A combination of qualities

The claims of 'Dettol' do not rest on any single quality desirable in an antiseptic, but rather upon the combination of several essential properties. It can be used at fully effective strengths with safety; without risk of poisoning, discomfort or damage to tissue. It retains a high bactericidal potency in the presence of blood, it is stable, and agreeable in use.

'D E T T O L' **THE MODERN ANTISEPTIC**

'Dettol' is available in 2 gallon and 5 gallon tins free of Purchase Tax *for dispensing purposes only*. Smaller sizes, including 1 gallon tins for public use are subject to Purchase Tax.

In the measurement of hearing loss, the Pure Tone Audiometer TF 895 conforms to the specification of the Committee on Electro-Acoustics appointed by the Medical Research Council. Each instrument, with its high-fidelity head set, is standardised against N.P.L. determinations and provides sinusoidal tones between 125 and 8000 cycles per second. The patient, who may be instructed orally through a crystal microphone, responds to acuity tests via the signal lamp on the instrument panel. A potent alkaloidal fraction of Veratrum viride — biologically standardised for hypotensive activity in mammals — a new active principle not heretofore available, for the treatment of hypertension.

An entirely new drug, Veriloid presents only the hypotensive ester alkaloids of *Veratrum viride* freed from the irritant and inert dross of the crude root. This active principle, because it is biologically standardised, is absolutely uniform in its pharmacological action.

Individualisation of dosage is essential for maximum therapeutic benefit. In the majority of patients the average daily requirement of 9 to 15 mg. given in divided dosage three times daily leads to a clinically significant drop in arterial tension brought about by relaxation of the smaller arterioles. This effect is readily maintained for as long as the drug is given, for tolerance to Veriloid usually does not develop. Concomitantly, gratifying subjective improvement is discernible by the patient.

Veriloid has been found effective in malignant hypertension, severe essential hypertension and in moderate elevation of the blood pressure. It is available on prescription through all pharmacies in slow dissolving tablets containing 1.0 mg., in bottles of 100 and 500. Veriloid may be prescribed on Form E.C.10 without restriction.

THE Original Germicidal Soap containing HEXACHLOROPHENE

**Tests show 95% reduction of Bacterial Flora compared
with 15% reduction with ordinary soap**

Cultural tests carried out in the United States showed a 95% reduction of bacterial flora as compared with 15% reduction with ordinary toilet soaps. Authors have stated that the remarkably lowered resident flora following the use of a soap containing Hexachlorophene has

not resulted from bacteriostasis but from actual killing. There is, too, a cumulative factor in Hexachlorophene which is important in maintaining low skin bacterial flora. In these investigations it was found that the maximum reduction

A large hospital in Britain reports:—"The incidence of septic skin conditions is increasing at the hospitals which we are using as a 'control' but it has not increased at the hospital where we are using DERL".

of bacterial flora was achieved after a period of 5 to 7 days, and did not return to normal for another 7 days after ceasing to use the soap. It follows, therefore, that the regular use of "Derl" will exert a continuous bacteriostatic effect between ablutions. No

cases of sensitization have been reported. Members of the medical profession are showing a keen interest in "Derl", the first all-British soap to contain Hexachlorophene. Samples will be gladly sent on request.

without CNS stimulation
or rebound congestion

● A return to normal function by the decongestive, demulcent and bacteriostatic actions of ARGYROL is achieved without the side effects and rebound so frequent with many vasoconstrictors. In the solution of para-nasal problems, the ultimate advantages of using ARGYROL are readily apparent.

The ARGYROL Technique

1. The nasal meatus . . . by 20 per cent ARGYROL instillations through the nasolacrimal duct.
2. The nasal passages . . . with 10 per cent ARGYROL solution in drops.
3. The nasal cavities . . . with 10 per cent ARGYROL by nasal tamponage.

Its Three-fold Effect

1. Decongests without irritation to the membrane and without ciliary injury.
2. Definitely bacteriostatic, yet non-toxic to tissue.
3. Stimulates secretion and cleanses, thereby enhancing Nature's own first line of defence.

