FIRST ANNUAL REPORT ON STRESS

SUPPLEMENT TO
THE MONOGRAPH
"STRESS"

by **HANS SELYE**

M.D., Ph.D. (Prague)
D.Sc. (McGill), F.R.S.(C.)

HIGHLIGHTS OF THE BOOK

- ★ It deals with current developments in the field of ACTH, Cortisone, STH, and the adaptation syndrome in general.
- ★ It presents a new unified theory of medicine.
- ★ It acts as a guide to the entire literature on Stress.
- ★ It combines an extensive classified index of pertinent facts on the Stress problem and a concise textbook-like evaluation of the principal findings.
- ★ It marks the start of an annual series of such reports, which will embody the latest developments with ACTH, Cortisone, and STH.

★ Made from the finest Sheffield steel. Swann-Morton surgical blades are individually tested for keenness and flawlessness — then sterilised and coated with pure Vaseline to reach the surgeon's hands in perfect condition. Handles are of stainless metal, precisely machined to ensure that blades fit accurately and rigidly. There are eleven types of blade, as illustrated, and three types of handle.

The replaceable barrel means great economies in the long run

The glass barrel is protected by a metal casing and breakage risk is thereby reduced to a minimum. If the glass barrel is broken only the glass barrel and piston need be renewed.

Spare barrels are supplied complete with individually fitted pistons. Users however are advised to order a spare barrel when they buy the syringe; this permits instant replacement.

All components can be taken apart or assembled in a few seconds.

No cement or solder is used and sterilization can be done at temperatures up to 200° C. The metal piston must be withdrawn during sterilization but there is no need to dismantle the rest of the syringe.

SIZES: 1, 2, 5, 10 and 20 c.c.

INTERCHANGEABLE NEEDLE FITTINGS: Record, Luer and all other types. Side and central.

A NEW TOILET SOAP WITH EXCEPTIONAL GERMICIDAL POWERS

CIDAL is a high-grade, triple-milled toilet soap containing 2 per cent of Hexachlorophene, which gives it exceptional germicidal powers. This property makes CIDAL extremely valuable in daily practice.

Hexachlorophene (2 : 2' dihydroxy-3 : 5 : 6 : 3' : 5' : 6' - hexachlorodiphenylmethane), is colourless, odourless, non-irritant and non-toxic. It is 125 times more efficient than carbolic acid at 37°C against *Staphylococcus aureus* and possesses a high dilution coefficient. The hexachlorophene in CIDAL completely purifies the skin by attacking the bacteria, which settle deep within folds and pores, and forms an anti-bacteria barrier which gives protection until the next washing.

CIDAL Soap assists in preventing secondary infections of minor cuts and abrasions, and diseases such as athlete's foot. Used regularly, it helps to reduce the incidence of boils, styes, carbuncles and other forms of folliculitis and cellulitis. CIDAL is found to be beneficial in treating impetigo and barber's rash, and can be commended in all cases of skin ailments where soap and water form part of the therapy.

CIDAL is also recommended for personal hygiene, since it destroys the bacteria which ferment perspiration and cause unpleasant body odours.

DOSAGE
Aureomycin
HYDROCHLORIDE CRYSTALLINE
lederle

*A true broad-spectrum, low-dosage, uniformly active
antibiotic produced in the highest degree of purity by
the highest chemical, physical and biological standards.*

To date aureomycin has been the subject of over 7,000 papers from highly authoritative world-wide sources in every branch of medical practice—a number which exceeds the literature on any other broad-spectrum antibiotic by a wide margin. Since 1949, the trend of these reports confirms the effectiveness of low dosage of aureomycin, in contrast with the trend toward higher dosages shown in the literature on other broad-spectrum antibiotics.

AT LOW DOSAGE...

- * Aureomycin shows a range of clinical usefulness against most bacterial and other infections which materially exceeds that of any other broad-spectrum antibiotic.
- * Aureomycin produces adequate blood levels with no increase in irritation.
- * Aureomycin maintains therapeutic concentrations in the body because it has a low excretion rate.
- * Aureomycin is so effective as to reduce the period of disability, or hospital stay, often to a few days or hours.
- * Aureomycin has repeatedly been used to rescue patients who failed to respond to other antibiotics—even in difficult and resistant cases.

