## PESSARIES

the modern answer to Gentian Violet in non-specific cervicitis

More and more doctors are prescribing PRUVAGOL pessaries to replace the old-fashioned treatment with Gentian Violet.

PRUVAGOL pessaries are suitable in all cases which respond to Gentian Violet and have the advantage of being non-staining and easy for the patient to apply herself.

Leading gynaecologists have proved that PRUVAGOL will clear up the clinical condition of non-specific cervicitis, even of many years' duration and resistant to other forms of treatment, with only a few applications. Pessaries in packings of 12, 50, and 100; also cream in tubes with applicators and special hospital packs.

## When coughing causes insomnia

IN TRACHEITIS and bronchitis the sleeplessness caused by a persistent, unproductive cough can be very exhausting. Tusana Cocillana Cough Linctus is very valuable in such cases. It provides a blend of expectorants to loosen the tenacious mucus in the upper air passages and the central sedative, codeine, to depress the cough reflex.

By breaking the vicious circle of coughing and irritation, Tusana allows the patient to sleep and gather strength for recovery. The tendency of codeine to cause constipation is offset by the inclusion of a little extract of senna in the formula.

## Oral Iron Therapy

The main disadvantage with the majority of oral iron preparations is that they cause gastro-intestinal disturbance. It is thus often impossible to administer sufficient iron by the oral route fully to restore the hæmoglobin level to normal. Colloidal ferric hydroxide in the form of Colliron overcomes this great disadvantage as the iron is presented in a non-irritant form and is readily tolerated even in large dosage over a prolonged period.

### OUTSTANDING ADVANTAGES OF COLLIRON INCLUDE:—

- 1 *It is pleasant to take.*
- 2 *It very rarely causes gastro-intestinal disturbance.*
- 3 *The iron is present in a non-irritant form.*
- 4 *It is suitable for prolonged therapy even in young children or infants.*
- 5 *It does not stain the teeth.*

# VERILOID<sup>Trade Mark</sup>

## IN HYPERTENSION

The patient with moderate hypertension, constituting the great bulk of hypertensives seen clinically, is the one that can benefit most from Veriloid. In his management, dosage is more simple, and the clinical response is as a rule excellent.

By controlling hypertension in its earlier stages, much can be accomplished. Many organic changes directly related to a sustained elevation of blood pressure can be prevented, expanding the years of physical and mental usefulness of the patient.

Veriloid — a distinctive, biologically standardised fraction of *Veratrum viride* — exerts its well-defined hypotensive action without sacrifice of postural reflexes so important for comfortable living. The average daily dose of from 9 to 15 mg. given in divided doses three times a day usually produces a significant, sustained reduction in arterial tension. For optimal results, dosage should be carefully adjusted to the needs and tolerance of the individual patient.

Veriloid is available on prescription only through all pharmacies in 1.0 mg. tablets in bottles of 100 and may be prescribed on Form E.C.10 without restriction. Literature available on request.

## In the Service...

**Dietotherapy** The physiological basis of "the longings of pregnancy" is, of course, plain hunger induced by the additional demands of foetal growth and the extra requirements for maintenance of maternal well-being.

**For Mother and Child** What expectant mothers "long for" is extra food in quickly accessible and palatable form. While treatment therefore suggests itself, present-day shortages and rationing make the purchase of supplementary foods a difficult problem, especially during pregnancy, when shopping activities are necessarily restricted.

**In the Service of Obstetrics** For satisfying the keen-edged appetite of pregnancy, the prescription is—a quickly prepared, tasty meal consisting of "proximate principles" and vitamins—as comprised in 'Ovaltine'. This delicious food supplement provides malt, milk, cocoa, soya, eggs and additional vitamins; it is readily available and is easily made up; meticulous laboratory control during different stages of manufacture ensures its entire purity and highest possible standard of quality.

For pre-natal alimentation both for maternal strength and foetal development, 'Ovaltine' is the preferred food beverage.

