

# Patient co-operation . . .

It is one thing to prescribe glucose and quite another to get the patient to take it. But there is never any difficulty in persuading a patient—a man, woman or child—to take LUCOZADE. This sparkling glucose drink is so delightful, so refreshing, that even the most difficult patients find it most acceptable. LUCOZADE is assimilated immediately—and further doses are eagerly welcomed.

# VIMALTOL

A QUALITY PRODUCT OF  
MODERN NUTRITIONAL SCIENCE

'VIMALTOL' is a concentrated vitamin food, formulated by and prepared under the control of the 'Ovaltine' Research Laboratories—which are actively investigating problems in nutrition and dietetics. They bring to its manufacture a high degree of scientific knowledge and a meticulous standard of hygiene.

'Vimaltol' contains malt extract, yeast, halibut liver oil and iron. Every ingredient used is rigidly tested for purity and quality, the final product being accurately standardized for vitamin content.

In addition to its vitamins, 'Vimaltol' provides valuable nutrients of

undoubted assistance to infants, fast-growing children, nursing mothers and to those whose diet is inadequate or unbalanced. It helps to build up strength, weight and the natural powers of resistance. 'Vimaltol' is highly palatable—a decided advantage when recommending it for children.

*Each ounce contains:—*

1,420 i.u. of Vitamin A  
710 i.u. of Vitamin D  
0.35 mg. of Vitamin B<sub>1</sub>  
0.2 mg. of Vitamin B<sub>2</sub> (Riboflavin)  
2.8 mg. of Niacin (P.P. Vitamin)  
3.3 mg. of Iron

## THE SPASM CAN BE CONTROLLED

Prompt measures to counter the distress of persistent coughing are well-merited. Taoryl—a recently introduced, powerful antispasmodic in tablet form—combines peripheral sedation with a selective inhibitory action on the cough centre. Safe to use for long periods without addiction, it provides highly effective therapy in all cases of irritant and spasmodic cough. It is comparatively non-toxic, free from side effects in normal dosage, and readily administered to children.

*Literature and clinical sample on request.*

*Bottles of 20 and 200 tablets.*

## Persistent NIGHT COUGH? —a case for TERPOIN

Thanks to its balanced combination of ingredients, TERPOIN exerts a speedy direct *dual* action on the patient's most troublesome symptom—*coughing*.

TERPOIN reduces the excitability of the cough centre without creating cerebral depression. It also increases mucous secretion, affording greater protection to the irritated membrane. In this way incessant cough and its associated restlessness are eliminated and uninterrupted sleep—so necessary in respiratory affections—is ensured.

## Why not R. Effico?

To prescribe Effico Tonic is a wise first step in cases of fatigue, anorexia or in vague 'run-down' conditions. Effico does more than restore reserves of essential vitamins; it also provides a balanced group of traditional medicaments to soothe and to correct digestive upsets.

This invigorating tonic has a pleasant flavour which appeals to both children and adults.

During convalescence or in cases where your patient is feeling listless and below par, remember to prescribe . . .

# New peptic ulcer treatment comparable to drip therapy

**Whole milk and alkaline constituents  
combine to produce  
increased buffering action**

**N**ULACIN TABLETS have been evolved to meet a very real need in the treatment of gastric and duodenal ulcers.

All the literature on the treatment of peptic ulcers emphasizes the proven value of diminishing the acidity of the gastric juice. Many large and otherwise intractable ulcers can be healed by a continuous, intra-gastric drip of milk or alkali.

Drip therapy, is, however, not always available, nor is it practicable to use it in many instances. Nulacin offers a satisfactory alternative.

## CONTINUOUS NEUTRALIZATION

NULACIN TABLETS, allowed to dissolve slowly in the mouth, have been shown clinically to provide a continuous neutralization comparable with that of drip therapy. (B.M.J., 1952, 2, 180.)

NULACIN TABLETS contain nutrient in a most acceptable form to the peptic ulcer patient. Nulacin tablets obviate the necessity of taking frequent feeds, and so lessen the tendency to obesity which must occur in those who are following a dietary regime of food at frequent intervals.

During ulcer activity the suggested dosage is 3 tablets to be sucked each hour, and for follow-up treatment 2 tablets should be sucked between meals, beginning half an hour after a meal.

The tablet is of a suitable size, and of a consistency and hardness so that, when it is sucked, the result is a constant and prolonged neutralization of the gastric juice.

NULACIN TABLETS are extremely palatable and during extensive clinical tests their taste has proved to be particularly acceptable to patients.

The patient should be instructed to place the tablet between the gum of the upper jaw and the cheek. Here it will be comfortable, and slowly dissolve. The efficacy of

The B.W. & Co. range of penicillin preparations, including compressed products, is designed to simplify administration, to save valuable professional time and to produce the greatest therapeutic effect at the site of infection. For example, effective blood concentrations without recourse to continuous injections may be obtained with 'Tabloid' brand Penicillin Oral or by using one of the depot injections—'Wellcome' brand Oily Injection of Procaine Benzylpenicillin, or 'Wellcome' brand Oily Injection of Penicillin. In eye conditions, 'Tabloid' brand Ophthalmic Benzylpenicillin, placed in the conjunctival sac, brings the antibiotic into immediate contact with the affected part. Oral infections are best treated by 'Tabloid' brand Penicillin Lozenge, while for preparation of small quantities of solutions for eye drops or cream, 'Tabloid' brand Hypodermic Benzylpenicillin has everything to recommend it.

