

Pre-Natal Diet and the course of Pregnancy

The normal functioning of the reproductive organs during pregnancy depends, among other things, upon the plentiful intake of vitamins and minerals.

Medical opinion is gaining ground that there is an increased need for Vitamin B in late pregnancy and the early puerperium. Its administration during the period before childbirth has resulted in less vomiting and nausea and in marked improvement in the nutritional value of the breast milk. In order to assure the building of the foetal bones *in utero* and afterwards during breast-feeding, the importance of Vitamin D and of calcium and phosphorus is also established.

In Supavite Capsules the practitioner has at hand a combination of these and other essential vitamins and minerals in a scientifically balanced form of particular value in maternity cases.

Emergency measure..

The anticipated effects of glucose as an energiser and restorer are to some extent lost if the patient shows a degree of unwillingness to accept it.

But the common aversion to the sickly, sometimes nauseating, taste of glucose in many of its ordinary forms is strikingly absent whenever LUCOZADE is offered.

LUCOZADE is so palatable, so refreshing, that neither children nor adults ever need urging to take it as prescribed.

(Containing Dextrose, Maltose and Dextrin in solution equivalent to 23% w/v Liquid Glucose B.P.)

*To assist
convalescence*

Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room. Prepared without seasoning, it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

SALT'S REGISTERED COLOSTOMY BELT

WITH STERILIZABLE
RUBBER CUP

Designed specifically for use in cases where faeces are of a solid nature, or the amount is small. The special

feature is that the cup is made of moulded rubber, in one piece, and has no corners nor crevices—therefore does not retain odour. Full details in our Corset and Belt Book—post free to medical people on request.

DESIGNED

FOR FEWER SIDE-EFFECTS

Nearly 100 derivatives of piperazine were synthesised at The Wellcome Laboratories before workers there were satisfied that one compound, 'Histantin', offered a noteworthy advance in anti-histamine therapy.

- 'Histantin' produces fewer side-effects.
- 'Histantin' provides prolonged action—a single daily dose suffices in most cases.
- 'Histantin' is chemically unrelated to other anti-histamine agents. Compressed products of 50 mgm. in bottles of 25, 100 and 500.

DISCOVERY OF A UNIQUE PENICILLIN ESTER

ESTOPEN

Here is a powerful new weapon for combating bronchitis, bronchiectasis . . . indeed, all penicillin-sensitive infections of the lung and associated tissues. Given by intramuscular injection, ESTOPEN has the unique property of focusing penicillin activity in the lungs—an effect derived from its special affinity for lung tissues. The hydriodide of the diethylaminoethyl ester of penicillin G, Estopen is a dry powder . . . is easily suspended in water . . . and is very easy to inject.

ESTOPEN

Single-dose vial (500,000 units penicillin):

PENICILLIN
ORAL
TABLETS
BOOTS

PENICILLIN ORAL TABLETS — BOOTS are prepared from penicillin G (crystalline potassium salt). This salt is not only very stable but has the advantage that the characteristic flavour of the antibiotic is less pronounced than with other penicillin salts.

Penicillin Oral Tablets-Boots can be used for treating adults (except in very serious conditions). They are particularly suitable for children when repeated injections may be a serious obstacle to treatment.

Because of their small size, these tablets are specially suitable for the oral administration of penicillin to infants and young children.

Tablets of 100,000 I.U.—containers of 10, 20, 100 and 500.
Tablets of 200,000 I.U.—tubes of 10.

HOW INTELLIGENT ARE YOUR PATIENTS?

HOW many precious hours a week do you spend on patients who do not co-operate as they should, and who because of fear, ignorance, or prejudice add to your burdens and delay their own recovery?

Every patient who has more than the most elementary understanding of what you are trying to do, and why you are doing it, helps to save you time and trouble.

INFORMED CO-OPERATION

FAMILY DOCTOR, the new monthly magazine published by the British Medical Association, is a health magazine. Its aim is to interest, instruct, and enlighten the public — by bringing direct to the ordinary reader from the medical profession simply presented and well-illustrated information on hygiene, preventive medicine, simple anatomy and physiology, diet,

and other things that affect the well-being of the individual.

FAMILY DOCTOR will try to help everyone to lead a fuller life by telling them in a friendly easy-to-read manner what will enable their families and themselves to be healthier and happier. Your own family will find much to interest them in FAMILY DOCTOR—and so may you.

A NEW LINK BETWEEN DOCTOR AND PUBLIC

By a combination of simply written articles and interesting illustrations, FAMILY DOCTOR will also include the features of a home magazine—such as cookery, sport, mothercraft—written with authority. This is no instructor in self-medication, but a dependable

guide to an understanding of health and hygiene. You can recommend it to your patients with confidence; you'll find it worth keeping a copy in your waiting-room. And you can read it yourself with interest and refreshment.
