

The importance of protein during pregnancy and the nursing period

CLINICAL observation shows that the increased protein anabolism during the latter part of pregnancy, and particularly during the nursing period, requires more protein than was at first considered necessary. Adequate protein is, therefore, desirable to ensure the ample supply of breast milk.

The inclusion of high-grade protein foods in the diet of pregnant women is now a standard practice. In cases where there is loss of appetite

or a general feeling of exhaustion, the diet can be effectively supplemented by protein foods in a form which is easy to assimilate.

Brand's Essence is a first-class protein of animal origin. Being partly hydrolysed, it is capable of easy ingestion, digestion and absorption. It is extremely palatable, and may be taken either as a jelly or as a liquid. It helps to support convalescence and assists in

restoring a positive nitrogen balance.

Children take great delight in singing of ordinary household chores, and they're just as joyous about taking a multi-vitamin preparation—when it's Vi-Daylene. Prescribe Vi-Daylene for your young patients—you know it will be taken eagerly. This well-balanced preparation is ideal for growing youngsters; it is a clear yellow liquid which has a citrus-fruit flavour that children love. They will take it from a spoon with no trouble. This product contains 7 essential vitamins, is naturally stable and therefore can be stored without refrigeration. There is no fishy odour, and it leaves no stain. Vi-Daylene is also a perfect way of administering the necessary vitamins to babies. It is naturally miscible with an infant's milk feed, and makes the addition of cod liver oil and fruit juices unnecessary. Vi-Daylene is available in 90 cc. and 16 oz. bottles.

The average daily dose, one teaspoonful (5 cc.), supplies the following:

Vitamin A, B.P.	3,000 i.u.
Vitamin D (Viosterol), B.P.	800 i.u.
Aneurine Hydrochloride, B.P.	1.5 mg.
Riboflavine, B.P.	1.2 mg.
Vitamin B ₁₂	3 mcg.

Standard Interchangeable Ground Glass Joints simplify apparatus assembly

THIS practical development of 'PYREX' Scientific Glassware is strictly in accordance with B.S.S. No. 572/1950.

Because these ground glass joints are standard and interchangeable, they not only simplify apparatus assembly, but also ensure perfect fit and freedom from leaks. Standard adaptors make possible smooth interchange between vessel and vessel.

In addition, the sturdy strength of the joints, and the robust walling of the tubing are a distinct protection against fracture, whether this be due to rapid exchange of temperature or actual physical shock.

These characteristics make 'PYREX' Scientific Glassware distinctly safer and more reliable than ordinary glassware, thus leading to greater economy in usage.

A full list of the various ground glass joints and adaptors is given in our catalogue of 'PYREX' Scientific Glassware which will gladly be sent on application.

'Gantrisin' is a potent antibacterial substance which is clinically effective in a wide range of systemic and urinary conditions. It is relatively free from toxic effects, and has few side-reactions. In both free and conjugated forms 'Gantrisin' is highly soluble and therefore unless very large doses are used there is no need to force fluids or to give alkali.

Urolucosil^{*}

A SULPHONAMIDE

FREE FROM SIDE-EFFECTS

One of the most valuable characteristics of Urolucosil is the remarkable absence of side-effects noted with this sulphonamide. Such conditions as cyanosis, vomiting, acidosis, hypersensitivity, have yet to be reported; it is most uncommon for there to be any upset of the blood picture or disturbance of the intestinal flora with Urolucosil. Because Urolucosil is a compound with the high solubility of 98% at a pH of 7, it is unlikely that any blockage of the urinary passage by crystalline deposits will be caused; no diminishing of urinary output caused by such blockage has in fact been reported since Urolucosil was introduced to the medical profession in Great Britain. Finally, depression, which so often militates against the well-being of a patient, is virtually absent when Urolucosil is prescribed. Urolucosil is especially indicated in uncomplicated infections due to *B.coli* and other organisms of the coliform group: acute cystitis, acute pyelitis, pyelitis of pregnancy: urinary tract infections in children: neurogenic bladder.

