

The importance of protein during pregnancy and the nursing period

CLINICAL observation shows that the increased protein anabolism during the latter part of pregnancy, and particularly during the nursing period, requires more protein than was at first considered necessary. Adequate protein is, therefore, desirable to ensure the ample supply of breast milk.

The inclusion of high-grade protein foods in the diet of pregnant women is now a standard practice. In cases where there is loss of appetite

or a general feeling of exhaustion, the diet can be effectively supplemented by protein foods in a form which is easy to assimilate.

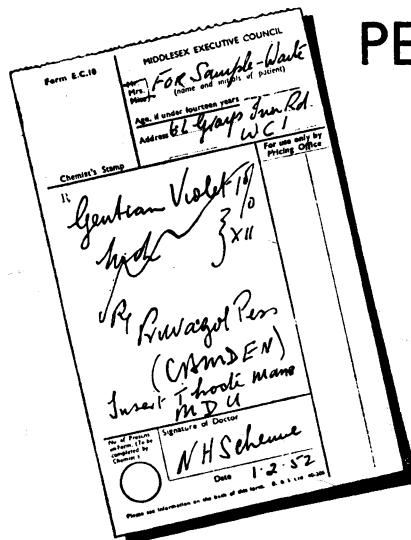

Brand's Essence is a first-class protein of animal origin. Being partly hydrolysed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support

convalescence and assists in restoring a positive nitrogen balance.

PRUVAGOL PESSARIES

the modern answer to Gentian Violet in non-specific cervicitis

More and more doctors are prescribing PRUVAGOL pessaries to replace the old-fashioned treatment with Gentian Violet. PRUVAGOL pessaries are suitable in all cases which respond to Gentian Violet and have the advantage of being non-staining and easy for the patient to apply herself.

Leading gynaecologists have proved that PRUVAGOL will clear up the clinical condition of non-specific cervicitis, even of many years' duration and resistant to other forms of treatment, with only a few applications. Pessaries in packings of 12, 50, and 100; also cream in tubes with applicators and special hospital packs.

Ferrous Gluconate

A Major Advance in the Field of Oral-Iron Therapy

... is presented in ELIXIR CEREVON in combination with the important Vitamin B factors, aneurine hydrochloride, nicotinamide and riboflavine. Ferrous Gluconate possesses advantages over ferrous sulphate in that it is more readily absorbed by the stomach and utilized by the haemopoietic system, without giving rise to gastric disturbance, even in patients who have shown intolerance to other forms of iron.

The high palatability of ELIXIR CEREVON is provided by 15% natural blackcurrant juice with glucose, which assists absorption and provides each teaspoonful of the Elixir with at least 5 mgm. Vitamin C.

INDICATIONS:

Secondary anaemias of pregnancy and malnutrition and as a reconstructive tonic.

ROBINSON'S

Robsoup

THE NEW WEANING FOOD
FOR BABIES

ROBSOUP is a concentrated bone and vegetable soup, ready cooked in powder form. The food constituents are different from and complementary to those of milk mixtures and cereals.

Robsoup mixes instantly with water at all temperatures to any consistency from a thin broth, suitable for adding to the baby's bottle, to a thick soup which may be fed from cup and spoon.

Robsoup is simple to use and economical—a 1/6d. tin gives ten helpings for a baby of five months. There is no waste with Robsoup. Only the amount required for the next meal is mixed at any one time. Being a dry powder, what is left in the tin will not go bad.

Therefore, provided the water used for mixing has been boiled and the cup and spoon are clean, Robsoup is safe from the danger of food infection and will not occasion gastro-enteritis.

Robsoup is made by a new process from peas, potatoes, carrots, yeast extract, cabbage, gelatin, edible bone phosphate, salt and onion. It is rich in iron (12 mg. per 100 gms.), calcium (400 mg. per 100 gms.) and vegetable protein (15.5%). Robsoup may therefore be given either as the first addition to milk or as the next step in weaning after the introduction of a cereal. Extensive tests have shown that babies thrive on Robsoup and like its flavour.

Penicillin (unlike the sulphonamides) is not inhibited by the presence of pus, and has proved highly effective both in acute sinusitis and in flare-ups of chronic sinusitis.

'Pendex'—providing the bacteriostatic action of penicillin, plus the aeration and drainage effected by 'Paredrinex'*—has proved particularly useful in such conditions.

'Pendex' can be used to irrigate the sinuses, followed by the displacement technique; or it may be administered by tampon.

Ph.239

Doctors, matrons and other hospital authorities have noticed that patients are more comfortable, more relaxed, as soon as they are placed on an Intalok mattress. The reason is shown in the illustration.

