# A Matter of Minutes ...

THE common head louse, *Pediculus humanus capitis*, has proved completely vulnerable to SULEO HAIR EMULSION. One treatment with SULEO will clear the most heavily infested head in a matter of minutes. Formulated with D.D.T. plus Pyrethrum SULEO acts instantly and remains toxic for at least fourteen days, thus exceeding incubation period of nits by some days. An outstanding advantage is that the hair may be washed during this period without lessening the lethal effect.

SAFE TO USE—HARMLESS TO HAIR & SCALP—EASILY APPLIED—PLEASANTLY PERFUMED—UNDETECTABLE.

# HYOSCINE

## proved 96% effective in preventing seasickness \*

**A**N exhaustive controlled trial of the three best-known preventives of seasickness was carried out last year, under the aegis of

the Admiralty, in fast patrol boats driven to simulate the pitching and rolling due to heavy seas.

"The differences between the number of men who vomited after hyoscine hydrobromide and the number who vomited after any of the other substances were highly significant" (states the report).★★

**96% of those who might otherwise have vomited were protected from vomiting by hyoscine, 61% by antihistamine drug A, and 44% by antihistamine drug B.**

### SIDE-EFFECTS INSIGNIFICANT

Apart from vomiting, hyoscine was markedly effective in the prevention of nausea. Hyoscine protected 77% of those who might have felt sick, drug A 65%, and drug B 30%.

The only adverse side-effect recorded in over 50% of cases was a minor symptom—a dryness of the mouth in 87% of cases with hyoscine, 58% with drug A, and 54% with drug B; but no fewer than 44% of the men with the 'dummy' drug reported a dry mouth too.

"The present findings (the report continues) strongly confirm previous observations that hyoscine hydrobromide effectively prevents seasickness in a large number of people and that, at any rate in fit men, 1 mg. is a safe dose."

### \* KWELLS TABLETS,

manufactured by E. Griffiths Hughes Ltd. and sold through chemists as a preventive of travel sickness, each contain 0.0046 gr. of hyoscine hydrobromide. A physician's sample will be sent post-free on request to the Professional Department, P.O. Box 407, Manchester.

## SUCCESSFUL TREATMENT OF VARICOSE ULCERS

RECENT clinical trials further confirm that Viacutan (1% silver dianaphthylmethane disulphonate) is an extremely powerful antibacterial and healing agent in the various types of varicose ulceration. The bacterial infection of the ulcerated area which leads to enlargement and deepening of the ulcer almost invariably yields to applications of Viacutan.

The success of Viacutan is due to its unique attributes—it is active against both Gram-positive and Gram-negative organisms even in the presence of blood, pus and serum, and penetrates deeply into the tissues without destroying them. On the other hand it actively promotes cell-growth, with healthy granulation.

Tight and firm bandaging of the whole leg is essential in treating ulcers with Viacutan, and the after-care is highly important, but for all cases, suppression of infection and promotion of healing with Viacutan is of paramount value.

## THE GILLIES MARK III anæsthesia apparatus

After extensive clinical trials, here is the latest Gillies equipment—compact as ever and readily adaptable to all conditions and all types of gas cylinder.

The Gillies III combines three different circuits in one. It provides for circle-type closed circuit anaesthesia, continuous flow, and atmospheric air with the volatile agents. As with the Boyles Apparatus a Waters Absorber (not included) may be used for "to and fro" closed circuit administration. Incorporating a carbon dioxide absorber the Gillies Mark III is in fact the smallest complete apparatus that combines all these functions.

In hospitals it is equally convenient on a stand or a table; for Service use it will fit in with emergency arrangements.

# Made for professional hands

- ★ Bactericidal, not bacteriostatic
- ★ Reduces "scrubbing" time
- ★ Lathers instantly
- ★ Non-toxic, non-irritant

Each batch is pharmaceutically assayed.

PRACTICAL trials by a large number of surgeons and doctors in hospital, midwifery and general practice support the exclusive use of HEXOPHENNE Surgical Soap in aseptic technique.

Made especially for professional use (and available to the lay public only against prescription) the regular daily use of HEXOPHENNE Soap reduces the bacterial flora of the skin by approximately 95% and maintains this low count continuously. The time required for the pre-operative surgical scrub is reduced to 3 minutes and the scrub-brush and alcohol rinse eliminated.

HEXOPHENNE Surgical Soap incorporates 2% hexachlorophene combined with an anionic wetting agent, in a bland, emollient soap-base which produces a copious, rich lather in any water.

It is non-toxic, non-irritant and does not sensitize the skin.

