

For the Disabled and the Infirm

THE ability to get about, to maintain daily interests and social contacts, plays an important part in the continued health and happiness of the disabled and the infirm. For this purpose the NELCO "SOLOCAR" is ideal. Electrically driven; silent, vibrationless and free from fumes; operated with one hand—effortlessly and without strain—it climbs any hill, travels forty miles without re-charging, passes through most doorways, turns in its own length.

*Enquiries for the new post-war models can now be received.
A fully detailed and illustrated brochure will shortly be issued.*

Pediculosis capitis (head lice) is best prevented by a DERBAC SOAP shampoo

As a safeguard against infestation regular shampooing with Derbac Soap is recommended to keep the hair healthy, clean and in glorious condition. If infestation has already taken place, the disinfectant action of 'Derbac', and combing with the Derbac Comb, will remove all parasites. Derbac Soap 9½d. and 1/6d. per tablet. Derbac Comb 3/6d.

IN SEVERE CASES OF INFESTATION

LIQUID DERBAC, a D.D.T. emulsion, is efficient. One application only is necessary and eradication is complete within the hour. Non-toxic and non-irritant. 2 oz. bottle 1/8d.

Economics v Gastronomics

Napoleon's alleged statement that an army marches on its stomach loses none of its aptness when used in connection with today's economic situation, and the strenuous efforts to reach the export target set by the Government.

It is shown as much by the Food Minister's maintenance of higher rations for manual workers as it is by the efforts of various sections of industry to obtain more.

Yet workers, pressing their claims for an extra twopennyworth of meat or sixpennyworth of cheese, do not all realise that it is not bulk alone that supplies motive force. As carefully recorded tests have shown, one essential factor in stepping up the activity of brain and muscle is a sufficiency of vitamin C.

The fast worker who has now "slowed-up" might not be undernourished in the accepted sense of the word. But it is conceivable that the inclusion of a sufficiency of vitamin C in his diet would show a marked improvement in his ability to work up to standard.

It has been proved that this valuable vitamin has fugitive habits, and in storing, cooking and warming-up of green vegetables and potatoes, much of its value is lost. Greater recognition is thus being given to the home-grown black-currant, and, in consequence, to Ribena Black-currant Syrup.

Ribena affords such an excellent supplementary intake of vitamin C that the Health Ministry have given priority to prescriptions, expectant and nursing mothers, invalids, infants and growing children. For the same reason Ribena is being prescribed, not only in industry but also by doctors in private practice, in cases where diagnosis shows a vitamin C deficiency, e.g., peptic ulcer and various febrile conditions.

INCREASED PREVALENCE OF HYPERACIDITY

One legacy of war-time strain persists. It is evidenced by the number of patients exhibiting symptoms of gastrointestinal disorder.

The same stress factors of overwork, hurried, irregular meals and the inability to relax completely still prevail.

In such instances, 'Milk of Magnesia' is invaluable in securing rapid control of discomfort. A colloidal suspension of magnesium hydroxide, it soothes the inflamed mucosa, and neutralizes the excess acid, without liberation of gas. Furthermore, its mild laxative action ensures removal of toxic waste products.

'Milk of Magnesia' may be prescribed with confidence equally in the mild case of dyspepsia or the acute ulcer stage, where sustained alkaline treatment is essential.

Milk of Magnesia' contains approximately 8.45% Magnesium Hydroxide in colloidal suspension.

SYMPTOMATIC RELIEF OF INFLUENZA

An outstanding advantage of Veganin* is the rapidity of its action. In influenza, headache and muscular pain are promptly alleviated; the temperature is reduced; exhaustion and restlessness yield to its sedative influence. The distressing "influenzal cough" is relieved and beneficial sleep ensured. By conserving the patient's defensive energies, Veganin acts prophylactically against bronchial and pneumonic complications.

Infant Feeding— The Logical Approach

Nature has provided for the human infant a milk of specific composition and having clearly defined characteristics. Consequently, it is logical to conclude that a satisfactory substitute for human milk should conform as closely as possible to the nutritional standard of breast milk.