The background photograph shows a top-view section of an Intalok mattress. Each fine gauge spring is loosely interlinked with the next, throughout the whole length and breadth. The surface coils yield to first pressure—and as weight increases, many other springs combine to take the weight. The diagram shows what this scientific springing does, under the weight of the patient. The compression varies exactly with the contours of the body. Where weight is heaviest compression is unusually deep. There is no excessive resistance to cause aching or soreness to pressure points. The patient, in any position, is correctly and naturally supported. Thus there is no sagging, less tendency for the body to slip. The patient enjoys an exceptional degree of comfort on Intalok.

Here are other good reasons why hospital authorities are in favour of Intalok mattresses :

- 1 *The mattresses can be stoved; in fact they gain by stoving.*
- 2 *All metal parts are rustless, can be sterilized repeatedly.*
- 3 *Intalok mattresses have no tufts or piping to collect dust and germs.*
- 4 *The ticking is easily removable for laundering.*
- 5 *Existing hair mattresses can be converted to Intalok—the good hair being retained. This cuts costs.*
- 6 *Every Intalok springing unit is guaranteed for 10 years.*

The effects can be lessened

When the storm clouds gather in the mind of the woman at the menopause, much can be done to alleviate her apprehension and to ensure that she sails through the difficult years on an "even keel."

Euvalerol M, the ideal sedative in menopausal conditions, alleviates nervous phenomena and vasomotor disturbances and helps the woman at the menopause to weather the storms of emotional imbalance.

Composition : Euvalerol M contains a preparation obtained from valerian root from which the unpleasant odour characteristic of valerian is eliminated. To each fluid drachm (4 c.c.) of this odourless preparation of valerian are added $\frac{1}{4}$ grain (16 mg.) of phenobarbitone and 0.1 mg. of stilboestrol.

Presentation : Euvalerol M is supplied in bottles containing 4 oz. and 8 oz. It is also available in bottles of 20 oz. and 80 oz. for dispensing purposes.

Sedative and Therapeutic **TRISAN** [★] Hommel in Bronchial **ASTHMA**

TRISAN—Hommel is an established agent in the symptomatic treatment of bronchial asthma and related states. It combines in its formula both sedative and anti-spasmodic drugs of recognized performance.

COMPOSITION Physicians experienced in asthma have long recognized the value of concurrent prescription of Potassium Iodide and Chloral Hydrate; a small dose of Soluble Barbitone is added as a sedative adjuvant to enhance their therapeutic effect. Trisan therefore comprises —

<i>Iodide of Potassium B.P.</i>	6.03%
<i>Chloral Hydrate B.P.</i>	7.11%
<i>Barbitone Sodium B.P.</i>	0.24%
<i>Alcohol</i>	4.00%
<i>Excipient ad</i>	100.00%

CLINICAL INVESTIGATION shows that Trisan produces spasmolysis and relief of expectoration in nocturnal asthma; its sedative component satisfactorily encourages sleep and provides an additional value in asthma complicated by hypertension.

INDICATIONS Trisan is indicated in bronchial asthma, especially nocturnal; certain types of hypertension; allergic diathesis. It is contra-indicated in iodine allergy and hyperthyroidism.

DOSAGE Four fl. drachms in $\frac{1}{2}$ tumblerful of fluid during attacks or before retiring; prophylactically: 1 to 2 fl. drachms nightly for 2 to 3 weeks.

PACKING Standard: Bottles of 4 fl. oz.; Dispensing: 16 fl. oz.

Extract from an Annotation in the *British Medical Journal*
of January 5, 1952:

“The recent trial published* by the Medical Research Council subcommittee showed clearly that penicillin was at least as effective as aureomycin or chloramphenicol in the treatment of bacterial pneumonia—and very much cheaper. . . . Because it produces the most rapid response, the authors [of a report† of a trial at Philadelphia General Hospital] believe that it is best used even in cases where the pneumonia is not certainly bacterial but may be viral, since it is bacterial pneumonia which has the high mortality.”

Notes on High-Protein Diets

(1)

PROTEIN **TREATMENT OF** **OBESITY**

In the treatment of obesity by dietary correction the intake of calories should be limited to between 1,000 and 1,200 calories a day, and the patient should be supplied with optimum quantities of protein, vitamins and minerals. Thus the patient is forced to live for a time on his own fat resources and weight falls.

THE MOST PRACTICAL METHOD TODAY

At least 65 grams of protein should be given daily in order to ensure replacement of that lost by daily catabolic processes and to enable the patient to burn his own fat. In addition, protein has a high-specific dynamic action and a role in thyroid function.

