## Prescribing a Laxative

When the Physician is called upon to prescribe a laxative for prolonged or occasional use, Andrews merits special consideration. Andrews is pleasant tasting. Its effervescence has a refreshing quality that makes it an acceptable draught. Andrews causes no griping or discomfort. Its laxative action is due to the presence of magnesium sulphate and other salts in balanced proportion, which, acting by osmosis, induce easy, painless evacuation.

Andrews is particularly suitable for patients liable to digestive upsets. It allays gastric discomfort and nausea. It also improves the flow of bile, and helps to check biliousness and sick headaches. No costive reaction results when Andrews is discontinued.

**DETTOL** submit  
the following facts to your attention

*Wide mention in medical literature has made Dettol a text-book antiseptic. Wide clinical use has attested the efficiency of Dettol in literally millions of cases which range from minor accident to major operation.*

Efficiency	Dettol is an efficient antiseptic which, moreover, retains a high degree of efficiency in the presence of organic matter.	Gram-positive and Gram-negative micro-organisms. Under standard conditions of test a dilution of 1 in 200 kills Staph. aureus in 10 minutes; a one in 500 dilution kills Strept. pyogenes in 10 minutes.	
Toleration	Dettol is well tolerated on the skin and tissues in high concentrations. Moreover, its non-toxicity offers a high degree of safety to doctor, nurse and patient.	Dettol is not incompatible with soap, traces of which need not be removed before application.	Compatibility
Strength	The fact that Dettol is well tolerated by the tissues permits dilutions to be recommended for clinical purposes which provide a margin of safety even when a reasonable amount of organic material is present.	Dettol is non-poisonous, safe, pleasant and economical in use. It has an agreeable smell.	Pleasantness
Activity	Dettol is active against both	Bacteriological data and the literature of Dettol are available on request. Dettol is packed in 2 and 5 gallon, Purchase-Tax-free Dispensing containers.	Data

**Aci-jel**

HIGHLY BUFFERED (pH 4.0) ACID VAGINAL JELLY

Aci-jel combats vaginitis by providing a persistent acid medium

- hostile to most vaginal pathogens
- hospitable to normal vaginal flora
- effective in controlling symptoms

The establishment of normal acidity is a most important factor in preventing recurrence of vaginal infection. Recurrence, characteristic of the vaginitides, is especially marked in trichomoniasis; it is also often a problem in many cases of moniliasis. Highly buffered Aci-jel — unexcelled for restoring normal acidity — helps prevent recurrences. It is simply applied, prolonged in action and non-irritating.

**DOSAGE:** One applicatorful intravaginally twice daily.

On original prescriptions specify "Aci-jel with applicator."

# penicillin without tears

Children fear injections. There is increasing evidence that they (and adults) may be spared parenteral penicillin and be given it by mouth with equal therapeutic effect.

For infants, injections entail disturbance and handling. It is now accepted that for them, the administration of penicillin by mouth is the method of choice.

'Eskacillin' is the ideal oral penicillin for infants and children. It is liquid and may be given simply by teaspoon or mixed with the infant's feed; and it is palatable so that even recalcitrant children take it willingly and without fuss.

# New peptic ulcer treatment comparable to drip therapy

Whole milk and alkaline constituents  
combine to produce  
increased buffering action

**N**ULACIN TABLETS have been evolved to meet a very real need in the treatment of gastric and duodenal ulcers.

All the literature on the treatment of peptic ulcers emphasizes the proven value of diminishing the acidity of the gastric juice. Many large and otherwise intractable ulcers can be healed by a continuous, intra-gastric drip of milk or alkali.

Drip therapy, is, however, not always available, nor is it practicable to use it in many instances. Nulacin offers a satisfactory alternative.

## CONTINUOUS NEUTRALIZATION

NULACIN TABLETS, allowed to dissolve slowly in the mouth, have been shown clinically to provide a continuous neutralization comparable with that of drip therapy. (B.M.J., 1952, 2, 180.)

NULACIN TABLETS contain nutrient in a most acceptable form to the peptic ulcer patient. Nulacin tablets obviate the necessity of taking frequent feeds, and so lessen the tendency to obesity which must occur in those who are following a dietary regime of food at frequent intervals.

During ulcer activity the suggested dosage is 3 tablets to be sucked each hour, and for follow-up treatment 2 tablets should be sucked between meals, beginning half an hour after a meal.

The tablet is of a suitable size, and of a consistency and hardness so that, when it is sucked, the result is a constant and prolonged neutralization of the gastric juice.