*Notes on High-Protein Diets*

(1)

## PROTEIN TREATMENT OF OBESITY

*In the treatment of obesity by dietary correction the intake of calories should be limited to between 1,000 and 1,200 calories a day, and the patient should be supplied with optimum quantities of protein, vitamins and minerals. Thus the patient is forced to live for a time on his own fat resources and weight falls.*

**THE MOST PRACTICAL METHOD TODAY**

At least 65 grams of protein should be given daily in order to ensure replacement of that lost by daily catabolic processes and to enable the patient to burn his own fat. In addition, protein has a high-specific dynamic action and a role in thyroid function.

Owing to the rather meagre dietary allowance available today, the most practical method of guaranteeing this daily amount of protein is to add Sanatogen protein supplement to the patient's diet. Sanatogen contains 95% casein combined with 5% sodium glycerophosphate and has a specific nutrient and tonic action. It supplies all the essential amino acids together, has a high rate of utilisation, and is easily digested and rapidly absorbed.

Sanatogen is the only proprietary protein supplement containing neither fats nor carbohydrate. The fact that animal protein is normally closely associated with fat enhances the value of fat-free Sanatogen in obesity diets.

**EQUAL TO 6 OZ. LEAN BEEF DAILY**

Taken three times daily, Sanatogen provides the patient with the equivalent protein nourishment of 6 oz. of lean beef. It is very easily administered. Normally taken mixed as a hot or cold drink, Sanatogen can also be sprinkled on food or mixed in cooked dishes. The routine addition of Sanatogen to the patient's diet in this manner is the most practical solution to the difficult problem of maintaining a high-protein intake today.

Practitioners who wish to carry out their own clinical tests will be given every help. Please write to the Medical Department, Genatosan Ltd., Loughborough, Leicestershire, for further information and medical samples.

# Infantile Scurvy and Sub-Scurvy

## THE INFLUENCE OF VITAMIN C DEFICIENCY

In the case of a baby which is pale and fretful ; not feeding or thriving well ; showing low resistance to infection and slow healing in the event of wounds, it is often advisable to examine the possibility of a lack of Vitamin C as the basic cause.

If the child is *BREAST FED* it is probable that the mother is not eating a sufficiency of fresh fruit and vegetables or is in poor health with anorexia, anaemia and fatigue. She may indeed be suffering from sub-scurvy herself, yet wishes to continue breast feeding.

If the child is *BOTTLE FED*, the mother may have omitted to give some fresh fruit juice, possibly because the baby may be sick on such additions. It is well to remember also that cow's milk has less than one third of the Vitamin C content of human milk and that this is further reduced by pasteurisation.

In order to remedy Vitamin C deficiency and so restore the devitalised health which may otherwise end in symptoms of scurvy with its painful muscular haemorrhages and rapid heart failure, the use of Delrosa Rose Hip Syrup is confidently recommended. Delrosa is the richest natural source of Vitamin C, is very palatable and quickly absorbed. It provides all the Vitamin C necessary for positive health, the development of new tissue (such as red blood cells, new bone and teeth cells) and for cementing the walls of blood vessels and other tissues. Because of its high Vitamin C content (57 mgms. per fluid oz.), Delrosa plays a large part in preventing bacterial infections and in establishing immunity.

Delrosa is obtainable from all chemists.

## Are you 'at Home' to Germs

Surely the provision of a means of protection against airborne bacteria is of prime importance in your consulting and waiting rooms?

It is here that you come into close contact with your patients, and they with each other. Here where the risk of cross-infection is so great.

A Hanovia Bactericidal Unit generating bactericidal ultra-violet rays, either suspended or wall mounted, is normally adequate for a medium-sized room. These units, made for A.C. mains, are quiet, automatic and inexpensive in operation.

## The facts about Glucose

**Glucose**, a term used to include a substance resulting from the partial hydrolysis of starch, is in practice a general description rather than a precise one. It is applied to medical preparations which contain additives that may not always be wanted and to commercial products of varying degrees of refinement. To identify Glucose in its purest form, and *only in this form*, the term Dextrose is used.

