# Aci-jel FOR VAGINITIS

Investigators<sup>1, 2, 3</sup> characterize a buffered acid jelly as one of the simplest and most direct forms of effective therapy in vaginitis and cervicitis.

Clinically, the re-establishment of a normal vaginal pH (4 to 4.5) proves "extremely useful,"<sup>4</sup> because it encourages "the elimination of pathologic organisms and the

growth of normal vaginal flora consistent with the healthy vagina."<sup>5</sup>

Aci-jel affords the physician a water-miscible, buffered acid jelly which is entirely non-irritant and may be used with safety over prolonged periods. It is available in 3½ oz. tubes, with or without measured applicator, for professional use or prescription.

Hepolon is produced by special processes which conserve all the known haematopoietic principles of the whole liver. It approximates to the extract described by Gänssler.

Hepolon not only passes the highest clinical tests for potency against pernicious anaemia but contains Whipple's factor, Wills's factor, riboflavine, nicotinic acid, and the haematinic minerals of liver; it gives no reactions for histamine or undesirable protein matter.

Amponules of 2 c.c.: box of 6, 6/-, box of 12, 11/6, and box of 24, 22/-  
Rubber-capped vial of 10 c.c., 5/-, and of 30 c.c., 12/6.

# Getting down to fundamentals

The initial success of folic acid in macrocytic anaemias has been followed by similar remarkable results when the substance is given with iron in the form of 'FOLVRON,' Folic Acid and Iron, Tablets. 'FOLVRON' supplies in readily absorbable form the haematinic fundamentals, folic acid—the maturation factor for red cells (or its immediate precursor), and ferrous iron—principal building stone of haemoglobin. It is therefore valuable not only in primary (macrocytic) anaemias, but also for the many so-called secondary anaemias, met with in every-day practice—particularly those showing a marked iron deficiency.

## Keynote -

### - TO SUCCESSFUL ARTIFICIAL FEEDING

*Simplicity is the keynote to artificial feeding*

1. COW & GATE FULL CREAM MILK FOOD provides a simple and highly satisfactory basis for general infant feeding.
2. It is prepared by the Special C. & G. Roller Process which ensures the absence of pathogenic organisms and reduces the total count to less than 150 per millilitre.
3. Cow & Gate Full Cream Milk Food IS FORTIFIED BY THE ADDITION OF 320 I.U. VITAMIN D and 1 mgm. of iron as ferri et amm cit per oz.
4. The only carbohydrate present is the natural lactose found in cows' milk.
5. The proportions of Fat, Protein and Carbohydrate are 3.4, 3.3, 4.7.
6. Clinical tests and practical usage over a considerable period of time have proved it most satisfactory in infant nutrition.

★ Particulars of this and other Cow & Gate preparations for specialized infant feeding will be gladly forwarded on request.

## WELL-LEG TRACTION

### Using Gypsona P.O.P. Bandages

MARCH 6TH. — Patient aged 66, sustained transtrochanteric fracture of the left femur. (Fig. 1.)

MARCH 6TH. — Fracture reduced and fixed in modification of the well-leg traction technique. Using Gypsona, a snug-fitting plaster casing was applied and anchored to the uninjured leg (Fig. 3). X-ray showed good reduction, which was maintained satisfactorily without need for any change of plaster during the two months in which it was retained.

APRIL 30TH. — X-ray examination showed good position and good callus formation proceeding (Fig. 2).

COMMENT. This method obviates the necessity for pins transfixing the heel or tibia, it enables the patient to sit up in bed, and thus materially reduces the risk of hypostatic pneumonia and pressure sores. It is essential that during fixation of the cross struts the injured leg is pulled, and the well-leg pushed, so that the top of the plaster is firm against the tuber ischii.

These details and illustrations are of an actual case. T. J. Smith & Nephew, Ltd., of Hull, manufacturers of Gypsona P.O.P. and Elastoplast bandages, publish this instance — typical of many — in which their products have been used with success.

