HIGHLY SATISFACTORY RESULTS
follow the adoption of

SALT'S PATENT COLOSTOMY BELT

Since we first introduced this Belt we have supplied many hundreds, and the results have been highly satisfactory. Outstanding advantages are: (1) Receiver is detachable and sterilizable by boiling; (2) Bag easily removed without removal of belt; (3) Bag easily emptied and washed; (4) No crevices or metal fittings to hold faeces; (5) Smell reduced to a minimum; (6) Less bulk than the old style. Bags are easily and economically replaced. Further details and Measure/Order forms available to professional people on request.

Appointments at London address: 1,
STANLEY HOUSE, 103, Marylebone
High Street, London, W.1.
Tel.: Welbeck 3034.

Guarantee

"We guarantee to alter
exchange or accept the
return of any appliance
without cost when called by
the Medical Profession,
if not found suitable
within fourteen days
from date of supply."

Clinical control of orthostatic hypotension with SPENCER . . . *

One of the findings in studies* covering a 6-month to 3-year follow-up on 173 patients who had sympathectomies to include the 4th thoracic level indicate that the control of the orthostatic hypotension which results "routinely requires a special corset (Spencer Support) with a spring suprapubic pad (Spencer Abdominal Spring Pad**)." . . .

Inset: The Spencer Abdominal Spring Pad. In the man's support, shown open, note the placement of the pad in the support.

The Spencer Supports and Abdominal Spring Pad used in these—and in present—studies are pictured at left. The body supports improve and maintain posture and body mechanics and the Abdominal Spring Pad serves as a resilient visceral elevator. Together they help prevent the pooling of blood in lower abdomen and extremities, favourably influence circulation and respiration, encourage exercise of muscles. The comfortable support to spine and abdomen produces a heightened sense of well-being and confidence in getting back to normal living.

These benefits are obtained because these Spencer Supports—like all other Spencers—are individually designed, cut, and made for each patient to attain the prescribed medical aims.

Use Spencer Supports with confidence in control of hypotension associated with any conditions where support is indicated.

ASPIRIN is an acidic substance, sparingly soluble

DISPRIN is neutral, stable, soluble—and palatable

The reasons for preferring calcium aspirin to aspirin, lie chiefly in the fact that it is a neutral, soluble and bland compound, whereas aspirin is acidic, sparingly soluble and may act as a gastric irritant.

But calcium aspirin has a defect of its own—chemical instability;

and in consequence attempts to manufacture it in the form of tablets that could be depended upon to remain free of nauseous breakdown products, under reasonable conditions of storage, have hitherto met with little success. These difficulties have now been overcome. 'Disprin',

a stable, tablet preparation, readily dissolves to yield a substantially neutral and palatable solution of calcium aspirin that can be prescribed in all conditions in which acetylsalicylate administration is indicated.

Extended clinical trials show that Disprin in massive dosage, even over long periods, can be tolerated without the development of gastric or systemic disturbances.

DISPRIN ASOD. *Neutral, stable, soluble
palatable, calcium aspirin*

Bottle of 26 tablets, price 2/- including Purchase Tax . On prescription Disprin is free of Purchase Tax . Clinical sample and literature supplied on application.

LARGE DEPRESSED FRACTURE OF THE SKULL

Post operative protection by skull cap of Gypsona P.O.P.

R. J. Age 49. Motor cycle accident. Admitted in deep coma, with large scalp wound and contusion over right temporal and parietal region.

X-Ray showed multiple linear fractures with large depressed fragments, plus fracture of right zygoma and fractures of the base of the skull. (Fig. 1.)

Operation: Toilet of the scalp wound, removal of large area of depressed bone which had penetrated the cortex in an area of 2-in. diameter. Cortical debris removed, together with fragments of bone. Temporal facial graft sutured over dural gap. Scalp wound closed. (Fig. 2.) Skull cap of Gypsona P.O.P. applied. (Fig. 3.)

Feeding by indwelling naso-pharyngeal catheter carried out during period of semi-coma.

Above: Figure 1. Below: Figure 2.

These details and illustrations are of an actual case. T. J. Smith & Nephew, Ltd., of Hull, manufacturers of Gypsona P.O.P. and Elastoplast bandages, publish this instance—typical of many—in which their products have been used with success.

The pharmacological approach to the relief of asthma

THE SEPARATION of the inhibitory from the excitant effect of adrenaline has long been a pharmacological problem; for the satisfactory control of an asthmatic attack a drug possessing only the inhibitory action is desirable.

Such a medicament has been found in ISOPRENALINE (ISOPROPYL - *nor* - ADRENALINE),

which also has the following advantages:—

- (1) Produces greater relaxation of smooth muscle.
- (2) Is fully effective by the oral route.

As a safe and effective preparation for self-administration by patients with asthma, ISOPROPYL-*nor*-ADRENALINE is the drug of choice.

Isoprenaline—Boots

INFANT WELFARE

A considerable amount of work has been carried out recently with a view to lowering the neo-natal and infant mortality rates. As a result, attention has been drawn to the importance of good feeding for the expectant and nursing mother.

The particular efficacy of Marmite as a natural source of B₂ vitamins for inclusion in the ante-natal diet is well proved. Moreover, Marmite is often found to be of special value for infants who are not thriving, and it is particularly indicated for premature and for bottle-fed babies.

MARMITE

yeast extract

contains

Riboflavin (vitamin B₂) 1.5 mg. per oz.
Niacin (nicotinic acid) 16.5 mg. per oz.

Jars: 1-oz. 8d., 2-oz. 1/1, 4-oz. 2/-, 8-oz. 3/3, 16-oz. 5/9

Obtainable from chemists and grocers

Special terms for packs for hospitals, welfare centres and schools

Two fine Instruments

and what they have in common

The word Syringe derives from the Greek Syrix or Pan-pipes, the ancestor of the modern organ.

VIM HYPODERMIC SYRINGES

Made from tested glass of high thermal resistance; plunger and barrel individually mated for smooth working without leakage. Rust and corrosion-proof, they are individually calibrated and can be sterilized by hot air at 160° C. Clear and permanent etched graduations. Special Plunger Retaining Clip also prevents rolling. Sizes up to 20 ml. Repair service available.

VIM HYPODERMIC NEEDLES Specially designed for use with Vim Syringes. Rust-resisting stainless steel, with razor sharp edges.

Please write for illustrated price list.