**Dextrose**, as found in the blood and tissues, is the sugar into which the body converts all carbohydrates. Requiring neither digestion nor chemical alteration, Dextrose is used by the body as a source of immediate energy.

The Dextrose (pure medicinal Glucose) produced by the Pharmaceutical Division of Corn Products Company Limited is prepared in two convenient forms:—

### **Dextrosol Powdered Glucose**

This contains no additives of any kind. It can be taken in large quantities without causing nausea, and should be prescribed in all cases where a patient needs a source of heat and energy with the least demand on the digestion. Packed in 1 lb. cartons.

### **Dextrosol Karo Glucose Syrup**

for Infants and Children

An appetising blend of pure Glucose and selected carbohydrates, carefully balanced to provide the ideal sugar addition to the milk diet of artificially-fed infants. Of special value in cases of nutritional disorder. Spread on rusks, bread, etc., it offers an excellent supplementary source of energy for growing children. Packed in 1 lb. tins. A Karo Baby Book is available for the guidance of mothers.

Professional samples of both Dextrosol products will be gladly provided. For further information, doctors are invited to write to the Dextrosol Information Bureau, Wellington House, 125/130 Strand, London, W.C.2.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of call-up for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical War Committee and (in Scotland) the Scottish Central Medical War Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that he obtains it without delay. Under present arrangements the Committees also normally allow an "R" practitioner to hold a Second House Officer post (£400) and a Senior House Officer post (£670), provided in each case that the higher appointment is secured before the termination of the practitioner's current appointment.

"R" practitioners may not accept Third House Officer posts (£450 per annum) unless they have obtained the special permission of the C.M.W.C. or (in Scotland) the Scottish C.M.W.C.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

#### Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

**HER MAJESTY'S COLONIAL SERVICE, Malaya**

Doctors having medical qualifications registrable by the General Medical Council in the United Kingdom with one or more years' experience after qualification are required for appointment as **MEDICAL OFFICERS and MEDICAL OFFICERS OF HEALTH**

for General Medical and Health duties. Appointment is available (a) on probation for permanent establishment; (b) on employment from the National Health Service; and (c) on short-term contract with gratuity. (a) **Permanent terms.** Subject to three years' probation, appointment is permanent with pension (non-contributory) at age 55. Salary is paid in the scale £952 by £42 to £1,204 to £1,274 by £42 to £1,652 per annum. There are many posts, specialist and administrative, available on promotion carrying higher salaries (up to about £2,400 for the highest post). Promotion is often made before reaching the top (£1,652) of the long scale. There is also a cost-of-living allowance at varying rates, according to family circumstances, subject to maximum of £336 per annum for single men and of £707 per annum for married men with children (both rates higher when stationed in Singapore). (b) **National Health Service.** Doctors may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Malaya salary on leaving Malaya at the end of their engagements. Emoluments as under (a), including incremental credit for experience and higher qualifications as in note under (a). Doctors so appointed may be considered for permanent terms at any time during their colonial employment provided they surrender their rights to the resettlement grant and payment by Malayan Governments of superannuation contributions. (c) **Contract terms.** The contract will be for three years' resident service renewable for a further tour of three years by mutual agreement. Salary and cost-of-living allowance as under (a), including incremental credit for experience and higher qualifications as in note under (a). In addition a gratuity earned at the rate of £300 to £450 per annum, according to salary, is paid on expiry of contract. Doctors on contract may be considered for appointment to the permanent establishment at any time on their agreeing to surrender their gratuity earning rights. In all three types of appointment the rates of salary and gratuity refer to doctors eligible for expatriate terms under Malayan Regulations (i.e., those whose permanent homes are in the United Kingdom, Ireland, Australia, Canada, etc.). A limited number of practitioners liable for call up under the National Service Act, 1948, may apply, and if appointed will be granted indefinite deferment of call up on completion of a minimum period of one tour of three years in the Malayan Medical Service. The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates, which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife, and children under the age of ten (not exceeding four persons besides himself) on appointment and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. The social and recreational facilities in Malaya are good. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/242/51).
