In Para-nasal infections ARGYROL provides
physiological action
without CNS stimulation
or rebound congestion

● A return to normal function by the decongestive, demulcent and bacteriostatic actions of ARGYROL is achieved without the side-effects and rebound so frequent with many vasoconstrictors. In the solution of para-nasal problems, the ultimate advantages of using ARGYROL are readily apparent.

The ARGYROL Technique

1. The nasal meatus . . . by 20 per cent ARGYROL instillations through the nasolacrimal duct.
2. The nasal passages . . . with 10 per cent ARGYROL solution in drops.
3. The nasal cavities . . . with 10 per cent ARGYROL by nasal tamponage.

Its Three-fold Effect

1. Decongests without irritation to the membrane and without ciliary injury.
2. Definitely bacteriostatic, yet non-toxic to tissue.
3. Stimulates secretion and cleanses, thereby enhancing Nature's own first line of defense.

There is no

**FERROUS
GLUCONATE**

THIS MAJOR ADVANCE IN THE FIELD OF ORAL-IRON THERAPY

... is presented in ELIXIR CEREVON in combination with the important Vitamin B factors, aneurine hydrochloride, nicotinamide and riboflavin. Ferrous Gluconate possesses advantages over ferrous sulphate in that it is more readily absorbed by the stomach and utilized by the haemopoietic system without giving rise to gastric disturbance, even in patients who have shown intolerance to other forms of iron.

The high palatability of ELIXIR CEREVON is provided by 15% natural blackcurrant juice with glucose,

which assists absorption and provides each teaspoonful of the Elixir with 4.5 mgm. Vitamin C. INDICATIONS: For the treatment of the secondary anaemias of pregnancy and malnutrition and as a reconstructive tonic after severe illness.

FORMULA:

Ferrous Gluconate, 0.3 gm.

Aneurin. Hydrochlor., 1 mgm.

Riboflav., 1 mgm.

The Treatment of Asthenia

Bulk manufacturing process

Full and rapid recovery from illness or following surgical operations may be the more readily achieved if liver extract, iron and vitamins are supplied to the patient to facilitate blood regeneration. Even a relatively small fall in the hæmoglobin level in patients otherwise reasonably healthy may manifest itself in the form of general asthenia and proneness to fatigue. HEPRONA, a preparation containing Hepatex liver

extract, iron, members of the Vitamin B complex and glycerophosphates, is an excellent tonic in such cases and is suitable both for adults and children.

WATCHFULNESS and PRENATAL CARE . . .

Prenatal

CAPSULES

Lederle

Especially during pregnancy, medical watchfulness and prenatal care—with careful attention to adequate nutrition—have been shown to pay rich dividends of health to both mother and child. The dietary factors for which demand is particularly intensified are proteins, minerals and vitamins. The need for them may be increased by as much as one hundred per cent.

The amount of protein in the diet can be calculated. However, clinical experience suggests that, since no practical method exists for assaying the mineral and vitamin content of the obstetric patient's diet, such supplementation is an important part of the management of pregnancy. The so-called toxæmias of pregnancy, it has been suggested, are in reality states of nutritional deficiency. Throughout the period of gestation, PRENATAL CAPSULES *Lederle* provide a balanced formula of vitamins and minerals—an important dietary supplement—to assure optimum reserves. Each constituent of PRENATAL CAPSULES assures a measurable daily supply of these essential nutritional factors for the pregnant woman to maintain, or to restore, a normal vitamin-mineral tissue balance.

Each capsule contains. Vitamin A, 2,000 I.U., Vitamin D, 400 I.U., Thiamine Hydrochloride (B_1), 2 mg., Riboflavin (B_2), 2 mg., Ascorbic Acid (C), 35 mg., Nicotinamide, 7 mg., FOLVITE* Folic Acid, 1 mg., Calcium (in CaHPO_4) 250 mg., Phosphorus (in CaHPO_4), 190 mg., Dicalcium Phosphate Anhydrous (CaHPO_4) 869 mg., Iron (in FeSO_4) 6 mg., Ferrous Sulphate Exsiccated, 20 mg., Manganese (in MnSO_4), 0.12 mg. *Regd. Cecon greatly simplifies the administration of ascorbic acid to children. All a mother has to do is to drop Cecon into the milk, cereal or other food — and mix it. Taken in this manner, it cannot be detected and is, therefore, especially suitable for supplementing the diets of infants and small children. • Accuracy in dosage is obtained by the dropper which is supplied with every bottle of Cecon, and you need only prescribe the number of drops that your patient is to receive. • Cecon does not curdle milk, does not oxidise or settle out, does not become gummy or sticky in the bottle or dropper, and does not require refrigeration. During use it can be kept on the pantry shelf without change in potency. • Cecon is especially suitable for infants, but it may also be prescribed for older children and adults. Supplied in 10 cc. bottle with a dropper.