A new approach to Vaso-Dilatation

*New powerful penetrative agent ensures
 subcutaneous penetration of histamine*

It has long been recognised that histamine, in dilating the capillaries, acts as a pain-reliever. In 'Algipan' the difficulty hitherto experienced in applying the drug to the subcutaneous layers without injection has now been overcome. The potent penetrative agent methyl nicotinate enables surface applications of histamine to reach the deeper tissues, where it promotes an increased flow of blood and relieves pain. A comforting rubefacient action is exerted by the glycol salicylate and capsaicin.

Aspirin tablets made soluble and palatable. A successful approach to a difficult problem.

It has long been known that aspirin, being an acid substance of low solubility, may act as an irritant to the gastric mucosa, producing inflammatory changes which may cause symptoms of dyspepsia. In massive dosage, or even in moderate dosage over a prolonged period, it may also, because of its acidity, encroach upon the alkali reserve. 'Solprin' tablets provide aspirin in a substantially neutral, stable, soluble and palatable form.

The therapeutic advantages of calcium aspirin over aspirin have long been stressed in medical literature. Aspirin is an acid substance only slightly soluble, and often behaving as a potential gastric irritant. Calcium aspirin, when free from decomposition products is neutral, highly soluble and bland. Unfortunately, however, calcium aspirin is unstable. The reaction by which it is produced is reversible, and the compound thus becomes increasingly contaminated with nauseous breakdown products, chiefly acetic and salicylic acids. The difficult problem of the preparation of calcium aspirin in stable and palatable tablet form has now been solved. Solprin embodies all the virtues of aspirin, but is free from the above defects of this valuable analgesic and those of calcium aspirin as ordinarily available. When placed in water, Solprin tablets yield a solution of calcium aspirin which is substantially neutral and palatable.

What is all this about spray-drying?

This modern low temperature process of drying milk foods preserves the colloidal condition of the protein on reconstitution and ensures that the fat is in the form of a finely diffused emulsion. Humanised Trufood is spray-dried. When Trufood is reconstituted, the resultant fluid, with the fat in the form of cream, has all the physical characteristics of true milk. This is one of the factors distinguishing Trufood from ordinary milk foods—another reason why Trufood is the most satisfactory alternative to breast milk.

Are Vaginal Tampons Prejudicial to Health?

An Investigation* concerned with the bacteriology of vaginal flora following the use of internal tampons was undertaken at the request and with the co-operation of the visiting gynaecologists to a London Women's hospital.

It is gratifying to find that this investigation confirms earlier work carried out in America and gives further support to the claim that Tampax can be confidently recommended as a convenient, comfortable and safe form of sanitary protection.

* Tampax tampons were used in this investigation.

EXTRACTS FROM THE REPORT:—

- ★ "Smears and cultures taken before and after each period showed no appreciable change in the bacterial flora of the vagina."
- ★ "None of the volunteers acquired monilia or trichomonal organisms during the period of study or developed erosions or vaginitis as a result of using the internal tampon."
- ★ "There was no aggravation of the condition or delay in healing following the use of tampons in the patients who had cervical erosions."
- ★ "In each case the underlying cause responded to treatment, and did not recur, which proves that the internal tampon does not act as an irritating foreign body."
- ★ "The rate of healing compared favourably with four control cases in which the perineal pad was used."
- ★ "The glycogen content was uninfluenced by the use of tampons."
- ★ "There was no appreciable alteration in the pH in the pre- and post-menstrual phases."
- ★ "Volunteers who had not previously used tampons stated that they did not cause the irritation usually found with the perineal pad."
- ★ "There was no evidence that vaginal tampons are prejudicial to health."