Now estimated to have been used in 10,000,000 clinical cases, aureomycin is safe, economical, effective—a true broad-spectrum antibiotic.

Calcium...

they'll remember to take

Few find it easy to follow a rigid dietary routine. So it's not surprising that patients sometimes shy at taking extra calcium three or four times a day. The simplest answer, of course, is to give them calcium in a form they will enjoy. No difficulty here: Ostocalcium Tablets have a fresh peppermint flavour and may be chewed—or crushed and taken in milk or water. Expectant and nursing mothers especially benefit from a course of Ostocalcium; it is wisely prescribed for many of your younger patients too.

the Question of *thyroid deficiencies*

Though well defined cases of thyroid deficiency are uncommon, many mild deficiencies occur—often unrecognised—giving rise to symptoms that may complicate other more obvious conditions. For instance, certain cases of menstrual disorder, of skin disorder, of obesity and arthritis at the menopause may be associated with defective thyroid secretion.

...and the Answer

For these and the specific deficiency diseases, today's prescription is ELTROXIN—the pure synthetic hormone. Effective by mouth, it ensures reliable absorption, exerts consistent physiological activity, and permits dosage to be accurately based on weight.

Penicillin Nonad Tulle

*takes so
little time*

for, in a matter of seconds, it can be applied as a primary dressing round the finger following incision of a septic focus.

No need to prepare a dressing of penicillin ointment and gauze, no need to cut the dressing to the right size, Penicillin Nonad Tulle is designed in several sizes to suit a variety of requirements and the pieces 2 inches by 2 inches are a convenient size for use as a finger dressing.

Penicillin Nonad Tulle is the ideal bacteriostatic dressing to be applied to wounds infected with penicillin-sensitive organisms. The wide-mesh gauze is impregnated with an emulsifying base containing 1,000 i.u. of penicillin per gramme. The non-adhesive nature of the tulle encourages the formation of granulation tissue and ensures the easy removal of the gauze without disturbance of the newly formed tissue.

Penicillin Nonad Tulle is effective and easy to apply.

A new antibacterial

for topical application

'FURACIN' SOLUBLE DRESSING has advantages over previous anti-microbial therapy. Its wide antibacterial spectrum includes gram-negative as well as gram-positive organisms; healing rate is not retarded; wound odour is diminished; and the occurrence of bacterial drug-resistance has not been reported. 'Furacin' Soluble Dressing is useful for topical application in the prophylaxis and treatment of surface infections occurring in wounds, burns, or ulcers.

These advantages over other antibacterials are possessed

also by 'Furacin' Solution which presents the active principle — 'Furacin' — in a liquid vehicle.

Both preparations contain 0.2% nitrofurazone.

'Furacin' Soluble Dressing is available

in 2-oz. tubes, 4-oz. and 16-oz. jars.

'Furacin' Solution is available in 2 fl. oz.,

4 fl. oz., and 16 fl. oz. bottles.

NYDRAZID

SQUIBB

A NEW ANTI-TUBERCULOUS DRUG

NYDRAZID (iso-Nicotinic Acid Hydrazide) showed considerable activity against tubercle bacilli during extensive screening tests carried out on several thousand compounds in the Squibb Institute of Medical Research.

NYDRAZID has been subjected to pharmacological investigation and clinical trials which have indicated that the drug has real promise in the treatment of tuberculosis.

NYDRAZID supplies have been handed to the Medical Research Council so that a thorough scientific evaluation of its potentialities may be made as early as possible. Other trials are in progress under leading clinicians in British hospitals.

NYDRAZID is now being produced commercially and ample supplies are available to meet the needs of sanatoria, hospitals and general practice.

NYDRAZID is presented as tablets, scored to facilitate dosage—each containing 100 mg. iso-nicotinic acid hydrazide—in bottles of 100 and 1,000.

*Preliminary information on NYDRAZID
will be sent gladly on request:*

'Daraprim' brand Pyrimethamine (2:4-Diamino-5-[4-chlorophenyl]-6-ethylpyrimidine), the new antimalarial announced some months ago, has now undergone clinical trials and is ready for issue.