Trufood or some other milk food — what's the difference?

Humanised Trufood is different because it is not just "another dried cow's milk". Cow's milk is, of course, our raw material. But the resemblance between Trufood and other dried milk foods ends there. The process of its manufacture makes Trufood a food specifically adapted to the nutritional needs of the infant who must be artificially fed. Because of this we sincerely believe that Trufood is the most satisfactory alternative for the baby who cannot have breast milk.

TRUFOOD

If you would like to know more about Trufood — how it is made, and why we think that it is the most satisfactory substitute for breast milk — write to the Trufood Professional Information Service, Green Bank, London, E.1. This service has been formed specially to answer questions from the medical and nursing professions, about infant foods.

SOLUBILITY 98%

The solubility curve of Urolucosil* reaches a maximum of 98% at pH 7. The product is consequently ideal for treatment of *B. coli* infections of the urinary tract. In such conditions high urinary concentration is essential: during Urolucosil therapy, therefore, only the minimum amount of fluid should be taken. This would appear to be directly contrary to normal practice with sulphonamides, but the high solubility combined with a low percentage of acetyl derivatives in Urolucosil ensures that a dose so small as 0.1G. Urolucosil four-hourly will give a urinary concentration as high as 20 mg. per 100 c.c. — a concentration more than adequate for sterilization of the urine. The smallness of the dose and the low acetylation rate combine with the high solubility to make the risk of side-effects negligible with Urolucosil.

Each tablet contains 0.1G. 2-sulphanilamido-5-methyl-1-thio-3 : 4-diazole.

SUCCESSFUL TREATMENT OF VARICOSE ULCERS

RECENT clinical trials further confirm that Viacutan (1% silver di-naphthylmethane disulphonate) is an extremely powerful antibacterial and healing agent in the various types of varicose ulceration. The bacterial infection of the ulcerated area which leads to enlargement and deepening of the ulcer almost invariably yields to applications of Viacutan.

The success of Viacutan is due to its unique attributes—it is active against both Gram-positive and Gram-negative organisms even in the presence of blood, pus and serum, and penetrates deeply into the tissues without destroying them. On the other hand it actively promotes cell-growth, with healthy granulation.

Tight and firm bandaging of the whole leg is essential in treating ulcers with Viacutan, and the after-care is highly important, but for all cases, suppression of infection and promotion of healing with Viacutan is of paramount value.

3-HYDROXY-2-PHENYLCINCHONINIC ACID

Recent experimental work suggests that H.P.C. may act as a pituitary stimulant to increase the production of endogenous A.C.T.H. and hence may be of value in those conditions which have already been shown to be amenable to treatment with this hormone. Clinical trial has partially substantiated this suggestion by showing that H.P.C. has a beneficial action in rheumatic fever, some cases of rheumatoid arthritis and in scleroderma. This compound, prepared in our research laboratories during an investigation of pituitary stimulants, is available in limited quantities for clinical trial. DALMAS FIRST-AID DRESSINGS ACCELERATE HEALING

*An advanced type of
first aid dressing,*

The medical profession is well aware that in spite of the advent of the sulphonamides and penicillin, 5-aminoacridine hydrochloride holds a definite place in wound therapy. Dalmas first aid dressings are now impregnated with 5-aminoacridine hydrochloride.

This effective antiseptic has a bactericidal action against *B. Proteus* and other Gram-negative organisms which are unaffected by penicillin and the sulphonamides.

This is an additional improvement to the outstanding qualities of Dalmas dressings. They are waterproof, greaseproof, and washing can be done while they are on. They stick tight, do not fray or catch in clothes; they stretch in every direction and, being skin-coloured, hardly show.

**Daimler Limousine
Ambulance Service**

It is often necessary for patients to travel by road. A normal car is usually too fatiguing, yet in many cases the patient wishes to avoid travelling in a public ambulance.

This need is met by engaging a Private Limousine Ambulance from Daimler Hire Ltd. The Ambulance has the appearance of a large private limousine and does not attract attention from the public.