It is this rational principle which governs the manufacture of Humanised Trufood.

	Protein	Fat	Lactose
HUMAN MILK	1.3	3.4	6.9
HUMANISED TRUFOOD	1.6	3.4	6.5

PROTEIN The composition of the protein of Humanised Trufood is adjusted to approximately an equal ratio of casein and soluble protein.

FAT The fat is presented in the form of a finely diffused emulsion.

LACTOSE Lactose is the only carbohydrate present and forms 50/55% of the total solids.

DEHYDRATION The Powder is produced by the spray process and on reconstitution with water, presents the closest possible approximation to human milk.

1 OZ. OF POWDER PROVIDES:—

0.3 mg. Iron	600 I.U. Vitamin A
150 mg. Calcium	320 I.U. Vitamin D
150 mg. Phosphorus

To help vanquish depression associated with persistent pain

Many patients suffering from persistent pain are subject to attacks of depression characterized by deep apathy and emotional exhaustion. Thus, pre-existing neurotic tendencies may be exaggerated and the pain threshold progressively lowered. By restoring morale and optimism, 'Benzedrine' Tablets will often effectively combat the depression which may complicate the management of painful conditions.

Anaemia caused by lack of iron is seen in day to day practice more often than any other condition due to nutritional defect. Iron in the most effective form—ferrous iron—provides the rational, straightforward treatment. Fersolate, the tablet preparation of ferrous sulphate with traces of copper and manganese, is widely used for combating the iron deficiency anaemias. Haemoglobin regeneration occurs at a daily rate of one to two per cent—usually from a dose of 3 Fersolate Tablets per day—and the patient's well-being is rapidly restored.

An Effective Analgesic

WHILE modern chemical research has evolved many and diverse analgesics, the popularity of acetylsalicylic acid and its reputation for effectiveness remain. Nevertheless, some physicians have hesitated to employ it owing to its tendency, in certain conditions, to irritate the stomach.

In "Alasil," however, the desirable therapeutic effects of acetylsalicylic acid are maintained, without the tendency to irritation, by combining the acid with Dibasic Calcium Phosphate and "Alocol" (Colloidal Aluminium Hydroxide), an effective gastric sedative and antacid. Thus "Alasil" helps to solve the problem of administering acetylsalicylic acid in an effective form, even to patients with sensitive stomachs.

The advantages of "Alasil" have been well proved in practice. Experience shows that it can be prescribed with safety to patients of all ages.

Each tablet contains 5 grs. Acetylsalicylic Acid, 6 grs. "Alocol" (Colloidal Aluminium Hydroxide), and 1½ grs. Dibasic Calcium Phosphate.

SevenSeaS is vitamins *plus*

Popular belief always credited Cod Liver Oil with nutritional values over and above those of the Vitamin A and D that it contains in abundance. Recent scientific research has justified an ancient belief in yet another specific direction.

Unsaturated fats (and Cod Liver Oil is more unsaturated than any other edible oil or fat) are often deficient in normal diets. They have special values in promoting general health and particularly the proper nutrition and health of the skin.

The method of preparation of SevenSeaS at sea from sea-fresh livers ensures that the delicate unsaturated fatty acids of the oil are presented in an undamaged and readily digestible form. A daily teaspoonful of SevenSeaS provides unsaturated fatty acids at the recommended minimum level of approximately 1% of the calorie intake.

Current rationing difficulties make the prescription of SevenSeaS of still greater value.

When patients need more VITAMIN C

In the many cases where supplementary Vitamin C is called for, Rose Hip Syrup is an excellent choice. It is extremely palatable, simple to administer, and is readily tolerated by patients of all ages.

Scott & Turner's Rose Hip Syrup provides an ample intake of Vitamin C in all scorbutic and sub-scorbutic conditions—loss of weight, proneness to infection, anorexia and disordered blood picture. It is made from freshly-gathered rose hips which are exceptionally rich in ascorbic acid, and is prepared in accordance with the Ministry of Health standard (200 mgs. ascorbic acid per 100 mls.).