Quantity DEMANDS Quality

18 grammes a day for 6 to 9 months is an exceptionally high dosage scheme, yet that is the amount of P.A.S. a tuberculous patient may have to take. Purity of drugs is important in doses as small as 0.01 gramme. How much more vital is it when such a large quantity is taken for so long a period? THE CHANGING SCENE

IN PENICILLIN THERAPY

With the repository use of penicillin a new conception in penicillin therapy is rapidly gaining favour. Earlier methods of frequent injections are now giving place to the newer technique of a single daily dose.

With 'DURACILLIN A.S.'*—an aqueous suspension of procaine penicillin G—the antibiotic is slowly released into the tissues and a dose of 1 c.c. every 24 hours provides adequate therapy for most infections. 'DURACILLIN A.S.' also possesses other important advantages—it is relatively free from potential allergens, less pressure is required on injection than with oily suspensions and injection is practically painless. As it is ready to inject and remains stable for 12 months, 'DURACILLIN A.S.' is the ideal penicillin preparation for the busy practitioner.

The case of the exacting surgeon

A famous surgeon was struck by the fact that his razor blades seemed to be much sharper and more uniform than any scalpels he could then obtain. To a keen and vigorous mind there seemed no reason why the makers of the blades should not make surgical blades of the same high quality.

The solution was indeed brilliantly simple. He asked Gillette to produce surgical blades with edges equal to those of their razor blades. Now the sharpest edge in the world is available to make surgery easier, safer, and more accurate.

Gillette Surgical Blades and Handles are precision-made for each other. Not only does this ensure absolute rigidity in use, it makes the fixing and release of a blade the work of a moment.

DALMAS WATERPROOF DRESSINGS ACCELERATE HEALING

DALMAS first aid dressings are unlike many others in now being impregnated with 5-aminoacridine hydrochloride, recognized by the medical profession as an effective, non-irritant antiseptic which accelerates healing. Despite the advent of the sulphonamides and penicillin, it holds a definite place in wound-therapy, having a bactericidal action against *B. Proteus* and other Gram-negative organisms.

Dalmas dressings are waterproof, grease-proof, can be worn while washing, and are themselves washable. They stretch in every direction yet the edges stick tight. They are skin-coloured, hardly show, and the edges cannot fray.

Laxatives for Children

To aid the Physician in choosing a laxative for children, we give the chief characteristics of Andrews. The dosage is easily adjusted according to age. Andrews is pleasant tasting, and children accept it readily. Its laxative action is mild, and is due to the presence of magnesium sulphate and other salts in balanced proportion which increase the fluid content of the bowel by osmotic action and so lead to easy non-

gripping evacuation. Andrews has a soothing effect on the stomach, stimulates the bile-flow and generally aids digestive processes. It is also useful as a gastric sedative in bilious attacks. Andrews has no costive reaction when discontinued.

FLAT FEET —

The 'Inneraze' principle of the in-built wedge

'Inneraze' shoes are supplied (on medical prescription only) for the treatment of pronation. They make use of the wedge principle, but this is applied in a far more satisfactory way than normally. For the wedge is built into the shoe internally, not applied externally. This, in conjunction with the buttressed heel, ensures that the 'lift' given by the wedge is not altered by wear—not even by repair work. Thus the surgeon is relieved of the need for supervision. The wedge is of course invisible from outside the shoe, which was designed in the closest collaboration with an eminent orthopaedic surgeon. An Inneraze shoe looks almost exactly like any other of the first-class shoes made by Start-Rite for children.

FOR EIGHT YEARS a number of experts have each week constituted a Brains Trust for answering questions sent to the *British Medical Journal* from all over the world.

"ANY QUESTIONS?" is a current guide to the practice of medicine. Many of the authoritative answers given supply practical information not yet in the textbooks.

THE BEST of "Any Questions?" is now offered in book form. Please reserve your copy as the edition is limited. The book is bound in cloth, fully indexed, small enough to fit the pocket, and quite indispensable to the General Practitioner in his daily work (pp. 268).