## DEEP DARK SECRET

Suffering in silence because of a natural reluctance to reveal any abnormal rectal condition, the patient with haemorrhoids is additionally inhibited by vague fears of major surgery and "the knife".

Having finally exposed his secret to the physician, the patient may frequently be spared further pain and discomfort by the use of Anusol\* Haemorrhoidal Suppositories.

Providing relief through their decongestive and lubricating qualities, Anusol Haemorrhoidal Suppositories diminish pain, lubricate the ano-rectal mucosa and discourage "fear retention" followed by straining.

## for implantation

Sex hormone administration by implantation has many advantages over oral or parenteral treatment in those cases in which continuous action of the hormone is desired.

The need for frequent injections is eliminated and the natural continuous secretion of hormone is more closely simulated than is possible from injection even of esterified hormones in oily solution.

B.D.H. Sex Hormone Products are available in pellets for implantation as follows :—

## THIOURACIL B.P.C. and METHYL THIOURACIL

In the Treatment of Thyrotoxicosis

The thyroid-depressant properties of Thiouracil and Methyl Thiouracil find useful application in the treatment of thyrotoxicosis and the pre-operative preparation of the thyrotoxic patient.

The administration of either substance by the mouth in cases of hyperthyroidism brings about an alleviation of nervous symptoms, a fall in basal metabolic rate, increase in weight and a general improvement in the clinical condition of the patient.

**DOSE:** Initially, a dose of 0.5-1.0 gramme daily, in divided quantities, is administered until clinical improvement is achieved. This is then reduced to a daily dose of 0.05-0.2 gramme and maintained at the lowest level compatible with the patient's well-being.

**PACKINGS:** Methyl Thiouracil and Thiouracil for oral administration are each issued in tablets of 0.05 gramme, 0.1 gramme, and 0.2 gramme, in containers of 100 and 500.

## Vasodilatation

There is considerable evidence of the outstanding value of Cardophylin in producing vasodilatation. The coronary vasodilatation is manifested in an increased coronary blood flow and a beneficial effect on the myocardium; the renal vasodilatation is indicated by the powerful diuresis. It also causes bronchodilatation.

By the use of 'Wellcome' brand Diphtheria-Pertussis Prophylactic D.P.P., children may be immunised against the two diseases in a course of three injections. The product contains Diphtheria Prophylactic A.P.T. plus Whooping Cough Vaccine (Alum Precipitated). Immunisation with 'Wellcome' Diphtheria Prophylactic A.P.T. has markedly reduced the incidence of and mortality from diphtheria. Although Whooping Cough Vaccine does not confer a degree of immunity comparable with that induced by diphtheria prophylactics, wide experience amongst clinicians indicates its value in reducing the incidence and severity of the disease.

In every language, 'A' and 'D' are momentous members of the medical alphabet. The maintenance of health and the re-establishment of well-being after illness are intimately linked with the state of vitamins A and D nutrition. During infancy and childhood these same nutritional factors, above all others, secure orderly growth and development. And, almost everywhere, Adexolin is synonymous with these two vitamins—the highly concentrated, refined preparation, acceptable even in the hottest climate. Adexolin Liquid is effective in drop doses: twelve drops daily for the baby . . . twenty drops for the adolescent . . . and up to sixty drops for the debilitated adult. Indeed, whatever the indication for additional vitamins A and D, Adexolin Liquid may be prescribed at the precise dosage to meet the patient's needs.

### AS SIMPLE AS THIS

**A**DDITION of a trace of Iodine to the salt we eat would at once make good the lack of iodine in our diet which is a proved cause of much ill health, low vitality and proneness to disease.

This simple remedy is urgently recommended by the Goitre Sub-Committee of the Medical Research Council

The Committee says: "If, as now seems apparent, it has proved possible during a long and exacting war to protect the health of the people by national measures against protein, vitamin and other deficiencies, it becomes difficult to discover valid reasons for withholding

this additional measure of protection."

