

Pre-Natal Diet and the course of Pregnancy

The normal functioning of the reproductive organs during pregnancy depends, among other things, upon the plentiful intake of vitamins and minerals.

Medical opinion is gaining ground that there is an increased need for Vitamin B in late pregnancy and the early puerperium. Its administration during the period before childbirth has resulted in less vomiting and nausea and in marked improvement in the nutritional value of the breast milk. In order to assure the building of the foetal bones *in utero* and afterwards during breast-feeding, the importance of Vitamin D and of calcium and phosphorus is also established.

In Supavite Capsules the practitioner has at hand a combination of these and other essential vitamins and minerals in a scientifically balanced form of particular value in maternity cases.

Invalid Bovril is a highly concentrated form of Bovril for use in the sick-room.

Prepared without seasoning,

it provides the maximum concentration in the most easily assimilated form. Many doctors recommend it in cases where the patient needs "building-up" after illness. Perhaps there is a patient of yours who would benefit from a course of Invalid Bovril?

When **coughing** causes **insomnia**

IN TRACHEITIS and bronchitis the sleeplessness caused by a persistent, unproductive cough can be very exhausting. Tusana Cocillana Cough Linctus is very valuable in such cases. It provides a blend of expectorants to loosen the tenacious mucus in the upper air passages and the central sedative, codeine, to depress the cough reflex.

By breaking the vicious circle of coughing and irritation, Tusana allows the patient to sleep and gather strength for recovery. The tendency of codeine to cause constipation is offset by the inclusion of a little extract of senna in the formula.

Supplied in bottles of 4 fl. oz.

of an analgesic is the rapidity with which it relieves pain.

HYPON Tablets — by virtue of their rapid disintegrating properties — merit a high score.

THE SECOND TEST of an analgesic is the absence of the unpleasant side effects of depression and constipation. These reactions do not occur with HYPON Tablets due to the presence in the formula of caffeine and phenolphthalein.

HYPON Tablets stand firm in the field of those analgesics prescribed for the relief of pain associated with rheumatic conditions, spastic dysmenorrhœa and neuralgia.

Full and rapid recovery from illness or following surgical operations may be the more readily achieved if liver extract, iron and vitamins are supplied to the patient to facilitate blood regeneration. Even a relatively small fall in the hæmoglobin level in patients otherwise reasonably healthy may manifest itself in the form of general asthenia and proneness to fatigue. HEPRONA, a preparation containing Hepatex liver extract, iron, members of the Vitamin B

HEXOPHENE Surgical Soap is supplied only against medical prescription. It is not sold direct to the lay public.*

A Notable Advance in Aseptic Technique

For the surgical scrub; pre-operative and post-operative preparation of patients' skin; general hospital use; and for routine prophylaxis in the reduction of pyogenic skin infections.

Extensive clinical research has clearly established that regular use of soaps containing 2% hexachlorophene, a new chlorinated bisphenol, reduces the resident bacterial flora of the skin to about 5% of its ordinary level. And, further, that this low total flora is maintained during, and for a period after, regular daily use.

This bactericidal effect derives from the adsorption of hexachlorophene by the skin during the wash. HEXOPHENE Surgical Soap incorporates 2% hexachlorophene, combined with an anionic wetting agent, in a bland,

emollient soap-base especially prepared for surgical use. It quickly lathers in any water.

By the regular use of HEXOPHENE Surgical Soap the routine 10-minute pre-operative scrub can safely be reduced to 3 minutes and the scrub-brush and alcohol rinse eliminated.

Brief use between operations maintains the low bacterial count.

HEXOPHENE Surgical Soap may also be used advantageously for the preparation of patients' skin in elective surgery; as an effective prophylactic in decreasing the incidence of pyogenic skin infections; in obstetrics (particularly domiciliary); for minor surgery (casualty and accident rooms); for general ward use and in general practice as a safeguard against contact infection: and in the field of industrial health. HEXOPHENE Surgical Soap is economical in use and shows substantial saving both in time and material costs.

A potent alkaloidal fraction of Veratrum viride — biologically standardised for hypotensive activity in mammals — a new active principle not heretofore available, for the treatment of hypertension.

An entirely new drug, Veriloid presents only the hypotensive ester alkaloids of Veratrum viride freed from the irritant and inert dross of the crude root. This active principle, because it is biologically standardised, is absolutely uniform in its pharmacological action.

Individualisation of dosage is essential for maximum therapeutic benefit. In the majority of patients the average daily requirement of 9 to 15 mg. given in divided dosage three times daily leads to a clinically significant drop in arterial tension brought about by relaxation of the smaller arterioles. This effect is readily maintained for as long as the drug is given, for tolerance to Veriloid usually does not develop. Concomitantly, gratifying subjective improvement is discernible by the patient.

Veriloid has been found effective in malignant hypertension, severe essential hypertension and in moderate elevation of the blood pressure. It is available on prescription through all pharmacies in slow dissolving tablets containing 1.0 mg., in bottles of 100. Veriloid may be prescribed on Form E.C.10 without restriction.

