# Head Louse Infestation

SHOULD BE TREATED WITH SULEO

FORMULATED with D.D.T. plus Pyrethrins, SULEO HAIR EMULSION combines speed of action with a high residual effect which exceeds the incubation period of the nits by several days.

Extensive tests carried out in co-operation with the child-clinic doctor of an important Metropolitan Borough against very bad cases of pediculosis capitis have proved that SULEO renders head lice moribund only 5 minutes after application and destroys all lice present within 15 minutes.

SULEO also has great ovicidal value. Laboratory tests conclusively show that up to 94% of nits fail to hatch after its application. Those that do subsequently hatch are killed by the residual action.  
Non-irritant—Non-toxic—Easily applied—Undetectable. Used by Medical Officers throughout the country.

## Suleo

HAIR EMULSION

Obtainable from all chemists. Sample and literature upon request from—

JEYES LABORATORIES LIMITED, Millbrook, Chigwell, Essex.

**NEMBUTAL***Regd. Trade Mark***AND BELLADONNA**

Since Nembutal was first introduced in 1930, clinical experience has proved that doses adjusted to the need can provide any desired degree of cerebral depression—from mild sedation to deep hypnosis. The small dosage required means less drug to be inactivated, shorter duration of action, greater latitude of clinical safety and definite economy in cost.

To the already extensive range of Nembutal products, Abbott Laboratories have recently added a combination of Nembutal and Belladonna in capsule form. Nembutal relieves psychic tension—Belladonna alleviates spasm and diminishes the secretion of hydrochloric acid. This efficient therapeutic combination can be used to obtain symptomatic relief in peptic ulcer, colitis, biliary spasm and various other conditions characterised by spasmodic abdominal pain.

*Each capsule contains :—*

Nembutal (Pentobarbitone Sodium B.P.)  $\frac{1}{2}$  gr. (32 mg.). Extract Belladonna B.P.  $\frac{1}{8}$  gr. (12.5 mg.). Equivalent to about 7 minims Tincture Belladonna.

*Dosage :—*

1 capsule 3 to 4 times daily. Supplied in bottles of 100.

# CARBRITAL

In 'Carbital' capsules the rapid but relatively brief hypnotic action of pentobarbitone sodium is combined with the prolonged sedative effect of carbromal. In insomnia 'Carbital' produces slumber simulating natural undisturbed sleep of adequate depth and duration, and patients awaken refreshed and alert.

'Carbital' is also indicated as a general sedative in neurasthenia, etc., or pre-operative sedation, and routinely in minor operations.

*Supplied in bottles of  
25 and 250 capsules.*

Each 'Carbital' capsule contains  $1\frac{1}{2}$  grains of pentobarbitone sodium and 4 grains of carbromal.

## 'ANAHÆMIN'

### THE ESTABLISHED TREATMENT FOR PERNICIOUS AND OTHER MACROCYTIC ANÆMIAS

Further evidence that the therapeutic action of liver extract in pernicious and other macrocytic anæmias depends upon the presence not only of a primary factor, vitamin B<sub>12</sub>, but upon the presence also of accessory factors was presented by several speakers at the recent International Congress of Hæmatology held at Cambridge (see *Lancet*, September 23rd, 1950, p.407).

Until the part played by these factors, both primary and accessory, is clearly defined the use of Anahæmin, which for over a decade has proved to be completely effective therapy, is both rational and in the best interests of the patient. Every batch of Anahæmin is clinically tested before issue.

## 'ANACOBIN'

*Solution of PURE crystalline vitamin B<sub>12</sub>*

Occasionally, cases of pernicious anæmia arise which cannot be treated satisfactorily, even with Anahæmin, because of hypersensitivity. For the temporary treatment of such cases Anacobin is available.