With its added sugar syrup, Scott & Turner's Rose Hip Syrup is pleasantly sweet. It may be given undiluted, or diluted with water or milk; or added to porridge, cereals and milk puddings. A dessertspoonful contains approximately 25 mgs. ascorbic acid. From chemists only, 1/9 per 6-oz. bottle.

SUGGESTING a suitable diet for the patient recovering from illness or suffering from some form of gastric disorder can be a difficult problem under present conditions. Here Inglis Food is particularly helpful. Inglis is a highly nutritious oat food fortified with Iron, Calcium, Phosphorus, Vitamins D and B₁. When combined with milk, Inglis Food establishes a desirable balance of fat and protein, and so protein stimulation of excess acid is avoided. Unlike many other cereals, Inglis Food is bland with a very low fibre content (0.20%). The fine processing of the flour removes this irritant. Inglis is an economical food: a 16-oz. tin costs 2/-.

THE PRACTITIONER'S CARD-INDEX GUIDE TO TREATMENT

Prepared and edited by medical specialists
experienced in medical publishing

The System that Never Grows Old

This system of treatment is unique in that the rapid advances in medical knowledge will never render it out of date.

The wide range of modern medical treatment is covered in a card-index eminently suitable for the physician's desk.

The subject matter is revised every three months, under the supervision of a Board of medical specialists, in the light of the latest world's medical literature, and practical experience.

These quarterly revisions can be incorporated in the Index in a few moments.

One complete Index, with an addendum comprising a useful list of modern Pharmaceutical specialties, is supplied in a handsome plastic cabinet. The initial cost of £5 5s. includes the first four quarterly replacements. Subsequently the cost of the replacement service is £2 2s. per annum.

The anticipated effects of glucose as an energiser and restorer are to some extent lost if the patient shows a degree of unwillingness to accept it.

But the common aversion to the sickly, sometimes nauseating, taste of glucose in many of its ordinary forms is strikingly absent whenever LUCOZADE is offered.

LUCOZADE is so palatable, so refreshing, that neither children nor adults ever need urging to take it as prescribed.

(Containing Dextrose, Maltose and Dextrin in solution equivalent to 23% w/v Liquid Glucose B.P.)

DIVISIONAL ADMINISTRATION OF PREVENTIVE MEDICAL SERVICES IN THE ADMINISTRATIVE COUNTY OF THE WEST RIDING OF YORKSHIRE

JOINT APPOINTMENT OF DEPUTY MEDICAL OFFICERS OF HEALTH AND DEPUTY DIVISIONAL MEDICAL OFFICERS

To the Kirkburton, Meltham, Denby Dale, Holmfirth and Colne Valley Urban District Councils and the West Riding County Council
To the Maltby Urban, Kiveton Park Rural and Rotherham Rural District Councils and the West Riding County Council

The Deputy Medical Officer of Health will work under the direction of the Divisional Medical Officer, who is responsible for the day to day administration and execution of all, or practically all, public health matters in the Division, and the post is suitable for medical officers who hold the Diploma in Public Health and who wish to get some administrative experience in the public health services. The salary attached to the post is at present £650 to £850 plus cost-of-living bonus according to the County Council Scale, in respect of the duties to be carried out as Assistant County Medical Officer, and with an additional £100 per annum in respect of the duties of Deputy Medical Officer. The modification of the Interim Revision of the Askwith Memorandum is under consideration. Travelling and subsistence allowances are in accordance with the County Council Scales. The appointment will be subject to the provisions of the Local Government Superannuation Act, 1937, and to the successful candidate passing a medical examination as to his physical fitness. Forms of application may be obtained from the undersigned and should be forwarded to the County Medical Officer, Public Health Department, County Hall, Wakefield, not later than March 31, 1948.—Fraser Brockington, County Medical Officer.

