**For oral
cleanliness**

To keep the teeth and mouth clean without doing damage to either — that is the simple function of a good Tooth Paste. Macleans performs it. Macleans Peroxide Tooth Paste removes greasy film from the teeth. The polishing ingredients can then act easily and without abrasive action. They are ultimately soluble in saliva and leave no solid residues in the mouth.

**... and
oral health**

Macleans Peroxide Tooth Paste is sufficiently alkaline to mitigate oral acidity. It neutralises the acid patches formed on or between the teeth by fermenting food particles. It is mildly anti-septic but uninjurious to the normal oral flora which defend the mouth against pathogenic bacteria. It is pleasant to use and of refreshing flavour.

*Sample tubes of Macleans

The problem of

PRURITUS

Pruritus can be particularly difficult in treatment and can be a heavy tax on the physician's time—whether the patient be child or adult. TEEVEX Antipruritic Ointment, however, is a readily available means of allaying the irritation, whatever the origin of the condition. It contains a powerful anti-histaminic in combination with crotonyl-N-ethyl-o-toluidide, possesses marked bacteriostatic properties and is presented in a non-greasy, non-staining cream base. In urticarial itching, pruritus vulvae, pruritus ani and summer prurigo, TEEVEX affords prompt and lasting relief.

Aid in the control of overweight . . .

Overweight, even borderline overweight, is a threat to health and even life itself and is a legitimate medical problem.

It is now well established that only those who eat less lose weight, but the difficulty has been in ensuring faithful adherence to a reducing diet. 'Dexedrine' tablets are a valuable aid in the control of overweight; they curb the appetite and enable the patient to follow a low-calorie diet without irritability or discouragement.

The Treatment of Asthenia

Bulk manufacturing process

Full and rapid recovery from illness or following surgical operations may be the more readily achieved if liver extract, iron and vitamins are supplied to the patient to facilitate blood regeneration. Even a relatively small fall in the hæmoglobin level in patients otherwise reasonably healthy may manifest itself in the form of general asthenia and proneness to fatigue. HEPRONA, a preparation containing Hepatex liver

extract, iron, members of the Vitamin B complex and glycerophosphates, is an excellent tonic in such cases and is suitable both for adults and children.

Veriloid Intravenous Solution is an important new emergency drug. By its use, immediate control of arterial tension is possible in those conditions in which a continued hypertensive state could readily lead to disaster. It therefore finds valuable application in the emergency treatment of malignant hypertension, encephalopathy, eclampsia and hypertensive states accompanying cerebral vascular disease. After tension has been controlled by Veriloid Intravenous Solution, oral treatment with Veriloid tablets can be instituted and continued indefinitely.

Veriloid Intravenous Solution contains 0.4 mg. of Veriloid brand alkaloids of *Veratrum viride* in each c.c. and is biologically assayed to ensure uniform hypotensive potency. It is a very potent agent, and should not be used before the instructions for use have been carefully studied.

Not whether but how

FERROUS SULPHATE is now recognised as the most efficient form of iron treatment for hypochromic anæmias. The question is therefore not "whether" but "how" it should be administered.

The preparation should not be too bulky, nor cause gastro-intestinal upset, yet it must disintegrate quickly and produce maximum hæmatopoietic response.

In 'PLASTULES' ferrous sulphate is presented in its most attractive form—in a semi-solid base in a capsule which rapidly dissolves in the stomach, thus ensuring maximum absorption. 'PLASTULES' induce a rapid response without gastric upset.

'PLASTULES' are available in four varieties: Plain; with Liver Extract; with Folic Acid; and with Hog's Stomach.

CHLORAMPHENICOL EAR-DROPS FOR TOPICAL APPLICATION

in Suppurative, Chronic and Postoperative Aural Conditions

Uses

Chloramphenicol B.P. has now assumed an important place in otology. Among its recognized uses is its local application in cases of chronic suppurative middle ear disease, long-standing external otitis and hitherto intractable chronic mastoiditis. Excellent results are also reported from the use of Chloramphenicol B.P. in the treatment of postoperative fenestration and tympano-mastoid cavities. In these cases application of Chloramphenicol solution by the wick method often proves satisfactory.

Case Selection

Chloramphenicol B.P. is active against *Ps. pyocyanea* and many penicillin-resistant strains of *Staphylococcus* and *Streptococcus*. Ideally, sensitivity tests should anticipate its use, but in the absence of laboratory facilities a trial of 'Otophen' is justified when other antibiotics have failed.

