## PESSARIES

the modern answer to Gentian Violet in non-specific cervicitis

More and more doctors are prescribing PRUVAGOL pessaries to replace the old-fashioned treatment with Gentian Violet. PRUVAGOL pessaries are suitable in all cases which respond to Gentian Violet, and have the advantage of being non-staining and easy for the patient to apply herself. Leading gynaecologists have proved that PRUVAGOL will clear up the clinical condition of non-specific cervicitis, even of many years' duration and resistant to other forms of treatment, with only a few applications. Pessaries in packings of 12, 50, and 100; also cream in tubes with applicators and special hospital packs.

'Daraprim' brand Pyrimethamine (2:4-Diamino-5-[4-chlorophenyl]-6-ethylpyrimidine), the new antimalarial announced some months ago, has now undergone clinical trials and is ready for issue.

#### TREATMENT

In many parts of the tropics, a single dose of 50 mgm. (in some cases even less) has been found adequate to clear the parasitæmia and relieve the fever in acute cases of malaria. Some workers, however, prefer to give two doses on consecutive days.

#### SUPPRESSION

'Daraprim' has given highly encouraging results in areas where malaria is endemic. A dose of 25 mgm. given at weekly intervals to the inhabitants of certain isolated villages, has reduced the parasite index from approximately 22 per cent to zero in  $3\frac{1}{2}$  months during the season of transmission.

Although conclusive evidence of its action in non-immunes is not yet available, there are solid grounds for believing that it will prove an excellent suppressant in them.

'Daraprim' is issued as compressed products of 25 mgm., in packs of 6, 30 and 1000. Further information on request to 183-193, Euston Road, London, N.W.1.

When you prescribe exercises . . .  
**A SPENCER**  
*supports* your treatment

Many patients just won't carry out a regular programme of prescribed exercises. You can bolster their good intentions by applying *designed-to-order* Spencer Supports that immediately improve body mechanics and serve as a constant reminder of the goal of muscle re-education.

This patient is a familiar postural type: thin, ptotic, flat chested—with complaints of undue fatigue, backache, stomach distress. But such patients are "just too tired" to take corrective exercises. In this case, the doctor applied a Spencer Support as shown. Symptoms were promptly relieved and she was able to continue a full time factory job. However, five years later she still finds exercises a "chore" and will probably wear her comfortable Spencers for life to provide the posture maintenance she requires!

Prescribe Spencer *designed-to-order* Supports with confidence—for men, women, children—for abdomen, back, and breasts.

The symptoms of allergic disorders may occur all the year round, or they may be confined strictly to one season, as in the common case of Hay Fever. Pollen,

dust, eggs, feathers, berries, drugs are but a few of the many irritating factors that bring on the symptoms of the allergic sufferer.

Diatrin\* is an antihistaminic that provides safe and effective relief to the allergic patient and does so with a remarkably low incidence of side reactions. Toxicity is low and the drug is well tolerated.

The average dose is one tablet (50 mg.) four times daily.

When the condition is under control the dose should be decreased to the lowest sufficient to provide effective relief.

Non-systemic in action, 'Milk of Magnesia' may confidently be prescribed in

## NET FOR EVEN SUPPORT

Lastonet stockings, with their light net construction, stretch equally well in all directions to afford the tissues even support. As the net expands and contracts it gently massages the limb with positive benefit to the vein walls. The dangers of varicosity are thereby reduced or the condition relieved if it has actually occurred.

## *Isn't this the answer?*

Although most people know about Robinson's 'Patent' Barley, there are still a few who think that making barley water involves a lot of tiresome stewing and straining of pearl barley. Now, if a patient needs barley water isn't Robinson's just the answer? You see, with Robinson's it's as easy as making cocoa and saves so much trouble for those who have to look after an invalid.

## BARLEY

This illustration shows how the patient on an Intalok mattress can rest naturally and so remain noticeably free from bed-fatigue.

The background photograph shows a top-view section of the mattress, uncompressed. Hundreds of fine gauge springs are linked together throughout the whole length and breadth; but they are linked *loosely*. The surface coils yield readily to light pressure, and as weight increases, the load is instantly shared with the adjoining springs.

The diagram shows how Intalok responds when the patient is placed on the mattress in a supine position. The springs conform exactly to the contours of the body. The spine is held in its naturally straight position. Where weight is heaviest, there is unusually deep compression, yet as pressure is distributed on an area of interlinked springs, there is no excessive resistance at any one point. Consequently the fleshy parts of the body are not flattened, and a cause of chafing and bed fatigue is eliminated. The patient enjoys a greater degree of rest and relaxation.

Here are other good reasons why doctors, matrons and committees of management approve of Intalok mattresses:

- 1 All metal parts are rustless, can be sterilized repeatedly.
- 2 The mattresses can be stoved; in fact they gain by stoving.
- 3 Intalok mattresses have no tufts or piping to collect dust and germs.
- 4 The ticking is easily removable for laundering.
- 5 Existing hair mattresses can be converted to Intalok—the good hair being retained. This cuts costs.
- 6 Every Intalok springing unit is guaranteed for 10 years.
