

A combination of qualities

The claims of 'Dettol' do not rest on any single quality desirable in an antiseptic, but rather upon the combination of several essential properties. It can be used at fully effective strengths with safety; that is, without risk of poisoning, discomfort or damage to tissue. It retains a high bactericidal potency in the presence of blood, it is stable, and agreeable in use.

Protein in Gastric Disturbances

PATHOLOGICAL lesions of the gastro-intestinal tract create special problems of management from the nutritional aspect. The problem is by no means eased by the fact that the body's protein requirements are increased rather than lessened by reason of the need for amino acids, which are required in the process of tissue repair. Failure to provide protein supplement in the diet can only mean that the body will have to obtain the required amino acids by raiding tissue proteins, which of course can only result in loss of weight.

The physician frequently has recourse to a non-residue diet in the management of gastric or duodenal ulcer and also in the re-establishment of a normal diet after infective enteritis or amebic dysentery.

Difficulties of digestion, accompanied by pain, poor

absorption and indifferent appetite, create a vicious circle which demands a special effort to break. This effort is sometimes provided by a protein supplement which can be easily broken down by the digestive processes and completely absorbed.

The particular advantages of Brand's Essence under such conditions are:—

1. It is soluble animal protein of high biological value.
2. Being partly hydrolysed, it is capable of easy ingestion, digestion and absorption.
3. It promotes gastric secretion.
4. It is extremely palatable.
5. It may be taken as a jelly or a liquid.

A PERFECT APPLIANCE
FOR ITS PURPOSE:

SALT'S Sacro-iliac Belt

Designed by an eminent orthopaedic specialist, this Belt is available in styles for men and women. Its perfect efficiency is accompanied with complete comfort. Rapidly restoring the normal relationship of the sacral and iliac bones, it also exerts a beneficial effect on the tone of the abdominal viscera. Not the least commendable thing about this Belt is the fact that it enables the patient to make early resumption of normal activities. Further details and Measure/Order forms available to medical people on request.

HOSPITALS SUPPLIED UNDER N.H.S.

Appointments at London address: 1,
STANLEY HOUSE, 103, Marylebone
High Street, London, W.1.
Tel.: Welbeck 3034.

Guarantee
"We guarantee to alter
the shape or size of the
return of any appliance
if not found suitable
within fourteen days
from date of supply."