Suppression of secondary bacteria in the presence of broken-down tissue is a pre-requisite to rapid healing.

The three sulpha derivatives in TRIPLE SULFA CREAM produce dramatic bactericidal and bacteriostatic response; exerting maximum individual activity at different pH levels and collectively maintaining this activity throughout the elevated pH range of the infected vagina.

TRIPLE SULFA CREAM, aided by its Urea Peroxide component, eliminates necrotic tissue and accelerates healthy granulation without scar-tissue.

Nervous Exhaustion

Practitioners often encounter patients whose ill-health is due mainly to emotional or neurotic disturbance. Frequently there appears to be no physical basis and their principal symptoms are usually undue nervousness, fatigue and poor appetite.

For these mildly neurasthenic and exhausted cases 'BEPLETE' Wyeth is uniquely appropriate. It contains Phenobarbitone and Vitamin B-complex as an appetising Elixir, and so provides a quieting relaxation, while at the same time supplying nutritional factors known to be essential for the energy requirements of nervous metabolism.

'BEPLETE' contains:—
Phenobarbitone B.P. 1 gr.; Aneurine Hydrochloride 1.5 mg.; Riboflavin 1.0 mg.; Pyridoxine Hydrochloride 0.33 mg.; Nicotinamide B.P. 10.0 mg.; Pantothenyl Alcohol 0.2 mg. (equivalent to 0.212 mg. Pantothenic Acid); Alcohol 15%.

INSTANT HOT WATER —IN THE DOCTOR'S SURGERY

Doctors need hot water at irregular intervals, but when they want it they must have it at once. This need is met completely and economically by Ascot instantaneous gas water heaters. Every Ascot heater delivers hot water directly the tap is turned on and maintains the flow for as long as required—they never run cold.

Ascots are easy to install and economical in use—gas is consumed only while hot water is actually running. The boiling water heater (illustrated) is particularly suitable for the surgery. It delivers boiling water in less than a minute, and by the operation of a three-heat control will supply hot or warm water at will.

See this and other models at your local gas showrooms or send for descriptive leaflets.

YOU'D HARDLY CALL THEM MILKSOPS BUT—

How would YOU maintain a high-protein diet?

WHEN YOU PRESCRIBE a high-protein diet today it is worth remembering that a casein product such as Sanatogen will provide your patient with all the nutritive protein of meat—with none of the rationing difficulties. The protein value of a normal daily dose of Sanatogen is equal to the amount in 6 oz. of lean beef. The use of Sanatogen is one of the best and most practical ways today of ensuring a high-protein diet in such conditions as malnutrition, convalescence, certain types of nephritis and hepatitis, toxæmia of pregnancy, sprue, coeliac disease and colitis, after severe burns or other injuries, and also during the dietary treatment of obesity. Extra protein needed in pregnancy and lactation can be supplied by Sanatogen and it is excellent in diabetes mellitus as it contains no carbohydrate.

95% PROTEIN—NO CARBOHYDRATE

Sanatogen contains 95% casein with the addition of 5% sodium glycerophosphate. The purity and quality of its protein content are unsurpassed. Containing neither fats nor carbohydrates, Sanatogen is absorbed almost twice as quickly as casein dissolved by sodium, as shown by physiological and clinical experiments.

INDICATIONS. Sanatogen can be recommended when a high-protein diet is prescribed, especially if the absorptive powers of the digestion are feeble, and is an invaluable supplement to the ordinary diet. Practitioners who wish to carry out their own clinical tests will be given every help. Please write to the Medical Department, Genatosan Ltd., Loughborough, Leicestershire.

Prevention of Dressing Trauma

Jelonet is a dressing for all wounds—its non-adherent properties protect the delicate epithelium and prevent dressing trauma, enabling healing to continue undisturbed. It is used extensively in the treatment of burns and as a dressing following skin-grafting operations. It is non-toxic and compatible with Penicillin and all other antibiotics, and may be used as a means of drainage, or as a packing for deep granulating wounds. It may also be used as an adjuvant in the treatment of varicose ulcers by compression bandaging, and as a means of protecting the skin from irritating discharges. Jelonet may be prescribed by name under the N.H.S. (Form E.C.10) in the following sizes:— single pieces in envelopes, tins containing

5, 10 or 36 pieces, each piece $3\frac{3}{4}$ " x $3\frac{3}{4}$ ".

After extensive clinical trials, here is the latest Gillies equipment—compact as ever and readily adaptable to all conditions and all types of gas cylinder.

The Gillies III combines three different circuits in one. It provides for circle-type closed circuit anaesthesia, continuous flow, and atmospheric air with the volatile agents. As with the Boyles Apparatus a Waters Absorber (not included) may be used for "to and fro" closed circuit administration. Incorporating a carbon dioxide absorber the Gillies Mark III is in fact the smallest complete apparatus that combines all these functions.

