# "INNERAZE"

shoes

by **START-RITE**

"Inneraze" shoes for children are to the Orthopaedic Surgeon as commercial sutures to the general surgeon. Supplied on medical prescription only, they incorporate the necessary surgical alterations for the treatment of flat feet (pronation) . . . by means of in-built wedging. The wedge is an integral part of the shoe, and is located between the inner and outer sole. These alterations are uniform . . . avoid shoe distortion and consequent uneven wear . . . do not mar the appearance of the shoe.

The Surgeon is relieved of the necessity for checking up that the "alterations" are those that are needed, and of time-consuming supervision after each repair.

These cross-sections show the built-in wedge in position and the buttressed heel. The thickness of the wedge is  $\frac{1}{4}$ " or  $\frac{3}{16}$ " according to size of shoe.

For names and addresses of the Start-Rite dealers from whom "Inneraze" Shoes can be obtained please write to:— *The Managing Director,*

*James Southall & Co., Ltd.  
34, St. George Street,  
Hanover Square,  
London, W.1.*

**HIGHLY SATISFACTORY RESULTS**

follow the adoption of

## SALT'S PATENT COLOSTOMY BELT

Since we first introduced this Belt we have supplied many hundreds, and the results have been highly satisfactory. Outstanding advantages are: (1) Receiver is detachable and sterilizable by boiling; (2) Bag easily removed without removal of belt; (3) Bag easily emptied and washed; (4) No crevices or metal fittings to hold faeces; (5) Smell reduced to a minimum; (6) Less bulk than the old style. Bags are easily and economically replaced. Further details and Measure/Order forms available to professional people on request.

**HOSPITALS SUPPLIED UNDER N.H.S.**
