

Certain on their feet

Clumsy walking and frequent falls may be only the fault of ill-fitting shoes — particularly of shoes bought to "allow for growth", in which the feet slip about and the toes cramp against the end. Clarks make shoes for children that hug ankle and instep firmly while allowing plenty of room for fast-growing toes. An ingeniously-designed Footgauge ensures that each child gets its "own" shoe — of the right breadth and girth as well as length. A child fitted out with such care will never suffer the foot-troubles arising from badly-chosen shoes.

Lemon Juice ... 37.0%

Plus Flavouring and permitted preservative

The above percentages are expressed in weight per given volume

MADE BY RAYNER AND COMPANY LIMITED, LONDON, N.18

THIS IS THE CENTANÆST

AND A
NEW CHAPTER
OPENS IN
CLOSED
CIRCUIT
EQUIPMENT

It presents all the features of the Combined Boyles and C.M. Absorber apparatus in a streamlined and more convenient form. Several improvements have been made. The Centanæst is pleasing in design, compact and easy to clean. All gas conduits are enclosed; the Rotameters are easily visible and fully protected. The Absorber can be safely housed when not in use. Cylinders are readily accessible and easily changed. The cabinet is provided with drawer and table space.

The British Oxygen Company Ltd. is proud to put the Centanæst at the service of the Medical Profession.

BOYLES APPARATUS The introduction of the "Centanæst" will not eliminate from our range of apparatus the universally known Boyles Table. Our Model 'G' with the Coxeter-Mushin Absorber presents a combined apparatus for the administration of 'open' or 'closed circuit' anaesthesia.
