

PROLONGED PROTECTION

AFTER the successful application of an antiseptic, there still remains the risk of fresh contamination by pathogenic organisms. It is important, not only that the barrier should be effective when first set up, but that the protection should be prolonged.

The protection conferred by 'Dettol' is durable. It has been shown that if 30% 'Dettol' is applied to the skin and allowed to dry, the area remains insusceptible to fresh infection by *streptococcus pyogenes* for at least two hours.*

* This experimental finding (*J. Obstet. Gynaec. Brit. Emp. Vol. 40 No. 6*) has been confirmed in obstetric practice extending well over a decade.

'DETTOL' THE MODERN ANTISEPTIC

'Dettol' is available in 2 gallon and 5 gallon tins free of Purchase Tax for dispensing purposes only. Smaller sizes, including 1 gallon tins for public use, are subject to Purchase Tax.

The one-minute tablet test for detecting urine-sugar

Doctors and diabetic patients appreciate the advantages of this convenient tablet method for detecting urine-sugar. Based on the same principles as the Benedict Test, Clinitest provides a copper-reduction test with all reagents compressed in a single tablet.

NO EXTERNAL HEAT REQUIRED. The heat is self-generated by the tablet.

CONVENIENT-PRACTICAL. All essentials fit into a small pocket-size container.

SPEEDY-DEPENDABLE. The test takes less than one minute but the sensitivity and reliability are equal to the other standard qualitative copper reduction tests.

SIMPLICITY. There are three simple steps. Place five drops of urine in a test tube, add ten drops of water. Drop one Clinitest tablet into the solution and allow thirty seconds for reaction. Then compare with colour scale.

NEW PRICES TO THE PUBLIC:
SET, INCLUDING 36 TABLETS 10/-
REFILL BOTTLES (36 TABLETS) 3/6

Supplies now available through good-class chemists, or from the Sole Distributors.

'CLINITEST' and the N.H.S.

'Clinitest' sets and refill bottles of tablets comply with the official specifications for appliances and reagents for urine sugar analysis which may be prescribed on Form E.C.10.

PURE PRODUCTS LTD. COLWICK, NOTTINGHAM, ENGLAND

In
dysmenorrhoea

9
out of
every 10 received
the relief they sought

'We use it [Edrisal] with the knowledge
that 9 out of 10 sufferers
will get the relief they
seek, and that without
loss of time they can
return to the production
line in complete comfort.'

Each tablet contains : amphet-
amine ('Benzedrine') sulphate
2.5 mg., acetylsalicylic acid
160 mg., phenacetin 160 mg.

Two studies* amongst factory and office workers revealed that with 'Edrisal' nine out of every ten dysmenorrhoea sufferers received the relief they sought. The analgesic properties of 'Edrisal' are enhanced by the unique anti-depressant properties of its 'Benzedrine' component. 'Edrisal', therefore, not only

relieves the pain during the menstrual period but also combats the accompanying psychic depression. In primary dysmenorrhoea the best results are usually obtained with a dosage of two 'Edrisal' tablets, repeated every three hours, if necessary. Samples are available on request.

'Bena-Fedrin'

ANTI-HISTAMINE AND NASAL DECONGESTANT

Contains the anti-histamine agent 'Benadryl' and the vaso-constrictor ephedrine, in an isotonic, aqueous, dextrose vehicle approximating in pH to that of the normal nasal secretions. In addition to being miscible with mucous discharge and reaching membrane surfaces rapidly, it is relatively non-irritating.

'Bena-Fedrin' is intended for use in the treatment of congestion associated with allergic rhinitis, hay-fever, and other pollen allergies, acute rhinitis, acute rhino-sinusitis, etc.

Formula

'Benadryl' (Diphenhydramine Hydrochloride)	0.1	per cent
Ephedrine Hydrochloride	1	per cent.
Chloretone	0.5	per cent.
Menthol	0.05	per cent
Aqueous dextrose base	q.s.

Surface Performance

When the clinical picture calls for the relief of pain in lesions of the skin and certain mucous membranes, 'TOPOCAINE' can be relied upon to give adequate surface anaesthesia. In painful superficial skin injuries such as abrasions, burns, etc., and for excessive irritation

during skin infections, a single application of 'TOPOCAINE' usually gives relief lasting up to eight hours.

Its low toxicity permits even more frequent use in very severe conditions and it is particularly well suited for treating pain in the rectal, vaginal and urethral mucosa.

Available in the form of Ointment, Cream and Lotion.