NULACIN TABLETS are extremely palatable and during extensive clinical tests their taste has proved to be particularly acceptable to patients.

The patient should be instructed to place the tablet between the gum of the upper jaw and the cheek. Here it will be comfortable, and slowly dissolve. The efficacy of

GASTRIC ANALYSIS

NULACIN TABLETS are not advertised to the public. There is no B.P. equivalent to this tablet.

NULACIN TABLETS are available in dispensing units of 25, free of purchase tax.

Porosity is only half the answer to the problem of skin irritations, in the use of elastic adhesive bandages. Eczematous sensitisation is frequently due to rubber or to some irritating solvent or resin used in ordinary plaster mass.

POROPLAST is entirely free from these disadvantages. It contains NO RUBBER, no solvents and none of the irritating resins usually embodied in elastic adhesive bandages. Consequently POROPLAST has already shown that it can considerably reduce skin hazards.

POROPLAST is porous . . . the first elastic adhesive bandage to be spread in A NEW WAY, to give regular ventilation over its entire surface, even where two layers overlap. Tests have shown that it can remain *in situ* for long periods, even on the most sensitive skin, without causing irritation. It is freely available to hospitals and general practitioners at the same price as ordinary adhesive bandages. Samples on application.

## Whooping Cough Vaccine

Whooping cough vaccines prepared from cultures of *Hæmophilus pertussis* in liquid media (without addition of blood or serum) have for some time been widely used with excellent results in the United States, Canada and Sweden. Cohen and Wheeler's liquid culture medium has proved particularly satisfactory, giving vaccines of high antigenicity, and this medium is now used in the preparation of 'Wellcome' brand Whooping Cough Vaccine. The vaccine is prepared from selected smooth strains of *H. pertussis*, freeze-dried soon after isolation. It is not alum-precipitated, but is a plain or suspended vaccine, thus causing little or no reaction on injection. Each batch incorporates four to six strains of *H. pertussis* and is tested for antigenicity by the Kendrick intracerebral challenge method in mice.

The vaccine is issued in sets of 3 ampoules, each containing 1 c.c. (together sufficient for one immunising course), and in rubber-capped bottles containing 10 c.c.

## Habit Time

REGULAR HABITS are undoubtedly the basis of satisfactory bowel movement in the normal individual. Unfortunately, with changes in the routine, during illness or convalescence, or due to rush of work and social activities, the habit time of bowel movement is often lost and constipation follows.

Once lost this habit time is not easy to regain, but insistence on a regular effort and the provision

of sufficient bulk to stimulate peristalsis will do much to help in its recovery.

'PETROLAGAR' provides soft bulk and achieves a comfortable bowel movement without griping. Gently but surely 'PETROLAGAR' helps the return to habit time. *Issued in two varieties: Plain and with Phenolphthalein.*

## We improve upon the first Elizabethans..

The virtues of 'sower oranges and lemons' in curing 'the scurvy' were known to seafarers in the days of Elizabeth Tudor, and later on Captain Cook found that fresh vegetables served the same purpose.

The difference today is that we know how much ascorbic acid we get in these foods and we can regulate our intake according to the needs of health and disease.

In VITAVEL SYRUP, concentrated orange juice is used as a base for the inclusion of other equally necessary vitamins, A, B<sub>1</sub>, C and D, and the potency of each is designed to satisfy human needs.

One teaspoonful (3.5 c.c.) contains, at time of manufacture, vitamin A. 2,500 i.u., vitamin D 375 i.u., vitamin B<sub>1</sub>. 0.5 mg., vitamin C. 10 mg. It can be given in water, soda water or undiluted.

—especially when the sulphonamides are three of the most potent in common use—sulphathiazole, sulphadiazine and sulphamerazine.

These drugs rarely cause such side-effects as nausea, hæmolytic anæmia, cyanosis or acidosis. The greatest handicap to their use separately however has been the danger of crystal deposition in the urinary tract. Combined together, as in 'Sulphatriad', the risk of crystalluria is greatly reduced, for the solubility of any one sulphonamide is independent of that of the others in solution whereas the bacteriostatic activities of the three are additive.

'Sulphatriad' is the sulphonamide preparation of choice for greater clinical safety plus the advantages of more rapid absorption, better tissue distribution and faster therapeutic effect.

