

## A Well Balanced Diet

The need for a well-balanced diet at all times cannot be over-emphasised, and in cases of sickness or convalescence it is clearly of primary importance. In addition to carbohydrates, proteins, fats and minerals, adequate amounts of the essential vitamins must be supplied.

Marmite is a yeast extract which contains naturally-occurring vitamins of the B<sub>2</sub> complex; it is ordered not only where there is a suspected deficiency of the B<sub>2</sub> vitamins but also as a useful prophylactic measure. It is easy to include Marmite in the diet as it can conveniently be added to soups, stews and savouries, or it may be spread lightly on bread and butter, or given simply as a clear soup made with boiling water.

## CONCENTRATED LIVER EXTRACT

HEPASTAB FORTE is a highly concentrated extract of liver which has been prepared in our Nottingham laboratories as the result of research conducted by our own chemists in co-operation with clinicians in this country and abroad. It contains all the known anti-anæmic factors of liver, is highly refined, painless on injection and highly concentrated. Each 1 c.c. of Hepastab Forte is obtained from 100 gm. of liver and is therapeutically equivalent to 4,000-5,000 gm. of fresh liver by the mouth.

Ampoules of 1 c.c.: single ampoules, boxes of 3, 6 and 12 ampoules. Rubber-capped vials of 10 c.c.

Spencer Abdominal Supporting Belt designed especially for this woman. Note the Spencer Breast Support also designed especially for her.

## A SPENCER Support In Postoperative Cases

- to improve muscle tonus
- to promote better body mechanics

Where support therapy is indicated following operation, a Spencer Support *individually designed* for the one patient who is to wear it, provides many important benefits.

For example, a Spencer provides compensation for weakened abdominal muscles without restricting natural muscle activity. Thus nature is aided in restoring tonus.

A Spencer induces spontaneous posture improvement by the correlated action of support to lower abdomen and back. Thus an unfavourable tilt of pelvis is modified.

Each Spencer Support is individually designed, cut and made at our Banbury Manufactory after a description of the patient's body and posture has been recorded—and detailed measurements have been taken.

BEWARE OF IMITATIONS. Spencer (Banbury) Ltd. regret the necessity of warning the medical profession that in a number of instances where doctors have specifically prescribed a Spencer Support, a belt or corset of another make has been substituted, and proved unsatisfactory. Every genuine Spencer Support bears the SPENCER label.

## Rutin in Capillary fragility

Rutin is a crystalline glycoside obtained from the leaves and flowers of buckwheat. Recent reports attribute to Rutin the property of reducing capillary fragility when this is abnormally raised.

In our research laboratories a limited quantity has been isolated from buckwheat grown in this country and is available in the form of tablets.

Rutin A & H is suggested for administration in haemorrhagic conditions due to increased capillary fragility or permeability, especially when this condition is associated with hypertension, nutritional deficiency or toxic effects of drugs.

## Infant Feeding— The Logical Approach

Nature has provided for the human infant a milk of specific composition and having clearly defined characteristics. Consequently, it is logical to conclude that a satisfactory substitute for human milk should conform as closely as possible to the nutritional standard of breast milk.

It is this rational principle which governs the manufacture of Humanised Trufood.

	Protein	Fat	Lactose
HUMAN MILK	1.3	3.4	6.9
HUMANISED TRUFOOD	1.6	3.4	6.5

**PROTEIN** The composition of the protein of Humanised Trufood is adjusted to approximately an equal ratio of casein and soluble protein.

**FAT** The fat is presented in the form of a finely diffused emulsion.

**LACTOSE** Lactose is the only carbohydrate present and forms 50/55% of the total solids.

**DEHYDRATION** The Powder is produced by the spray process and on reconstitution with water, presents the closest possible approximation to human milk.

## INCREASED PREVALENCE OF HYPERACIDITY

One legacy of war-time strain persists. It is evidenced by the number of patients exhibiting symptoms of gastro-intestinal disorder.

The same stress factors of overwork, hurried, irregular meals and the inability to relax completely still prevail.