Owing to the rather meagre dietary allowance available today, the most practical method of guaranteeing this daily amount of protein is to add Sanatogen protein supplement to the patient's diet. Sanatogen contains 95% casein combined with 5% sodium glycerophosphate and has a specific nutrient and tonic action. It supplies all the essential amino acids together, has a high rate of utilisation, and is easily digested and rapidly absorbed.

Sanatogen is the only proprietary protein supplement containing neither fats nor carbohydrate. The fact that animal protein is normally closely associated with fat enhances the value of fat-free Sanatogen in obesity diets.

EQUAL TO 6 OZ. LEAN BEEF DAILY

Taken three times daily, Sanatogen provides the patient with the equivalent protein nourishment of 6 oz. of lean beef. It is very easily administered. Normally taken mixed as a hot or cold drink, Sanatogen can also be sprinkled on food or mixed in cooked dishes. The routine addition of Sanatogen to the patient's diet in this manner is the most practical solution to the difficult problem of maintaining a high-protein intake today.

Practitioners who wish to carry out their own clinical tests will be given every help. Please write to the Medical Department, Genatosan Ltd., Loughborough, Leicestershire, for further information and medical samples.

SANATOGEN *for high-protein diets*

The word 'Sanatogen' is a registered trade mark of Genatosan Ltd., Loughborough, Leics.

For smooth gentle control of constipation

Agarol*, an emulsion of mineral oil and agar-agar with phenolphthalein, provides a treatment designed to re-

establish the correct pattern where bowel evacuation is deranged. The phenolphthalein in Agarol provides gentle threshold stimulation; the hydrophilic properties ensure a moist yet well formed stool; the agar-agar content supplements mucin deficiency; the highly emulsified mineral oil mixes readily with the intestinal contents to form a soft lubricated mass. The palatability of Agarol makes it acceptable to the most fastidious patient.

INDICATIONS For chronic constipation and intestinal auto-intoxication. For restoring sluggish bowel activity to normal regularity in the elderly. For expectant or nursing mothers. To obviate straining in patients with high blood pressure, tuberculosis or heart disease. To provide lubrication where hæmorrhoids or other painful anal conditions are present.

MEGALOBlastic ANAEMIAS

Marmite has been proved to produce a response in certain forms of megaloblastic anaemia, such as nutritional macrocytic anaemia, the anaemias of coeliac disease, idiopathic steatorrhoea and sprue, and in megaloblastic anaemia of pregnancy.

The mechanism by which Marmite acts is still unknown. It has been suggested that the folic acid in Marmite may be responsible; a more recent suggestion is that Marmite may contain folinic acid.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of call-up for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical War Committee and (in Scotland) the Scottish Central Medical War Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that he obtains it without delay. Under present arrangements the Committees also normally allow an "R" practitioner to hold a Second House Officer post (£400) and a Senior House Officer post (£670), provided in each case that the higher appointment is secured before the termination of the practitioner's current appointment.

"R" practitioners may not accept Third House Officer posts (£450 per annum) unless they have obtained the special permission of the C.M.W.C. or (in Scotland) the Scottish C.M.W.C.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR:** Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR:** Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER:** £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER:** Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER:** Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

COLONIAL MEDICAL SERVICE

Northern Rhodesia

TWO MEDICAL OFFICERS

are required in the Health Department of Northern Rhodesia, one to work under the supervision of the Chest Physician in clinical preventive and survey work in connexion with tuberculosis, and the other for general medical work in European and African hospitals, and, in addition, to undertake the duties of Anaesthetist to Surgical Specialists. All Medical Officers are liable to undertake general duties as required by the Director of Medical Services. Appointments can be made on a permanent basis with pension (non-contributory) on retirement at the age of 55, or on short-term contract with gratuity on satisfactory completion of engagement. Doctors in the National Health Service may resign from the National Health Service but retain their superannuation rights during their time in Northern Rhodesia (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Northern Rhodesia salary on leaving Northern Rhodesia at the end of their engagement. Salary scale ranges from £865 per annum to £1,590 per annum. Starting point in the scale is determined according to age, experience, and qualifications. A temporary cost-of-living allowance at the rate of 16 per cent of basic salary is payable, subject to a maximum of £211 4s. per annum. Pension is earned at the rate of 1/600th of the final pensionable emoluments for each completed month of service. The gratuity for contract service is payable on completion of the contract at the rate of £100 to £150 per annum. Free passages in both directions are provided for officer and wife, and assisted passages for children. Annual local leave is permissible, and generous home leave is granted after each tour of three years. Quarters are provided at rental of 10 per cent of salary. Income tax at local rates. Social and recreational amenities are good. The applicant for work under the Chest Physician should preferably have had postgraduate experience in this type of work. The Anaesthetist should have had at least one year's experience in the administration of anaesthetics. Applicants for either post must possess qualifications registrable in the United Kingdom. Application forms can be obtained from the Director of Recruitment (Colonial Service), Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/153/52). (9242)