DIVISIONAL ADMINISTRATION OF THE PREVENTIVE MEDICAL SERVICES IN THE ADMINISTRATIVE COUNTY OF THE WEST RIDING OF YORKSHIRE

MEDICAL OFFICER OF HEALTH AND DIVISIONAL MEDICAL OFFICER

to Thorne Rural District Council and the County Council of the West Riding of Yorkshire

Applications are invited from registered medical practitioners who must also be registered in the medical register as the holder of a Diploma in Sanitary Science, Public Health or State Medicine, for the above-mentioned whole-time appointment. The effect of the joint appointment will be to secure that the planning day to day administration and execution of all, or practically all, public health matters of the division will be in the hands of one person, the Medical Officer of Health locally. A divisional public health office with necessary staff will be provided. There are to be 31 such divisions within the Administrative County. The salary attached to the post is £1,200 per annum plus cost-of-living bonus according to the County Council Scale, advancing subject to satisfactory service, by annual increments of £50 to a maximum of £1,350 per annum. In addition there will be a travelling and subsistence allowance of £100 per annum. The appointment will be made jointly by the District Council and the County Council, and the person appointed will not be permitted to engage in private practice and will be required:—

(a) to reside in the Thorne Rural District or within such distance therefrom as may be approved.

(b) As Medical Officer of Health of the Thorne Rural District to act under the control and direction of the district council, and to perform all the duties imposed on a Medical Officer of Health by the relevant Acts and Orders.

(c) As Divisional Medical Officer, to act as Administrative Officer for County Council Services including Child Welfare and School Medical Services in the same district for which he is Medical Officer of Health.

(d) To undertake such other duties, not being incompatible with the above, as the Councils may jointly decide upon.

The appointment will be subject to the provisions of the Local Government Superannuation Act, 1937, and to the successful candidate passing a medical examination as to his physical fitness. Forms of application and terms and conditions of service may be obtained from Dr. Fraser Brockington, County Medical Officer, County Hall, Wakefield, to whom completed forms must be delivered not later than March 31, 1948. Applications are invited from medical practitioners at present serving in H.M. Forces. Canvassing of members of the appointing bodies, directly or indirectly, will disqualify any candidate for the appointment.—P. Lambert, Clerk to the Thorne Rural District Council; Fraser Brockington, County Medical Officer.

DOHME

Quicker acting, more penetrating and more stable than penicillin is Tyrothricin, the antibacterial principle of 'Prothricin' Antibiotic Nasal Decongestant. Applied locally, Tyrothricin promptly attacks bacteria, and its low surface tension promotes penetration of tissue crevices and mucosal folds.

Moreover, Tyrothricin maintains antibiotic efficiency even in the presence of pus or mucus, and since (unlike penicillin) it is sparingly absorbed, local activity is prolonged.

In addition to Tyrothricin (0.02%), 'Prothricin' Antibiotic Nasal Decongestant contains an effective vasoconstrictor, 'Propadrin' hydrochloride (1.5%), to help re-establish normal drainage without the unpleasant side-effects characteristic of ephedrine and its analogues.

Isotonic with normal nasal secretions, buffered in the physiological pH range of 5.5—6.5, 'Prothricin' decongestant is clear and free-flowing, does not impair ciliary function, and (unlike sulphonamide suspensions) does not form mucosal crusts that may block drainage.

Finally, 'Prothricin' Antibiotic Nasal Decongestant is stable, retaining full antibacterial potency indefinitely at room temperature. This unique preparation is indicated in the local treatment of sinusitis, rhinitis, coryza and nasal congestion.

Supplied in 1-ounce, dropper-assembly bottles.

REFRESHED · RESTORED · REVITALISED

'Tabloid' Cyclobarbitone is the ideal barbiturate for routine sedation. It induces sleep within one-half to one hour, after which its hypnotic action rapidly diminishes and is replaced by a state of *natural* sleep. The patient awakes refreshed and free from the "hang-over" effects commonly produced by soporific drugs.