## Rosena

### ROSE HIP & ORANGE

WITH EXTRA GLUCOSE

Carter's of Coleford, makers of Ribena Blackcurrant Juice, announce a new Vitamin C syrup—**Rosena**—which has been especially prepared for children from two weeks to ten years old

It is a balanced blend of pure orange juice and rose hip extract. The well-known health characteristics of both are here combined for the first time. The soft, pleasant flavour of the rose hip has been used to stabilise the orange juice at an acidity which makes it most pleasant and acceptable to children of all ages. It does not cause stomach or bowel trouble.

**2/10** a bottle.

Available through chemists only.

By reason of its high vitamin content (not less than 56 mgms. of vitamin C per fluid oz.) Rosena is equal in vitamin C activity to Ministry of Food Orange Juice and National Rose Hip Syrup. It also contains three natural sugars which are nutritionally valuable. These comprise glucose, fruit sugar and cane sugar. In addition, a further 10% of pure glucose has been added.

## A CAREER AT SEA

### The Merchant Navy offers good prospects

The large Shipping Companies recruit future Executive Officers for their ocean-going ships from H.M.S. Worcester, a Nautical College founded in 1862 by London shipowners. Nearly 7,000 Cadets have passed through the College and received specialized training in addition to a sound general education.

The College is officially recognized by the Ministry of Education and by the Ministry of Transport, the latter accepting the training provided on board the Worcester as being the equivalent of one year's sea service.

Cadets are admitted after reaching the age of 13½ and before reaching the age of 16. They leave the College when they are 17 and the period of training depends on the age at entry, with a minimum period of two years. Candidates are required to take the Common Entrance Examination or the Worcester Entrance Examination, according to age. They must be medically fit with perfect eyesight.

Fees are £210 per annum including uniform. Various scholarships in reduction of fees are available. The Worcester offers an excellent opportunity for boys of good education and character wishing to become Executive Officers in the Merchant Navy—a career providing world travel, good remuneration, and an interesting life.

Illustrated Prospectus containing full information will be forwarded on application to the Secretary,

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose 3 copies (unless otherwise specified) of recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

Canvassing in any form will disqualify.

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of provisionally registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.

### SALARY SCALES OF JUNIOR GRADES OF HOSPITAL MEDICAL STAFF

#### Registrar Grades, Whole-time

(a) **REGISTRAR**: Posts obtained normally not less than two years after registration as a medical or dental practitioner and held normally for two years: £775 per annum in the first year; £890 per annum in the second and any subsequent years.

(b) **SENIOR REGISTRAR**: Posts obtained normally not less than four years after registration as a medical or dental practitioner and held normally for three years: £1,000 per annum in the first year; £1,100 per annum in the second year; £1,200 per annum in the third year; £1,300 per annum in any subsequent years.

#### Other Grades, Whole-time

(a) **HOUSE OFFICER**: £350 per annum for the first post held; £400 per annum for the second post held; £450 per annum for the third and any subsequent post held; with, in each case, a deduction at the rate of £100 per annum in respect of board and lodging and other services provided. Each post shall be tenable for six months.

The Minister will be prepared to authorize, in exceptional circumstances, salaries up to £50 per annum higher than the standard rates specified above where a post cannot be filled otherwise.

(b) **SENIOR HOUSE OFFICER**: Posts obtained normally not less than one year (in Scotland, two years) after registration as a medical or dental practitioner and normally held for one year only: £670 per annum.

(c) **JUNIOR HOSPITAL MEDICAL OFFICER**: Officers who have held house appointments but who are not Registrars and who have less responsibility than other hospital officers of non-consultant status: £700 (for an officer appointed not less than two years after registration as a medical practitioner) by £50 to £1,000 per annum.

### ALL NATIONAL HEALTH SERVICE HOSPITAL APPOINTMENTS ARE IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF SERVICE OF HOSPITAL MEDICAL STAFF

Those intending to apply for resident appointments in the Registrar grades are recommended to make inquiries with regard to the deductions proposed for board and lodging at the time of submitting their applications, where this is not stated in the advertisement.

## *Bloodless revolution*

The introduction of 'Dextraven' has made available for the first time a dextran solution with controlled optimal molecular content. It produces rapid elevation and prolonged maintenance of blood volume and normally ensures that over 50% of the dextran administered remains in the circulation after 24 hours — a longer period than has been possible with any previous blood volume restorer. 'Dextraven' is the preparation of choice for the restoration of blood volume. The British Encyclopædia of Medical Practice (Medical Progress, 1952) states "... it will revolutionise supportive therapy, and may be regarded as one of the major advances of the year".—Truly a bloodless revolution.