In hospitals it is equally convenient on a stand or a table; for Service use it will fit in with emergency arrangements. Full details will gladly be supplied on request.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of call-up for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical War Committee and (in Scotland) the Scottish Central Medical War Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that he obtains it without delay. Under present arrangements the Committees also normally allow an "R" practitioner to hold a Second House Officer post (£400) and a Senior House Officer post (£670), provided in each case that the higher appointment is secured before the termination of the practitioner's current appointment.

"R" practitioners may not accept Third House Officer posts (£450 per annum) unless they have obtained the special permission of the C.M.W.C. or (in Scotland) the Scottish C.M.W.C.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

(5215)

HIS MAJESTY'S COLONIAL SERVICE, Malaya

Doctors having medical qualifications registrable by the General Medical Council in the United Kingdom, with one or more years' experience after qualification, are required for appointment as

MEDICAL OFFICERS AND MEDICAL OFFICERS OF HEALTH

for general medical and health duties. A limited number of practitioners liable for call up under the National Service Act, 1948, may apply, and if appointed will be granted indefinite deferment of call up on completion of a minimum period of one tour of three years in the Malayan medical service. Appointment is available (a) on probation for permanent establishment, (b) on employment from the National Health Service, and (c) on short term contract with gratuity. (a) **Permanent terms.** Subject to three years' probation, appointment is permanent with pension (non-contributory) at age 55. Salary is paid in the scale £952 by £42 to £1,204 to £1,274 by £42 to £1,652 per annum. There are many posts, specialist and administrative, available on promotion carrying higher salaries (up to about £2,400 for the highest post). Promotion is often made before reaching the top (£1,652) of the long scale. There is also a cost-of-living allowance at varying rates, according to family circumstances, subject to maximum of £336 per annum for single men and of £707 per annum for married men with children (both rates higher when stationed in Singapore). Note. Doctors with more than one year's approved experience after age 25 (including service in His Majesty's Forces) enter the salary scale at points above the minimum according to their experience; and four increments of salary are also given to holders of approved higher qualifications (e.g. F.R.C.S., M.R.C.P., D.P.M., D.A., etc.). (b) **National Health Service.** Doctors may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Malayan salary on leaving Malaya at the end of their engagements. Emoluments as under (a) including incremental credit for experience and higher qualifications as in note under (a). Doctors so appointed may be considered for permanent terms at any time during their Colonial employment provided they surrender their rights to the resettlement grant and payment by Malayan Governments of superannuation contributions. (c) **Contract terms.** The contract will be for three years' resident service, renewable for a further tour of three years by mutual agreement. Salary and cost-of-living allowance as under (a) including incremental credit for experience and higher qualifications as in note under (a). In addition a gratuity earned at the rate of £300 to £450 per annum, according to salary, is paid on expiry of contract. Doctors on contract may be considered for appointment to the permanent establishment at any time on their agreeing to surrender their gratuity earning rights. In all three types of appointment the rates of salary and gratuity refer to doctors eligible for expatriate terms under Malayan Regulations (i.e. those whose permanent homes are in the United Kingdom, Ireland, Australia, Canada, etc.). The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife, and children under the age of ten (not exceeding four persons besides himself) on appointment and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. The social and recreational facilities in Malaya are good. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No 27215/242/51). (5187)

UNIVERSITY APPOINTMENTS

THE BRITISH EMPIRE CANCER CAMPAIGN invites applications for Fellowships in Cancer Research. These Fellowships will be intermediate between the Campaign's existing Senior and Junior Fellowships, and will normally be tenable for five years at a salary of £1,500 by £100 to £1,900 per annum. Fellowships are full-time and will carry superannuation. Fellowships are open to any person of British nationality who, at the date of election, has taken a degree in any faculty in any university in the British Empire approved by the campaign, or who, if a female, has passed an examination which would have entitled her, if a male, to take any such degree. The possession by a Fellow at the date of election of a medical diploma registrable in the United Kingdom will be accepted as a qualification for a Fellowship in lieu of a degree. Elections will take place in June, 1952, and work, if possible, should be begun before the end of the year. Fellows must carry on their research initially in Great Britain or in Northern Ireland, and only at the place at which they are authorized by the Campaign to work. The fares of successful candidates from overseas will be paid by the Campaign. The closing date for the receipt of applications is May 1, 1952. For further particulars and application forms apply to the Secretary-General, British Empire Cancer Campaign, 11, Grosvenor Crescent, Hyde Park Corner, London, S.W.1. (5404)

A NEW POTENT INEXPENSIVE ANTISEPTIC

ROCCAL is a new inexpensive hospital antiseptic of which the active ingredient is benzalkonium. In hospitals in Canada, Australia and the United States benzalkonium antiseptics are now more widely used than any other antiseptic.

More than 500 published references give bacteriological and clinical support to the value of this material which is now manufactured in Britain for the first time.

Apart from the clinical side, Roccal has the important advantage of being very cheap, when bought in the most economical way. A booklet giving full data on Roccal is now available — may we send you a copy.