A new development in Weaning Food

NEW - SAFE
scientifically tested

As a result of experiment, the Makers of Bovril have evolved a thoroughly hygienic product that reaches a high nutritional standard, is easy to prepare and is remarkably inexpensive. The formula was evolved after consultation with several pædiatric specialists and has had successful hospital trials. The Weaning Food is in powder form and is marketed in small cubes in four varieties. It is composed of powdered lean beef, beef extract, potato powder, dried distillers' yeast, bone calcium phosphate and iron ammonium citrate. A purée can be prepared by adding boiling water to a crumbled cube of the Weaning Food. Because of its form, its hygienic method of manufacture, and as sufficient for one meal at a time can be prepared, danger of food infection is eliminated. A four-cube packet of Weaning Food costs 6d.; a meal for a 4-month-old baby costs only 1d.

4 CUBE PACKET

The facts about Glucose

Glucose, a term used to include a substance resulting from the partial hydrolysis of starch, is in practice a general description rather than a precise one. It is applied to medical preparations which contain additives that may not always be wanted and to commercial products of varying degrees of refinement. To identify Glucose in its purest form, and only in this form, the term Dextrose is used.

Dextrose, as found in the blood and tissues, is the sugar into which the body converts all carbohydrates. Requiring neither digestion nor chemical alteration, Dextrose is used by the body as a source of immediate energy.

The Dextrose (pure medicinal Glucose) produced by the Pharmaceutical Division of Corn Products Company Limited is prepared in two convenient forms:—

Dextrosol Powdered Glucose

This contains no additives of any kind. It can be taken in large quantities without causing nausea, and should be prescribed in all cases where a patient needs a source of heat and energy with the least demand on the digestion. Packed in 1 lb. & ½ lb. cartons.

Dextrosol Karo Glucose Syrup

for Infants and Children

An appetising blend of pure Glucose and selected carbohydrates, carefully balanced to provide the ideal sugar addition to the milk diet of artificially-fed infants. Of special value in cases of nutritional disorder. Spread on rusks, bread, etc., it offers an excellent supplementary source of energy for growing children. Packed in 1 lb. tins. A Karo Baby Book is available for the guidance of mothers.

Professional samples of both Dextrosol products will be gladly provided. For further information, doctors are invited to write to the Dextrosol Information Bureau, Wellington House, 125/130 Strand, London, W.C.2.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of call-up for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical War Committee and (in Scotland) the Scottish Central Medical War Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that he obtains it without delay. Under present arrangements the Committees also normally allow an "R" practitioner to hold a Second House Officer post (£400) and a Senior House Officer post (£670), provided in each case that the higher appointment is secured before the termination of the practitioner's current appointment.

"R" practitioners may not accept Third House Officer posts (£450 per annum) unless they have obtained the special permission of the C.M.W.C. or (in Scotland) the Scottish C.M.W.C.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

REGISTRARS IN PSYCHIATRY to the South-Western Region

The successful candidates will be based on the Bristol Mental Hospitals Group (Barrow and Fishponds Hospitals, and the Bristol Neurosis Centre). The appointments, which may be resident or non-resident, will be held for one year in the first instance, when the contracts will be reviewed and the Registrars may then be posted to a mental hospital elsewhere in the Region. It is intended that the posts will offer training to enable holders to obtain the Bristol D.P.M. Holders will, therefore, be required to gain experience in child psychiatry, mental deficiency and neurology, as well as the general and special branches of adult psychiatry, and their work will be arranged accordingly. They will also be able to attend the course for Part I and Part II D.P.M. at the University of Bristol. The posts also offer excellent opportunities for special postgraduate experience in psychiatry, and for research work for the preparation of a thesis for higher qualifications. There are well-equipped departments of electroencephalography, experimental and applied psychology, and biochemical and endocrinological research, and an extensive psychiatric library at Barrow Hospital. Twelve copies of applications, stating date of birth, qualifications, and experience, together with twelve copies of two testimonials, and the names and addresses of two referees, should be sent to the Secretary of the Regional Hospital Board, 5, Cotham Lawn Road, Bristol, 6, not later than March 31, 1952. HER MAJESTY'S COLONIAL SERVICE, Malaya

