

Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room. Prepared without seasoning, it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

Walkie-Talkie

When a child first starts to teach himself to walk he can't share his impressions. We can only guess at the magnitude of the adventure; at the feeling of "having feet."

We can, however, help him by our choice of his first shoes. Pliable, perfectly fitting shoes won't shake his confidence in walking.

Clarks infant's shoes are made in *several widths to each size*. A special footgauge measures for *girth* as well as length and breadth. And Clarks promise that, if none but Clarks shoes are worn, children so fitted from the first will be free from foot troubles caused by footwear.