Formula

'Otophen' ear-drops are formulated in accordance with the recognized solution now employed by the majority of E.N.T. clinics — Chloramphenicol B.P. 10% w/v in Propylene glycol.

Packings

'Otophen' ear-drops are available in bottles of 15 c.c. ($\frac{1}{2}$ fl. oz.) and 5 c.c. fitted with drop applicator.

What's so different about Trufood?

Humanised Trufood is different. It is not an ordinary dried cow's milk. Cow's milk is certainly the raw material used but the finished product is much more than dried cow's milk: it is a special food, specifically designed to meet the nutritional needs of the growing infant. Moreover Trufood is dried by the spray process, keeping the fat as a fine, well diffused emulsion and ensuring greater solubility.

Prevention of Dressing Trauma

Jelonet is a dressing for all wounds—its non-adherent properties protect the delicate epithelium and prevent dressing trauma, enabling healing to continue undisturbed. It is used extensively in the treatment of burns and as a dressing following skin-grafting operations. It is non-toxic and compatible with Penicillin and all other antibiotics, and may be used as a means of drainage, or as a packing for deep granulating wounds. It may also be used as an adjuvant in the treatment of varicose ulcers by compression bandaging, and as a means of protecting the skin from irritating discharges. Jelonet may be prescribed by name under the N.H.S. (Form E.C.10) in the following sizes:— single pieces in envelopes, tins containing

5, 10 or 36 pieces, each piece $3\frac{3}{4}$ " x $3\frac{3}{4}$ ".

PROVIDES ORGANIC IRON

* (*B.M.J.*, 23.2.52, p. 407.)

"... It was found that 33% of the patients in group A and 40% in group C found it difficult or impossible to tolerate ferrous sulphate tablets, and it can be assumed that between 30 and 40% of all antenatal patients will not, in fact, take these tablets if they are routinely prescribed in the antenatal department"

The need for a more suitable form of iron for the treatment of iron deficiency anæmias of pregnancy is evident.

Clinical trials have shown that for tolerance, absorption and utilisation the organic iron of FERROUS GLUCONATE as

presented in Elixir Cerevon is more acceptable to the gastric mucosa and hæmopoietic system.

Elixir Cerevon also provides adequate doses of the important factor of the Vitamin B complex and the inclusion of 15% blackcurrant juice provides approximately 5.0 mgm. Vitamin C per teaspoonful and makes the preparation highly palatable.

Experience with the Oxygenaire Oxy-Incubator (combined oxygen-tent and baby incubator) in leading maternity hospitals has led to recent refinements in the original equipment.

It has now been made possible to x-ray the newly born premature infant, while still in the incubator, without interfering with the precise control of temperature and humidity or the flow of oxygen—a very great advantage when neonatal surgery has to be considered.

Oxygenaire Oxy-Incubator

A smaller transportable Oxy-Incubator for ambulance use is now undergoing trials. Battery or mains operated, it embodies the essential features of the large Oxy-Incubator illustrated. Enquiries from hospitals are invited.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of call-up for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that he obtains it without delay. Under present arrangements the Committees also normally allow an "R" practitioner to hold a Second House Officer post (£400) and a Senior House Officer post (£670), provided in each case that the higher appointment is secured before the termination of the practitioner's current appointment.

"R" practitioners may not accept Third House Officer posts (£450 per annum) unless they have obtained the special permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

HAY FEVER

One of the most distressing accompaniments of hay fever is nasal congestion. NEOPHRYN—already well-tried in colds and rhinitis—may prove a valuable symptomatic aid here.

Three or four drops are instilled into each nostril. The patient should lie flat with chin raised and neck fully extended, and maintain this position for two minutes.

Medical Literature available on request.

Neophryn is known overseas as Neosuphrine.

Antacid and Adsorbent

The particular value of MAGSORBENT in chronic hyperchlorhydric disorders depends upon the moderation of its rate of interaction with acids. The time required for complete interaction approximates to the normal emptying time of the stomach. It can, therefore, be taken in generous excess of the amount required to combine with the acid present in the stomach at any particular moment, without risk of overneutralisation.

Formula: Magnesium Trisilicate 100%

Samples of MAGSORBENT Powder and Tablets, also literature, are available on request