A fully trained attendant accompanies each driver and both are competent stretcher bearers. Each Limousine Ambulance is specially designed for the purpose and is equipped with a swivelling bed, folding carrying chairs, canvas carrying slings and sick-room cabinet. Air beds are available if required. Two comfortable chair-seats are provided for friends. Adequate heating and ventilating is automatically assured.

HIS MAJESTY'S COLONIAL SERVICE, Malaya

Doctors having medical qualifications registrable by the General Medical Council in the United Kingdom, with one or more years' experience after qualification, are required for appointment as

**MEDICAL OFFICERS AND MEDICAL OFFICERS
OF HEALTH**

for general medical and health duties. A limited number of practitioners liable for call up under the National Service Act, 1948, may apply, and if appointed will be granted indefinite deferment of call up on completion of a minimum period of one tour of three years in the Malayan medical service. Appointment is available (a) on probation for permanent establishment, (b) on employment from the National Health Service, and (c) on short term contract with gratuity. (a) **Permanent terms.** Subject to three years' probation, appointment is permanent with pension (non-contributory) at age 55. Salary is paid in the scale £952 by £42 to £1,204 to £1,274 by £42 to £1,652 per annum. There are many posts, specialist and administrative, available on promotion carrying higher salaries (up to about £2,400 for the highest post). Promotion is often made before reaching the top (£1,652) of the long scale. There is also a cost-of-living allowance at varying rates, according to family circumstances, subject to maximum of £336 per annum for single men and of £707 per annum for married men with children (both rates higher when stationed in Singapore). Note. Doctors with more than one year's approved experience after age 25 (including service in His Majesty's Forces) enter the salary scale at points above the minimum according to their experience; and four increments of salary are also given to holders of approved higher qualifications (e.g. F.R.C.S., M.R.C.P., D.P.M., D.A., etc.). (b) **National Health Service.** Doctors may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Malayan salary on leaving Malaya at the end of their engagements. Emoluments as under (a) including incremental credit for experience and higher qualifications as in note under (a). Doctors so appointed may be considered for permanent terms at any time during their Colonial employment provided they surrender their rights to the resettlement grant and payment by Malayan Governments of superannuation contributions. (c) **Contract terms.** The contract will be for three years' resident service, renewable for a further tour of three years by mutual agreement. Salary and cost-of-living allowance as under (a) including incremental credit for experience and higher qualifications as in note under (a). In addition a gratuity earned at the rate of £300 to £450 per annum, according to salary, is paid on expiry of contract. Doctors on contract may be considered for appointment to the permanent establishment at any time on their agreeing to surrender their gratuity earning rights. In all three types of appointment the rates of salary and gratuity refer to doctors eligible for expatriate terms under Malayan Regulations (i.e. those whose permanent homes are in the United Kingdom, Ireland, Australia, Canada, etc.). The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife, and children under the age of ten (not exceeding four persons besides himself) on appointment and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. The social and recreational facilities in Malaya are good. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No 27215/242/51). President: The Most Hon. the MARQUESS of EXETER, K.G., C.M.G., A.D.C. Medical Supt.: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This Registered Hospital is situated in 130 acres of park and pleasure grounds. Voluntary patients who are suffering from incipient mental disorders or who wish to prevent recurrent attacks of mental trouble, temporary patients and certified patients of both sexes are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male or female, in Hospital or in one of the numerous villas in grounds of the various branches can be provided.

WANTAGE HOUSE.—This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of Mental and Nervous Disorders by the most modern methods; insulin treatment is available for suitable cases. It contains special departments for hydrotherapy by various methods, including Turkish and Russian baths, the prolonged immersion bath, Plombières treatment, etc. There is an Operating Theatre, a Dental Surgery, an X-ray Room, an Ultra-Violet Apparatus, and a Department for Diathermy and High-frequency Treatment. It also contains Laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK.—Two miles from the main Hospital there are several branch establishments and villas situated in a park and farm of 650 acres. Milk, meat, fruit, and vegetables are supplied to the Hospital from the farm, gardens, and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, and fruit-growing.

BRYN-Y-NEUADD HALL.—The seaside house of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan amidst the finest scenery in North Wales. On the North-West side of the Estate, a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout-fishing in the park.

At all the branches of the Hospital there are cricket grounds, football and hockey grounds, lawn tennis courts (grass and hard courts), croquet grounds, golf courses, and bowling greens. Ladies and gentlemen have their own gardens, and facilities are provided for handicrafts such as carpentry, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: Northampton 4354 (3 lines)), who can be seen in London by appointment.