In such instances, \*'Milk of Magnesia' is invaluable in securing rapid control of discomfort. A colloidal suspension of magnesium hydroxide, it soothes the inflamed mucosa, and neutralizes the excess acid, without liberation of gas. Furthermore, its mild laxative action ensures removal of toxic waste products.

'Milk of Magnesia' may be prescribed with confidence equally in the mild case of dyspepsia or the acute ulcer stage where sustained alkaline treatment is essential.

'Milk of Magnesia' contains approximately 8.45% Magnesium Hydroxide in colloidal suspension.

**NUTRITION**

WHEN the general nutrition of the body is below normal as a result of dietary errors or of debilitating diseases, the use of 'Ovaltine' is of greater and more lasting value than that of chemical stimulants. It adequately reinforces and renders safe the ordinary dietary; is a powerful source of energy and assists tissue regeneration.

A considerable measure of the value of 'Ovaltine' as a highly satisfactory accessory food and aid to nutrition is due to its constituents—milk, eggs, malt extract, cocoa and soya.

'Ovaltine' is not only highly nutritious, but really delightful to the taste and particularly easy of digestion.

**BABIES**

Immunization against diphtheria has so diminished the incidence of that disease that world attention now focuses upon pertussis as a major cause of child mortality and disability. An alum-precipitated pertussis vaccine is acknowledged as the most efficient known means of stimulating immunity to whooping cough, and its combination with diphtheria toxoid in one immunological weapon has reduced dual prophylaxis

to a single course. To meet the need for protection among the infant population of the world, a series of three injections of Diphtheria-Pertussis Prophylactic Glaxo (0.5 cc., 0.5 cc., and .1 cc. at monthly intervals), begun at about six months of age, confers a high level of immunity during the period of life when the two diseases are most distressing and most lethal.

of every du Maurier cigarette. Three layers of white  
vegetable tissue with alternate layers of fine cellulose protect  
the membranes from the irritant action of pyridine  
bases and other non-volatile bodies. Although no shred of  
tobacco can pass the lips and no unfiltered smoke  
can impinge on the tongue, the du Maurier tip  
allows the full flavour and fragrance of finely  
selected tobacco to pass unimpaired

### NEW CORRECTIVE HEEL for Children

Clarks have pleasure in announcing that they are  
making a new heel, suitable for attachment to an  
ordinary pair of Clarks Children's Shoes, which  
can successfully replace the use of T-irons or  
heavy surgical boots in the treatment of certain  
foot ailments and leg weaknesses.

### CLARKS CURATOR HEEL

has been clinically tested by an orthopædic  
surgeon, who has employed it in a number of  
cases with most encouraging results. The heel,  
moulded in light-weight rubber, is shaped to give  
arch support to weak feet (valgus feet).  
It is intended, as far as possible, to ensure that  
there shall not be indiscriminate use of this cor-  
rective device. Clarks prefer that it should be used  
only when specified by medical practitioners and  
that its fitting, etc. should be under expert super-  
vision. Full details are available to members of  
the medical profession, children's clinics, etc.  
on application to Clarks.

### Surgical ALGINATES

A new multi-purpose  
biological agent in therapy

Calgitex Alginate in its various prepared forms is a biological product derived from the brown seaweeds *Laminaria digitata* and *Cloustoni*. Presented in the form of gauze, wool and solution, it can be used effectively in all surgical procedures where the control of haemorrhage requires a material which is absorbable in tissue.

It is equally effective in the dressing of external wounds, since both Sodium and Calcium Salts of Alginates are compatible with Penicillin and other antibiotics and antiseptics. Becoming absorbed, they do away with the painful and damaging effect of removal. If required the dressings can be removed without damage to the healing tissues, by the application of Sodium Citrate solution in which the Calgitex Alginates are freely soluble.

*Sterilization* — The products are supplied sterilized, and can be re-sterilized if necessary by autoclaving or dry heating.

#### INDICATIONS :

*Internally* — Arresting troublesome capillary, venous, and osseous haemorrhage; bleeding from denuded visceral surfaces; haemorrhage in course of genito-urinary operations, post partum haemorrhage, etc.