HER MAJESTY'S COLONIAL SERVICE, Malaya

Doctors having medical qualifications registrable by the General Medical Council in the United Kingdom with one or more years' experience after qualification are required for appointment as

MEDICAL OFFICERS and MEDICAL OFFICERS OF HEALTH

for General Medical and Health duties

Appointment is available (a) on probation for permanent establishment; (b) on employment from the National Health Service; and (c) on short-term contract with gratuity. (a) Permanent terms. Subject to three years' probation, appointment is permanent with pension (non-contributory) at age 55. Salary is paid in the scale £952 by £42 to £1,204 to £1,274 by £42 to £1,652 per annum. There are many posts, specialist and administrative, available on promotion carrying higher salaries (up to about £2,400 for the highest post). Promotion is often made before reaching the top (£1,652) of the long scale. There is also a cost-of-living allowance at varying rates, according to family circumstances, subject to maximum of £336 per annum for single men and of £707 per annum for married men with children (both rates higher when stationed in Singapore). Note. Doctors with more than one year's approved experience after age 25 (including service in Her Majesty's Forces) enter the salary scale at points above the minimum according to their experience; and four increments of salary are also given to holders of approved higher qualifications (e.g., F.R.C.S., M.R.C.P., D.P.M., D.A., etc.). (b) National Health Service. Doctors may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of

20 per cent of the aggregate of their Malaya salary on leaving Malaya at the end of their engagements. Emoluments as under (a), including incremental credit for experience and higher qualifications as in note under (a). Doctors so appointed may be considered for permanent terms at any time during their colonial employment provided they surrender their rights to the resettlement grant and payment by Malayan Government of superannuation contributions. (c) Contract terms. The contract will be for three years' resident service renewable for a further tour of three years by mutual agreement. Salary and cost-of-living allowance as under (a), including incremental credit for experience and higher qualifications as in note under (a). In addition a gratuity earned at the rate of £300 to £450 per annum, according to salary, is paid on expiry of contract. Doctors on contract may be considered for appointment to the permanent establishment at any time on their agreeing to surrender their gratuity earning rights. In all three types of appointment the rates of salary and gratuity refer to doctors eligible for expatriate terms under Malayan Regulations (i.e., those whose permanent homes are in the United Kingdom, Ireland, Australia, Canada, etc.). A limited number of practitioners liable for call up under the National Service Act, 1948, may apply, and if appointed will be granted indefinite deferment of call up on completion of a minimum period of one tour of three years in the Malayan Medical Service. The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates, which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife, and children under the age of ten (not exceeding four persons besides himself) on appointment and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. The social and recreational facilities in Malaya are good. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/242/51). (5187)

HER MAJESTY'S COLONIAL SERVICE

Hong Kong

MEDICAL OFFICERS

are required for general duties in the Medical Department of Hong Kong. Appointment can be made on a permanent basis with pension (non-contributory) on retirement (the normal age of retirement is 55), or on short-term contract with gratuity on satisfactory completion of engagement. Salary scale, which includes pensionable expatriation pay, ranges from £1,530 per mensem to £2,548.33 per mensem (£1,147 10s. to £1,911 5s. per annum; one dollar equals 1s. 3d.). In addition, a temporary, variable, non-pensionable cost-of-living allowance is payable according to family circumstances, and may be as much as £427 per annum for a married officer with children. Pension is earned at the rate of 1/600th of the final pensionable emoluments for each completed month of service. Officers who prefer short contract terms earn a gratuity of £37 10s. for each completed three months' service (but no pension). Quarters are provided at rental of 1/8th of basic salary (i.e., from £117 to £204 per annum, according to salary). Income tax at local rates. Free passages in both directions are provided for officer, wife and up to three children under the age of 18. Annual local leave is permissible and generous home leave is granted after each tour of four years. Climate is favourable for Europeans; a cool dry winter with well marked change of seasons. Educational facilities are available. Candidates should be under 40 years of age and possess a medical qualification registrable in the United Kingdom. They should also have had a minimum of two years' postgraduate experience. Application forms can be obtained from the Director of Recruitment (Colonial Service), Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/164/52). (9243)