TREATMENT

In many parts of the tropics, a single dose of 50 mgm. (in some cases even less) has been found adequate to clear the parasitaemia and relieve the fever in acute cases of malaria. Some workers, however, prefer to give two doses on consecutive days.

SUPPRESSION

'Daraprim' has given highly encouraging results in areas where malaria is endemic. A dose of 25 mgm. given at weekly intervals to the inhabitants of certain isolated villages, has reduced the parasite index from approximately 22 per cent to zero in 3½ months during the season of transmission.

Although conclusive evidence of its action in non-immunes is not yet available, there are solid grounds for believing that it will prove an excellent suppressant in them.

'Daraprim' is issued as compressed products of 25 mgm., in packs of 6, 30 and 1000. Further information on request to 183-193, Euston Road, London, N.W.1.

Canvassing in any form will disqualify.

★SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

Deferment of call-up for "R" practitioners (i.e., practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow an "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that he obtains it without delay. Under present arrangements the Committees also normally allow an "R" practitioner to hold a Second House Officer post (£400) and a Senior House Officer post (£670), provided in each case that the higher appointment is secured before the termination of the practitioner's current appointment.

"R" practitioners may not accept Third House Officer posts (£450 per annum) unless they have obtained the special permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C.

SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held, £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

HER MAJESTY'S COLONIAL SERVICE, Malaya SENIOR NUTRITION OFFICER

Required in Malaya to take charge of the Division of Nutrition, Institute for Medical Research. The officer selected will be required to organize and lead all nutrition research based on the Institute, but may have to work in laboratory, hospital or anywhere in the field; to give technical advice to the Government and medical services. He may, in due course, be required to organize training courses for doctors and others in the principles of nutrition. Biochemistry, bacteriology and pathology divisions are available to assist with investigations requiring laboratory facilities. Appointment subject to three years' probation is available on a permanent basis with pension (non-contributory) at the age of 55, or on short-term agreement for three years in the first instance. Doctors in the National Health Service may resign from the National Health Service but retain their superannuation rights during their time in Malaya (up to six years) and receive a resettlement grant of 20 per cent of the aggregate of their Malayan salary on leaving Malaya at the end of their engagement. Doctors so appointed may be considered for permanent terms at any time during their employment. Basic salary is \$1,050 per mensem (£1,470 per annum). In addition, pensionable expatriation pay is payable at \$200 per mensem (£280 per annum). There is also a cost-of-living allowance at \$240 per mensem (£336 per annum) for single officers, \$430 per mensem (£602 per annum) for married officers without dependent children, and \$505 per mensem (£707 per annum) for married officers with one or more dependent children. The climate is, for the tropics, healthy. European children do well up to the age of about six and schools are available locally. Income tax is payable at Malayan rates, which are lower than those in the United Kingdom. Government quarters with heavy furniture are provided at a low rental, or an allowance is paid in lieu of quarters. Free passages are provided for the doctor, his wife and children under the age of ten (not exceeding four persons besides himself) on appointment, and once each way during each tour of duty of three to four years. Generous home leave is granted and local leave is permissible. Candidates must possess medical qualifications registrable in the United Kingdom, and should have a higher medical qualification, with at least ten years' postgraduate experience, and an expert knowledge of, and research experience in, the science and practice of nutrition. Application forms can be obtained from the Director of Recruitment (Colonial Service), Colonial Office, Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/344/51). (5418)

HER MAJESTY'S COLONIAL SERVICE South Pacific Health Service MEDICAL OFFICERS

Required for general medical duties in the South Pacific Health Service, which includes posts in the Colony of Fiji, the British Solomon Islands Protectorate, the Gilbert and Ellice Islands Colony, and the British Service in the New Hebrides (Anglo-French Condominium). A selected candidate is normally posted to fill a particular vacancy in one of the above territories in the first instance, but he may be transferred to any station within the South Pacific Health Service. As a member of the Colonial Medical Service he is also eligible to be selected for transfer on promotion to other Colonial territories if he wishes when vacancies occur. Appointments can be made on a permanent basis with pension (non-contributory) payable normally at the age of 55, or on short-term contract with gratuity on satisfactory completion of service. Salary scale ranges from £F.840 per annum to £F.1,550 per annum (£F.111 equals £100 sterling). Cost-of-living allowance appropriate to local conditions payable in each of above-mentioned territories and a special allowance of £F.125 per annum in all except Fiji. Pension is earned at the rate of 1/600th of the final pensionable emoluments for each completed month of service. The gratuity in respect of contract employment is payable on termination at the rate of £F.25 on a salary of £F.1,000 per annum or less, and at the rate of £F.37 10s on a salary over £F.1,000 for each completed three months of service. Quarters containing heavy furnishing are generally provided at