#### IODIZED SALT IS AVAILABLE

Doctors who wish to introduce iodized salt to districts or institutions under their charge will find that there is no difficulty in obtaining supplies. It is available for hospitals, nursing homes, schools, restaurants, works' canteens, etc., as well as through shops. Iodized salt looks and tastes the same as ordinary salt and is made by a number of British salt manufacturers.

The Iodine Educational Bureau has collated all known facts on the uses of iodine. This information is available to members of the medical profession without charge.

### PROCESS OF HOMOGENIZATION

The distinctive and altogether scientific method by which Libby's Baby Foods are prepared, render them especially suitable for very young infants. First strained, Libby's Baby Foods are then homogenized, which accelerates the rate of digestion by the disruption of the cellular membranes and the exposure of intracellular nutrients to the digestive enzymes. The ready assimilability and tolerability in the gastro-intestinal tract of even extremely young infants, is clearly indicated in the weight gains so expressive of an infant's progress.

## APPOINTMENTS

### HIS MAJESTY'S COLONIAL SERVICE COLONIAL MEDICAL SERVICE

The Colonial Medical Service offers an interesting career and provides unique opportunities for applying medical science in territories which are undergoing rapid development. There are immediate openings in many parts of the Colonial Empire and applications are invited from both men and women doctors who are British subjects and possess qualifications registrable in the United Kingdom. Medical Officers are usually appointed in the first instance for general duties. This implies all-round ability with a balanced outlook upon both preventive and curative medicine. Officers are also required for public health duties, in which case the D.P.H. or some experience of health work is necessary. Ample opportunities exist for field investigation, while officers with special aptitude are encouraged to obtain such higher qualifications as will enhance their value to the Service. Officers are from time to time seconded or appointed to medical laboratories in the larger territories. In the West African territories improved salary scales and conditions of service have recently been introduced. In most of the other territories the terms of service are being actively reviewed, and meanwhile temporary cost-of-living allowances are being paid over and above the existing salaries. At present initial basic salaries, i.e. irrespective of any cost-of-living allowance and of any credit that may be allowable for war service or professional experience, vary between £600 and £800 according to locality. There are, in addition, numbers of super-scale posts in the administrative and specialist grades which are normally filled by promotion within the Service. Free passages for an officer and wife are generally provided both on first appointment and when travelling on leave of absence. Where Government quarters are provided a small rent is usually payable. Good leave conditions and an adequate pension scheme are in force. The Colonial Medical Service is a unified service and members are eligible for transfer from one territory to another, either with or without promotion. Selected candidates may be required to take a course in tropical medicine either before proceeding overseas (in which case they would receive an allowance) or on first leave. Candidates for permanent service must have been born on or after January 1, 1908. Contract appointments are also available in certain territories for doctors born before this date. Further particulars may be obtained from, and applications should be addressed to, the Director of Recruitment (Colonial Service), Colonial Office, 15, Victoria Street, London, S.W.1.

### NATAL PROVINCIAL ADMINISTRATION GREY'S HOSPITAL, Pietermaritzburg, Natal FULL-TIME OPHTHALMOLOGIST

# ALLANTOIN SULPHANILAMIDE

*Bacteriostasis PLUS*

'Genatosan' presents a unique range of Allantoin-Sulphanilamide preparations, for use by the surgeon and general practitioner.

Allantoin brings about chemical debridement of necrotic tissue, promotes tissue granulation and vascularisation, and exerts a synergistic effect with Sulphanilamide.

The combination of Allantoin and Sulphanilamide is a very valuable one, since not only is bacteriostasis achieved with Sulphanilamide, but attention is also attracted to the healing process.

**WRIGHT'S LIQUOR CARBONIS DETERGENS**

The antiseptic and antipruritic constituents in Coal Tar were isolated for the first time when Wright's introduced their active extract Liquor Carbonis Detergens over 80 years ago. This distinctive preparation has secured a prominent place as a medicament in treatment of skin diseases. It is specified repeatedly by leading dermatologists and is today, through constant research and the application of modern methods of manufacture, a better product than ever before, both in appearance and antiseptic value.

Wright's Coal Tar Soap, soothing to the tenderest skin, derives its health-protecting powers from this preparation.
