

The importance of protein during pregnancy and the nursing period

CLINICAL observation shows that the increased protein anabolism during the latter part of pregnancy, and particularly during the nursing period, requires more protein than was at first considered necessary. Adequate protein is, therefore, desirable to ensure the ample supply of breast milk.

The inclusion of high-grade protein foods in the diet of pregnant women is now a standard practice. In cases where there is loss of appetite

or a general feeling of exhaustion, the diet can be effectively supplemented by protein foods in a form which is easy to assimilate.

Brand's Essence is a first-class protein of animal origin. Being partly hydrolysed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in restoring a positive nitrogen balance.

(CHICKEN or BEEF)

CIMLAC GAUZE

in the treatment of

GRAVITATIONAL AND TROPHIC ULCERS

In long-standing cases of gravitational and trophic ulcers, Cimlac Gauze will be found a valuable treatment to promote regeneration of devitalized tissues and to control infection due to the presence of Ps. Pyocyanus and B. Proteus, which are very often causative factors of delayed healing.

Cimlac Gauze is prepared with sterilized glyco-gelatin, which supplies substances required for the process of fibroplasia and cicatrization. The combination of Hexylresorcinol and Aminacrine Hydrochloride in the glyco-gelatin medium exerts a remarkable inhibitive action on Gram-positive and Gram-negative organisms.

Samples and literature gladly sent on request

Available only to Hospitals,
Private Practitioners and
Medical Depts. in Industry.

notice

Clarks Curator Heel

— but the child with valgus feet would feel the difference at once. If T-irons and surgical boots can possibly be avoided doctors will do so, recommending instead a light-weight corrective heel. In certain foot-ailments and leg weaknesses Clarks "Curator" heel is of great benefit. The child won't feel "marked out" from others, since the heel is almost unnoticeable.

Full details are available to the medical profession and to children's clinics and hospitals, on application to Clarks.

Can easily be fitted to certain Clarks shoes in sizes infants' 7 to maids' 5½ (youths' 1½).
