocholate—together with cascara, phenolphthalein and capsicum. Veracolate stimulates emptying of the gall-bladder and increases both the volume of bile secreted and its bile-salt concentration.

FOR WEIGHT REDUCTION

'Dexedrine' is perhaps the most effective of the therapeutic agents available for controlling appetite. It successfully inhibits the desire for food while sparing the patient the discouragement and irritability which often accompany adherence to a low-calorie diet.

The use of 'Dexedrine' makes unnecessary the administration of potentially dangerous preparations such as thyroid. Eminently satisfactory weight loss can be achieved — safely and surely — with 'Dexedrine' alone.