rental of 10 per cent of salary up to £F.1,200, plus three per cent on any part of salary in excess of £F.1,200. Income tax at local rates. Free passages provided on appointment for officer and family up to the cost of five adult passages, except in the case of Fiji, where the maximum is four adult passages, and on leave up to the cost of three adult passages. Length of tour ranges from two to four years according to local conditions. Leave is earned at the rate of four or five days for each completed month of service. In addition mid-tour leave of three months in Australia or New Zealand is permissible in certain circumstances on tours of three or four years in territories other than Fiji. There are schools in Fiji, but many officers stationed elsewhere send their children to school in New Zealand or Australia. Candidates must possess medical qualifications registrable in the United Kingdom. Officers appointed to certain posts may be required to tour the islands in relatively small craft as a regular part of their duties. Application forms can be obtained from the Director of Recruitment (Colonial Service), Sanctuary Buildings, Great Smith Street, London, S.W.1 (quoting reference No. 27215/326/52). (5419)

Are Vaginal Tampons Prejudicial to Health?

An Investigation* concerned with the bacteriology of vaginal flora following the use of internal tampons was undertaken at the request and with the co-operation of the visiting gynaecologists to a London Women's hospital.

This investigation confirms earlier work carried out in America and gives further support to the claim that Tampax can be confidently recommended as a convenient, comfortable and safe form of sanitary protection.

* Tampax tampons were used in this investigation.

EXTRACTS FROM THE REPORT:—

- "Smears and cultures taken before and after each period showed no appreciable change in the bacterial flora of the vagina."
- "None of the volunteers acquired monilia or trichomonal organisms during the period of study or developed erosions or vaginitis as a result of using the internal tampon."
- "In each case the underlying cause responded to treatment, and did not recur, which proves that the internal tampon does not act as an irritating foreign body."
- "The glycogen content was uninfluenced by the use of tampons."
- "Volunteers who had not previously used tampons stated that they did not cause the irritation usually found with the perineal pad."
- "There was no evidence that vaginal tampons are prejudicial to health." British Medical Journal, 1, 24 (1952)

THE CHEMOTHERAPY OF TUBERCULOSIS

Following several years of intensive research in the Roche laboratories, 'Rimifon,' isonicotinyl hydrazine, was discovered to be an active antitubercular compound.

The pharmacology of the isonicotinyl hydrazine derivatives has been described (Amer. Rev. Tuberc., 1952, 65, 376), and their activity in experimental tuberculosis ascertained (Bull. Sea View Hosp., 1952, 13, 3).

The favourable results obtained in the treatment of pulmonary tuberculosis have been reported in the same journals and in Diseases of the Chest, 1952, 21, 385.

Dosage of 'Rimifon' was begun at 2 mg./kg. and later increased to 4 mg./kg., i.e. from one to two tablets three times daily for an average adult.

'RIMIFON' IS ISSUED IN TABLETS OF 50 MG.
PACKINGS OF 100 AND 1,000.

The complete answer for macrocytic anæmias

Clinical experience over a decade has established that the administration of Anahæmin constitutes the most effective form of treatment for pernicious anæmia.

Anahæmin produces, with small and comparatively infrequent doses, a prompt and satisfactory erythropoiesis in patients in relapse, it ensures the maintenance of a normal erythrocyte level in patients in remission and is effective in preventing the onset of subacute combined degeneration of the cord.

Anahæmin has also been found to be of value in the treatment of herpes zoster and post-herpetic neuralgia. The recommended dosage is 2 ml. followed by 1 ml. on subsequent days until relief is obtained.