Doctors having medical qualifications registrable by the General Medical Council in the United Kingdom with one or more years' experience after qualification are required for appointment as **MEDICAL OFFICERS AND MEDICAL OFFICERS OF HEALTH**

for General Medical and Health duties

Appointment is available (a) on probation for permanent establishment; (b) on employment from the National Health Service; and (c) on short-term contract with gratuity. (a) **Permanent terms.** Subject to three years' probation, appointment is permanent with pension (non-contributory) at age 55. Salary is paid in the scale £952 by £42 to £1,204 to £1,274 by £42 to £1,652 per annum. There are many posts, specialist and administrative, available on promotion carrying higher salaries (up to about £2,400 for the highest post). Promotion is often made before reaching the top (£1,652) of the long scale. There is also a cost-of-living allowance at varying rates, according to family circumstances, subject to maximum of £336 per annum for single men and of £707 per annum for married men with children (both rates higher when stationed in Singapore). Note. Doctors with more than one year's approved experience after age 25 (including service in Her Majesty's Forces) enter the salary scale at points above the minimum according to their experience; and four increments of salary are also given to holders of approved higher qualifications (e.g., F.R.C.S., M.R.C.P., D.P.M., D.A., etc.). (b) **National Health Service.** Doctors may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Malaya salary on leaving Malaya at the end of their engagements. Emoluments as under (a), including incremental credit for experience and higher qualifications as in note under (a). Doctors so appointed may be considered for permanent terms at any time during their colonial employment provided they surrender their rights to the resettlement grant and payment by Malayan Governments of superannuation contributions. (c) **Contract terms.** The contract will be for three years' resident service renewable for a further four of three years by mutual agreement. Salary and cost-of-living allowance as under (a), including incremental credit for experience and higher qualifications as in note under (a). In addition a gratuity earned at the rate of £300 to £450 per annum, according to salary, is paid on expiry of contract. Doctors on contract may be considered for appointment to the permanent establishment at any time on their agreeing to surrender their gratuity earning rights. In all three types of appointment the rates of salary and gratuity refer to doctors eligible for expatriate terms under Malayan Regulations (i.e., those whose permanent homes are in the United Kingdom, Ireland, Australia, Canada, etc.). A limited number of practitioners liable for call up under the National Service Act, 1948, may apply, and if appointed will be granted indefinite deferment of call up on completion of a minimum period of one tour of three years in the Malayan Medical Service. The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates, which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife, and children under the age of ten (not exceeding four persons besides himself) on appointment and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. The social and recreational facilities in Malaya are good. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/242/51). UNIVERSITY APPOINTMENTS**EXETER COLLEGE, UNIVERSITY OF OXFORD
STAINES MEDICAL RESEARCH FELLOWSHIP**

The Governing Body of Exeter College proposes to elect to a Staines Medical Fellowship in the course of Trinity Term, 1952, to be held from October 1, 1952. The Fellowship is offered for research in Oxford in one of the medical sciences, such as anatomy, biochemistry, clinical science, pathology, pharmacology, physiology. The Fellowship is tenable for a maximum period of five years, and is not renewable. The annual stipend will be £450, together with dining allowance, and, if the Fellow is unmarried, with rooms in college. A housing allowance, at the rate of £50 per annum, is payable to a Fellow, who, being married, resides out of college. If the Fellow has a child or children dependent upon him, he will receive an allowance for every such child who is below the age of 16, or who, being above that age, is receiving full-time education of a course of professional training. This allowance will normally be at the rate of £50 per annum in respect of each child satisfying the conditions of eligibility, but it will be decreased by the amount of any allowance payable in respect of the child from other sources, e.g. the Government and the University. The Fellow will be required to join the Federated Superannuation Scheme for Universities. The Fellow will be allowed to undertake a limited amount of teaching, subject to the approval of the Governing Body. A candidate for the Fellowship must not have exceeded 35 years of age, must be of British birth, and should preferably hold a registrable medical qualification. He should send his application, together with birth certificate, a statement of his career, two sets of copies of his published work, and copies, in triplicate, of three testimonials, to the Rector, Exeter College, on or before March 31, 1952.
