

*To assist
convalescence*

Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room. Prepared without seasoning, it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

Protein regeneration following shock

CLINICAL observation of the effects of shock following accidents, burns, and surgical operations, shows that there is a phase of catabolic destruction of body protein resulting in nitrogen disequilibrium. Protein replenishment, therefore, becomes an integral part of pre-operative and post-operative treatment. Immediate steps should be taken to rectify the protein loss by an adjustment of the diet.

It is often found that patients suffer from loss of appetite during the

early phase of recovery. The food offered may be unappetizing or difficult to digest. Until these conditions are overcome, patients may deteriorate through further protein depletion.

Brand's Essence is a first-class protein of animal origin. Being partly hydrolysed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable and may be taken either as a jelly or a liquid.

It helps to support convalescence and assists in restoring a positive nitrogen balance.

The **DERBAC** treatment for pediculosis capitis (head lice)

AT THE CLINIC . . .

Serious cases should be treated with **LIQUID DERBAC** which has shown by experience to be outstandingly successful. ONE application only is necessary and eradication is complete within the hour. Non-toxic. Supplied in 2-oz. bottles/1/6d each (in 3-dozen packs) or 40-oz. bottles 10/8d each, including Purchase Tax.

FOLLOW ON TREATMENT AT HOME . . .

Patients can ensure a clean and healthy head of hair by regular shampooing and combing with Derbac Soap and Comb. **DERBAC SOAP** 9½d and 1/6d per tablet, including Purchase Tax.

Walkie-Talkie

When a child first starts to teach himself to walk he can't share his impressions. We can only guess at the magnitude of the adventure; at the feeling of "having feet."

We can, however, help him by our choice of his first shoes. Pliable, perfectly fitting shoes won't shake his confidence in walking.

Clarks infant's shoes are made in *several widths to each size*. A special footgauge measures for girth as well as length and breadth. And Clarks promise that, if none but Clarks shoes are worn, children so fitted from the first will be free from foot troubles caused by footwear.

GIVE CONFIDENCE IN WALKING

The problem child . . .

*Now available: 'Benzedrine'
Ampoules containing 20
mg./1 c.c. for parenteral
administration.*

THE problem child is frequently aided by 'Benzedrine' Tablets. Recurrent bouts of aggressiveness and destructiveness often yield to the drug in what appears to be a specific way. The noisy child becomes much more subdued; the activity of the hyperkinetic child becomes less disjointed; and co-operation, sociability, and behaviour are improved.

'Benzedrine' Tablets are often a useful adjunct in the treatment of nocturnal enuresis, particularly in cases that are characterized by unusually profound sleep.

'BENZEDRINE' TABLETS

Issued in bottles of 50 tablets each containing 5 mg. amphetamine sulphate

LEDERLE IN LONDON

Among the outstanding contributions to medical progress from the Lederle Laboratories are the introduction of aureomycin, teropterin, artane and the isolation and synthesis of folic acid. These are but some of the notable Lederle products, and the medical and scientific resources of the world-renowned Lederle organisation are now offered through Lederle in London.

'FOLVITE' FOLIC ACID

Where the urgent treatment of an anaemia calls for powerful action, the physician can rely on 'FOLVITE' (Folic Acid Lederle) as a potent haematinic.

'Folvite' is a Registered Trade Mark.

THE CONTROL OF SCABIES

with

'TETMOSOL'

TRADE MARK

TETRAETHYLTHIURAM MONOSULPHIDE

'Tetmosol' is a powerful sarcopticide, and in the forms of 'Tetmosol' Soap and 'Tetmosol' Solution has proved highly effective in both the prophylaxis and treatment of scabies.

The Solution (25%), diluted with water before use, provides a most satisfactory and certain method of treatment. It produces a rapid cure of scabies and has the advantage that its application is painless and rarely gives rise to dermatitis.

'Tetmosol' Soap—a pleasantly perfumed soap tablet containing 5% tetraethylthiuram monosulphide—is primarily intended for prophylactic use against scabies. It has proved especially valuable for controlling outbreaks of the disease in families and in communities such as asylums, hospitals, schools, etc. The method of use is simple and convenient so that the co-operation of the scabies patient is readily secured.

'Tetmosol' Solution (25%). Bottles of 100 c.c., 250 c.c. and 2 litres.

'Tetmosol' Soap (5%). Singles 3 oz. tablets and boxes of 36.
