

# Head Louse Infestation

SHOULD BE TREATED WITH **SULEO**

**FORMULATED** with D.D.T. plus Pyrethrins, **SULEO HAIR EMULSION** combines speed of action with a high residual effect which exceeds the incubation period of the nits by several days. Extensive tests carried out in co-operation with the child-clinic doctor of an important Metropolitan Borough against very bad cases of pediculosis capitis have proved that **SULEO** renders head lice moribund only 5 minutes after application and destroys all lice present within 15 minutes.

**SULEO** also has great ovicidal value. Laboratory tests conclusively show that up to 94% of nits fail to hatch after its application. Those that do subsequently hatch are killed by the residual action.

Non-irritant—Non-toxic—Easily applied—Undetectable. Used by Medical Officers throughout the country.

## Against exhaustion

The energising and therapeutic effect of glucose is available in a most acceptable form in **LUCOZADE**.

Whereas ordinary glucose preparations may have a sickly and even nauseating effect on the palate, **LUCOZADE** is remarkably refreshing. Once tasted—it is never refused.

An  
improved  
form of  
glucose therapy

This pleasing characteristic is of the greatest value in treating cases of shock, physical exhaustion and other conditions requiring glucose ingestion.

(Containing Dextrose, Maltose, and Dextrin in solution equivalent to 23% w/v Liquid Glucose B.P.)

## SALT'S REGISTERED COLOSTOMY BELT

WITH STERILIZABLE  
RUBBER CUP

Designed specifically for use in cases where faeces are of a solid nature, or the amount is small. The special feature is that the cup is made of moulded rubber, in one piece, and has no corners nor crevices—therefore does not retain odour. Full details in our Corset and Belt Book—post free to medical people on request.
