would

notice

Clarks Curator Heel

—but the child with valgus feet would feel the difference at once. If T-irons and surgical boots can possibly be avoided doctors will do so, recommending instead a light-weight corrective heel. In certain foot-ailments and leg weaknesses Clarks

"Curator" heel is of great benefit. The child won't feel "marked out" from others, since the heel is almost unnoticeable.

Full details are available to the medical profession and to children's clinics and hospitals, on application to Clarks.

Can easily be fitted to certain Clarks shoes in sizes infants' 7 to maids' 5½ (youths' 1½).

C. & J. CLARK LTD. (Shoemakers since 1825) STREET, SOMERSET.

SALT AND SON LTD

THE "SALT AIR" ARTIFICIAL BREAST

—the obvious solution of the psychological problem which frequently follows breast amputation. It restores the normal figure line, banishes self-consciousness, encourages resumption of normal activities. Can be worn while bathing, as it retains its shape when wet and can be easily dried. Available in the "Saltair" Brassiere or separately for sewing into patient's own foundation garment.

Front View

Back View (uncovered)

BRASSIERES are also available for use in mastitis. Particulars of all styles available on application.

BIRMINGHAM, 2