## 66 years in the service of the Medical Profession

The Johnson & Johnson Company was founded in 1886 by R.W. and J.W. Johnson, who were among the first to realize the importance of the manufacture of anti-septic surgical dressings, following the discoveries of Lister and Pasteur in the control of bacterial infection. The treatise published by the company in 1888, 'Modern Methods of Wound Treatment', long remained the only clear explanation of the new technique of antiseptic surgery. Ever since this the company has held the foremost place in its field—a position that has been maintained by the closest co-operation with the medical profession and the constant refinement of manufacturing techniques.

## A CAREER AT SEA FOR YOUR SON

*The Merchant Navy offers good prospects*

The large Shipping Companies recruit future Executive Officers for their ocean-going ships from H.M.S. Worcester, a Nautical College founded in 1862 by London shipowners. Nearly 7,000 Cadets have passed through the College and received specialized training in addition to a sound general education.

The College is officially recognized by the Ministry of Education and by the Ministry of Transport, the latter accepting the training provided on board the Worcester as being the equivalent of one year's sea service.

Cadets are admitted after reaching the age of 13½ and before reaching the age of 16. They leave the College when they are 17 and the period of training depends on the age at entry, with a minimum period of two years. Candidates are required to take the Common Entrance Examination or the Worcester Entrance Examination, according to age. They must be medically fit with perfect eyesight.

Fees are £180 per annum including uniform. Various scholarships in reduction of fees are available, varying in value from £180 p.a. to £50 p.a. The Worcester offers an excellent opportunity for boys of good education and character wishing to become Executive Officers in the Merchant Navy—a career providing world travel, good remuneration and an interesting life.

Epidermophytoes and allied fungoid infections often resist treatment owing to auto-reinfection from scratching and poor penetration of the medicament.

The symptoms of allergic disorders may occur all the year round, or they may be confined strictly to one season, as in the common case of Hay Fever. Pollen, dust, eggs, feathers, berries, drugs are but a few of the many irritating factors that bring on the symptoms of the allergic sufferer.

Diatrin\* is an antihistaminic that provides safe and effective relief to the allergic patient and does so with a remarkably low incidence of side reactions. Toxicity is low and the drug is well tolerated.

The average dose is one tablet (50 mg.) four times daily. When the condition is under control the dose should be decreased to the lowest sufficient to provide effective relief.

# Trufood or some other milk food— what's the difference?

Humanised Trufood is different because it is not just "another dried cow's milk". Cow's milk is, of course, our raw material. But the resemblance between Trufood and other dried milk foods ends there. The process of its manufacture makes Trufood a food specifically adapted to the nutritional needs of the infant who must be artificially fed. Because of this we sincerely believe that Trufood is the most satisfactory alternative for the baby who cannot have breast milk.

## TRUFOOD

If you would like to know more about Trufood—how it is made, and why we think that it is the most satisfactory substitute for breast milk—write to the Trufood Professional Information Service, Green Bank, London, E.1. This service has been formed specially to answer questions from the medical and nursing professions, about infant foods.

## *Three Strings to your Bow...*

THE VITAMIN B COMPLEX is being found effective in an increasing number of conditions and is a necessary adjunct to treatment with some of the newer antibiotics. Physiological interactions between the different factors indicate that they should in most cases be given in combination.

BEFORTISS B-COMPLEX is available in three different forms:—

### AMPOULES—

in two strengths, normal and concentrated, for treatment of acute conditions and where signs of vitamin B deficiency are present. Secondary deficiencies are usually complex and their treatment requires all the chief vitamin B factors.

### CAPSULES—

These provide the approximate daily requirements of aneurine, riboflavin, niacinamide and pyridoxine, and are intended for the prevention of induced deficiencies and for maintenance therapy.

### ELIXIR—

also for protection or maintenance. This preparation is extremely palatable and for this reason is valuable in the treatment of children and for patients who prefer a liquid to capsules. The normal dose of one or two teaspoonfuls daily can be increased if necessary.

*There are, in this range, preparations of three types designed to meet all dose-level needs.*

Although vitamin supplements are frequently prescribed, some doubts have been expressed as to the usefulness of administering water-soluble synthetic vitamins in large quantities. Moreover, large doses of single synthetic vitamins may result in vitamin imbalance.

Many authorities prefer a dietary source of naturally occurring vitamins. In cases of a suspected shortage of the B<sub>1</sub> vitamins, the daily inclusion of Marmite in the diet is often recommended. Marmite contains riboflavin (1.5 mg. per oz.), nicotinic acid (16.5 mg. per oz.) as well as the less well-known B<sub>2</sub> factors.
