R_y Veriloid-VP
VERILOID WITH PHENOBARBITONE

**...simplifies the treatment
of HYPERTENSION**

NOTE

Veriloid, plain, continues to be available in scored tablets of 1 mg. A distinct, biologically assayed fraction of *Veratrum viride*, Veriloid has given outstanding results in hypertension of all degrees. It produces a significant reduction in arterial pressure without compromise of the postural reflexes necessary for normal living.

When side-effects prevent satisfactory adjustment of dosage of Veriloid given alone, Veriloid-VP usually makes possible continuation of therapy. This combination in one tablet of Veriloid, 2 mg., with phenobarbitone, B.P., 15 mg., is of value in all forms of hypertension. Arterial pressure is reduced by the specific hypotensive effect of the Veratrum alkaloids; phenobarbitone given concurrently effectively raises the limit of tolerance to Veriloid, and reduces emotional tension. There is marked relief of subjective symptoms.

The initial dose of Veriloid-VP (subsequently adjusted according to clinical response) is one to one and one-half tablets four times daily, after meals and at bed-time.

Veriloid-VP is available in bottles of 100 and 500 tablets and may be prescribed on Form E.C.10.

Emergency Equipment

for the new-born

Experience with the Oxygenaire Oxy-Incubator (combined oxygen-tent and baby incubator) in leading maternity hospitals has led to recent refinements in the original equipment.

It has now been made possible to x-ray the newly born premature infant, while still in the incubator, without interfering with the precise control of temperature and humidity or the flow of oxygen—a very great advantage when neonatal surgery has to be considered.

Oxygenaire Oxy-Incubator

A smaller transportable Oxy-Incubator for ambulance use is now undergoing trials. Battery or mains operated, it embodies the essential features of the large Oxy-Incubator illustrated. Enquiries from hospitals are invited.

PENDEX

**the penicillin-

for intranasal use
is of particular value**

Acute sinusitis and flare-ups of chronic sinusitis respond well to local treatment with penicillin, for unlike the sulphonamides penicillin is not inhibited by the presence of pus. 'Pendex' has a marked penetrative action and reaches all parts of the nasal cavity. 'Paredrinex', the vasoconstrictor of 'Pendex', is non-irritating and reduces congestion approximately twice as rapidly as ephedrine, and for a more prolonged period without stimulation of the central nervous system.

PENDEX

When prepared as directed, 'PENDEX' will contain not less than Crystalline potassium penicillin G 1,500 I.U. per ml., 'Paredrinex' 1 per cent.; in a specially buffered aqueous solution.

ST. DUNSTAN'S CLOCK

On the wall of St. Dunstan-in-the-West in Fleet Street is the first clock showing minutes ever to be made. It was also the first clock to have two dials. It was made in 1671.

**CLOCKWORK REGULARITY.**

Normal bowel action is a fine thing to possess. It is, perhaps, the most sought after talisman against ill-health in the world. No wonder, then, if its temporary suspension leads from a mild despondency even to black despair. But in such a crisis panic measures are to be avoided—the taking of harsh purgatives eschewed.

Success in the restoration of the much-cherished habit lies in the regular persuasive stimulus of soft bulk—such as is provided by 'PETROLAGAR.' Gently and unobtrusively, 'PETROLAGAR' arranges for normal physiological evacuations and secures the return of 'clockwork regularity.'

A CAREER AT SEA FOR YOUR SON

The Merchant Navy offers good prospects

The large Shipping Companies recruit future Executive Officers for their ocean-going ships from H.M.S. Worcester, a Nautical College founded in 1862 by London shipowners. Nearly 7,000 Cadets have passed through the College and received specialized training in addition to a sound general education.

The College is officially recognized by the Ministry of Education and by the Ministry of Transport, the latter accepting the training provided on board the Worcester as being the equivalent of one year's sea service.

Cadets are admitted after reaching the age of 13½ and before reaching the age of 16. They leave the College when they are 17 and the period of training depends on the age at entry, with a minimum period of two years. Candidates are required to take the Common Entrance Examination or the Worcester Entrance Examination, according to age. They must be medically fit with perfect eyesight.

Fees are £180 per annum including uniform. Various scholarships in reduction of fees are available, varying in value from £180 p.a. to £50 p.a. The Worcester offers an excellent opportunity for boys of good education and character wishing to become Executive Officers in the Merchant Navy—a career providing world travel, good remuneration and an interesting life.

Illustrated Prospectus containing full information will be forwarded on application to the Secretary.

Alimex is a pleasantly flavoured colloidal preparation of aluminium hydroxide with magnesium hydroxide. It corrects gastric hyperacidity, relieves gastro-intestinal irritation and is a valuable adjunct in the medicinal treatment of peptic ulcer.

Alimex acts without liberating carbon

Pleasurable relaxation

In addition to the established use of Myanesin Elixir in the treatment of neurological conditions associated with muscular rigidity and tremor it has now been successfully employed in the relief of psychological states characterised by anxiety and tension.

Amer. J. Med. Sci., 1950, 220, 23 describes a group of patients in which anxiety states and obsessional conditions were

present and which following the administration of mephenesin, the active constituent of Myanesin Elixir, obtained complete relaxation.

Best results occurred in anxiety states, however chronic, and 47 out of 50 patients treated for this condition improved.

Dosage of from $\frac{1}{2}$ to 1 tablespoonful, one to six times daily, is suggested.

'MYANESIN' ELIXIR

Containing 1 gramme mephenesin in each tablespoonful. Bottles of 8 fl. oz. 6s. 4d.; 40 fl. oz. 26/1d.

Also available 'Myanesin' Tablets each containing 0.5 gramme mephenesin. Bottles of 50 at 9/8d.

protein without persuasion

*Prescribing 'high protein' meals is one thing . . .
persuading the patient to take them is another !
But who needs persuading to take ice cream ?*

With Casilan in it, ice cream can provide precisely as much first-class protein as you wish the patient to have ; and because it is ice cream, there's little doubt that every gram of its protein will be eaten and enjoyed to the last spoonful. Not that Casilan is made for ice cream alone—it goes unnoticed in almost any food or drink. So there can be plenty of variety in high protein diets . . . but that ice cream looks like the favourite !

If you would like your wife to have a copy of The Casilan Recipe Book, please let us know; it includes three ice cream recipes as well as many other dishes.

Elastoplast

Elastoplast bandages are normally chosen as the basis of modern compression treatment of varicose ulceration, largely on account of two of their special qualities.

The more important of these is the elasticity of the special cloth. This precisely maintains the applied compression throughout the bandaged area, and also enables the bandage to conform to the limb without creasing.

Of almost equal importance is the special adhesive spread. It occludes the area of ulceration, strengthens the elastic properties of the cloth and keeps the bandage firmly in position for long periods.

Elastoplast is made by T. J. Smith & Nephew Ltd., Hull and is known as Tensoplast outside the British Commonwealth
