A Matter of Minutes ...

THE common head louse, *Pediculus humanus capitis*, has proved completely vulnerable to SULEO HAIR EMULSION. One treatment with SULEO will clear the most heavily infested head in a matter of minutes. Formulated with D.D.T. plus Pyrethrum SULEO acts instantly and remains toxic for at least fourteen days, thus exceeding incubation period of nits by some days. An outstanding advantage is that the hair may be washed during this period without lessening the lethal effect.

SAFE TO USE—HARMLESS TO HAIR & SCALP—EASILY APPLIED—PLEASANTLY PERFUMED—UNDETECTABLE.

10 mg.	Aneurine Hydrochloride B.P.	100 mg.
0.5 mg.	Riboflavine B.P.	5 mg.
10 mg.	Nicotinamide B.P.	100 mg.
5 mg.	Pantothenic Acid. <small>(as calcium pantothenate)</small>	50 mg.

<i>Liver Injection (Crude), 2 U.S.P. units (injectable) per cc. q.s. to 1 cc.</i>		
<i>Phenol, 0.5 per cent as a preservative.</i>		

ADMINISTRATION

The dose of Bejectal with Liver which must be injected intramuscularly will vary with the severity of the condition treated. One cc. supplies a minimal therapeutic dose. When anxiety
makes life a burden...

To the patient suffering from emotional imbalance, the ordinary problems of everyday life can appear insuperable, and physical symptoms may also develop. The elimination of possible causes — economic, social, or domestic — is not always practicable; tactful reassurance must often be enhanced by active therapy. In cases of depression associated with anxiety 'Drinamyl' induces a sense of tranquillity and relieves mental and emotional distress.

' DRINAMYL '

is remarkably helpful

for topical application**

'FURACIN' SOLUBLE DRESSING has advantages over previous anti-microbial therapy. 'Furacin' Soluble Dressing is useful for topical application in the prophylaxis and treatment of surface infections occurring in wounds, burns, or ulcers.

These advantages over other antibacterials are possessed

also by 'Furacin' Solution which presents the active principle — 'Furacin' — in a liquid vehicle.

Pleasurable relaxation

In addition to the established use of Myanesin Elixir in the treatment of neurological conditions associated with muscular rigidity and tremor it has now been successfully employed in the relief of psychological states characterized by anxiety and tension.

Amer. J. Med. Sci., 1950, 220, 23, refers to a group of patients in which anxiety states and obsessional conditions

were present and which following the administration of mephenesin, the active constituent of Myanesin Elixir, obtained complete relaxation. Best results occurred in anxiety states, however chronic, and 47 out of 50 patients treated for this condition improved.

Dosage of from $\frac{1}{2}$ to 1 tablespoonful, one to six times daily, is suggested.

Dalmas Window Dressings

DALMAS window dressings have a central window through which operation wounds may be constantly observed at all stages of recovery. These dressings are sterile and remain sterile, and therefore can be applied in the theatre, over stitches and clips, immediately after the operation is completed.

They have adhesive margins at the side of the dressing. They may be sealed top and bottom with Dalmas waterproof strapping. There is no dragging of stitches or clips. The elastic properties of this dressing enable it to be moulded to the body contours.

The protective gauze covering is treated to ensure sterility, despite exposure to the air over several weeks. The residual anti-bacterial properties of the film help to inhibit the growth of organisms in the wound area. A group of eminent surgeons report that during a six-month period when Dalmas window dressings were used on 300 surgical cases, not a single case of sepsis arose.

Dalmas window dressings can be cut to fit a particular incision. And as they are waterproof, patients can be washed without inconvenience. They are cheaper to use than normal dressings, since they can be left in position over long periods.

In order to allow adequate aeration of the wound, and to prevent accumulation of moisture, it is usually desirable to leave the top and bottom of the dressing unsealed. In special cases where complete sealing is indicated, the top and bottom of the dressing may be closed by the application of Dalmas waterproof strapping.

Dalmas window dressings may be obtained direct from Dalmas Limited, Leicester, or through your usual supplier. They come in the following sizes:— 8" x 3", 8" x 4½", 16" x 4½", 12" x 3", 36" x 4½", 36" x 3".

Salary is paid in the scale 1952 by £42 to £1,204 to £1,274 by £42 to £1,652 per annum. There are many posts, specialist and administrative, available on promotion carrying higher salaries (up to about £2,400 for the highest post). Promotion is often made before reaching the top (£1,652) of the long scale. There is also a cost-of-living allowance at varying rates, according to family circumstances, subject to a maximum of £336 per annum for single men and of £707 per annum for married men with children (both rates higher when stationed in Singapore). **Note.** Doctors with more than one year's approved experience after age 25 (including service in Her Majesty's Forces) enter the salary scale at points above the minimum according to their experience; and four increments of salary are also given to holders of approved higher qualifications (e.g., F.R.C.S., M.R.C.P., D.P.M., D.A., etc.). (b) **National Health Service.** Doctors may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Malaya salary on leaving Malaya at the end of their engagements. Emoluments as under (a), including incremental credit for experience and higher qualifications as in note under (a). Doctors so appointed may be considered for permanent terms at any time during their colonial employment provided they surrender their rights to the resettlement grant and payment by Malayan Governments of superannuation contributions. (c) **Contract terms.** The contract will be for three years' resident service renewable for a further tour of three years by mutual agreement. Salary and cost-of-living allowance as under (a), including incremental credit for experience and higher qualifications as in note under (a). In addition a gratuity earned at the rate of £300 to £450 per annum, according to salary, is paid on expiry of contract. Doctors on contract may be considered for appointment to the permanent establishment at any time on their agreeing to surrender their gratuity earning rights. In all three types of appointment the rates of salary and gratuity refer to doctors eligible for expatriate terms under Malayan Regulations (i.e., those whose permanent homes are in the United Kingdom, Ireland, Australia, Canada, etc.). A limited number of practitioners liable for call up under the National Service Act, 1948, may apply, and if appointed will be granted indefinite deferment of call up on completion of a minimum period of one tour of three years in the Malayan Medical Service. The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates, which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife, and children under the age of ten (not exceeding four persons besides himself) on appointment and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. The social and recreational facilities in Malaya are good. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/242/51).