*Externally* — Wounds, burns and scalds, abrasions and lacerations, skin loss, dressing of surgical wounds, varicose and trophic ulcers.

The following developments are now available :

## APPOINTMENTS

### GOVERNMENT OF SOUTHERN RHODESIA VACANCIES FOR MEDICAL OFFICERS

Applicants are invited from male medical practitioners for appointment as Government Medical Officers in Southern Rhodesia. Salary scale is £660 by £27 10s. to £990 per annum plus the right to private practice or an allowance in lieu, at present at the rate of £200 per annum at certain stations where private practice is not permitted. The commencing salary may be higher than the minimum of the scale (not exceeding four steps in such scale) in recognition of approved previous experience. A cost of living allowance, at present at the rate of approximately 17% of basic salary, will also be paid in terms of regulations. Successful applicants will be required to pass a medical examination by Southern Rhodesia Government or other duly appointed medical officer and will be provided with travelling fare from place of appointment to Southern Rhodesia for themselves and, if applicable, half the cost of fares for their wives and dependent children under the age of eighteen years. They will be employed in the first instance as Relieving Medical Officers. Official duties may include the supervision of European and Native Hospitals and Native Clinics; attendance upon Government patients and school children; performance of medico-legal work; routine public health duties; and any other work of a medical nature which may be allocated by the Medical Director. Applications in duplicate, stating age, nationality, marital condition, qualifications and previous experience (giving exact dates), full particulars of any military service, the earliest date on which duty could be assumed and giving the names of two persons to whom reference may be made, should be sent, together with copies of three recent testimonials, to reach the Secretary to the High Commissioner for Southern Rhodesia, Rhodesia House, 429, Strand, London, W.C.2, on or before July 22, 1948. Canvassing will disqualify applicants.

**HOMES****THE RETREAT, YORK**

The Pioneer Hospital, opened 1796, for the humane treatment of those suffering from Nervous and Mental Disorder.

This Hospital of 230 beds, administered by a Committee of the Society of Friends, combines what is best in the investigation and treatment of nervous illness with a sympathetic and friendly atmosphere. During 1947 346 patients were admitted, of whom no fewer than 289 were voluntary cases. Much curative work is accomplished in our mental hospitals to-day, and the recovery rate compares very favourably with that of our general hospitals. For information and terms of admission apply to the Physician-Superintendent, Arthur Pool, M.R.C.P., D.P.M. (Tel.: York 54551.)

# ST. ANDREW'S HOSPITAL, NORTHAMPTON For Nervous and Mental Disorders

President: The Most Hon. the MARQUESS of EXETER, K.G., C.M.G., A.D.C. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.M. D.P.M. This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

**WANTAGE HOUSE.**—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Vichy Douche, Scotch Douche, Electrical Baths, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological, and pathological research. Psychotherapeutic treatment is employed when indicated.

**MOULTON PARK.**—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit-growing.

**BRYN-Y-NEUADD HALL.**—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own garden, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone Nos.: 2356 and 2357 Northampton), who can be seen in London by appointment.

**A** COLLOID OF FERRIC HYDROXIDE (10% Fe). One teaspoonful is equivalent in iron content, to approximately 30 grs. iron and ammonium citrate.

Neo-Ferrum is an inexpensive and highly effective form of liquid iron suitable for general use in the treatment of iron deficiency anæmias. It is pleasantly flavoured and does not upset the stomach nor discolour the teeth.

Neo-Ferrum Tablets provide an extremely effective and pleasant alternative; two tablets are equivalent to one teaspoonful of the liquid product.

Neo-Ferrum may be given, in appropriate doses, to young infants as well as to children and adults. Is readily miscible with milk feeds.

## DOCTOR!

MAKE SURE OF  
YOUR NEW CAR!

In the difficult days, when basic petrol is suspended and a greater proportion of British made cars is destined for export, you should immediately register your new car requirements with us. This course will enable us to have the model you desire allocated to you at the earliest possible moment.

For the last twenty years our work has consisted of giving advice and service to the medical profession in connection with cars. We are contracting agents for practically every leading make of British car, and in our hands your interests will be well served.