An important advance in Penicillin administration, 'Viules' are the only single dose disposable cartridges of Procaine Penicillin available in Great Britain.

Each Viule contains 600,000 I.U. of Procaine Penicillin G Oily Injection—in most patients this single dose produces a therapeutically satisfactory blood concentration of penicillin for 48 hours.

'Viules' containing 300,000 or 900,000 I.U. of Procaine Penicillin G are also available.

There is a comprehensive range of other injections available in 'Viule' form; please write for full details to the Medical Dept., Boots Pure Drug Co. Ltd., Nottingham, England.

**Note : Boots Penicillin prices will be reduced from February 2nd.**

## **ULCER CHARACTERISTICS — *Deep Naso-Labial Groove***

Clinicians have repeatedly noted a similarity of facies in patients suffering from peptic ulcer, the outward signs of an inward worrying character part cause and part effect of the ulcer. The deep naso-labial groove or furrow is an example of one of the features commonly seen in these cases. While by itself of no diagnostic significance it is nevertheless an interesting little link in the chain of evidence that leads from suspicion to certainty. A more reliable characteristic of the ulcer patient is amenability to 'ALUDROX' therapy.

### **'ALUDROX' FOR PEPTIC ULCER**

For the treatment of peptic ulcer 'ALUDROX' has advantages now fully appreciated by the medical profession.

- \* Buffers gastric acid.
- \* Inactivates pepsin.
- \* No acid rebound.
- \* No fear of alkalosis.
- \* Allows normal digestion to proceed.

'ALUDROX' is available in two forms: as an amphoteric gel (consisting of Aluminium Hydroxide Gel B.P.C. suitably flavoured and preserved) in 6 oz. and 12 oz. bottles and as tablets (each tablet containing dried Aluminium Hydroxide Gel. B.P.C. 13 gr.) in boxes of 60.

## Effective local treatment of sinusitis...

Sinusitis is now regarded as a medical, rather than a surgical problem and many authorities recommend its conservative treatment. 'Pendex' can be used for sinus irrigation, but when resolution is delayed the Proetz\* displacement technique is often of great assistance. This method is effective for cleansing the mucosa of the nasal sinuses, loosening inspissated secretions, and bringing about drainage of infected sinuses provided the natural ostia are patent and the mucosa is not polypoid.

### 'PENDEX' the penicillin-vasoconstrictor

aids drainage from the sinuses without impairing ciliary activity, and ensures an adequate concentration of penicillin at the site of infection.

### 'PENDEX'

is available—on prescription only—in 15 ml. (½-oz.) bottles.

The efficacy and wide applications of penicillin make it probably the most prescribed drug in the pharmacopoeia. For this reason, a reduction in price of this substance and its preparations is of major importance in the economics of general and hospital practice.

Continuing improvements in methods of manufacture permit us to announce yet a further reduction in the price of penicillin (including 'Distaquaine' and 'Distavone' brand preparations) and streptomycin. Typical of these reductions is the new price of one million units of Crystalline Penicillin G — 3s. 6d. (formerly 4s. 1½d.). # REDUCING THE PRESSURE...

**THE SUPERIORITY** of papaverine nitrite over the generally used hydrochloride is becoming more and more recognized. The lower toxicity of the nitrite is of obvious importance in such long-term treatment as hypertensive syndromes usually demand.

**'HYPERYSIN'** Tablets are formularized to provide the anti-hypertensive effects of a superior nitrite together with the sedative influence of papaverine and two other agents of acknowledged synergistic action.

#### Composition (each Tablet approx.)—

Papaverine Nitrite . . . . .	0.7 gr.
Hexamethylenetetraminodichloralhydrate . . . . .	3.0 gr.
Carbromalum B.P.C. . . . .	3.0 gr.

#### Advantages—

**Low toxicity:** Papaverine nitrite is less toxic than papaverine.

**Synergism:** The papaverine nitrite is synergistically potentiated by two other reputable sedatives.

**General effect:** 'Hyperysin' does not act so abruptly as the majority of nitrites.

#### Indications—

Hypertension, arterial spasm, angiospastic crises, angina pectoris.

## The surest—the safest FOR Nasal Decongestion

Only 'Neophryn' combines powerful action—(equal 1 to 3% ephedrine)—with low toxicity.

In animals and in man 'Neophryn' is the least toxic common vaso-constrictor drug. It will effectively relieve nasal congestion without producing tachycardia, central nervous stimulation, or secondary congestion. Because 'Neophryn' is so safe it is very suitable for infants and children.

'Neophryn' is intended solely as a decongestant and for this reason has no antiseptic or other medicament added to it.

'Neophryn' may be prescribed on form E.C.10. The basic N.H.S. price is 2/4d. per bottle.

## For the 'bilious' or 'liverish' patient

DEHYDROCHOLIN B.D.H. is the most active and least toxic of the bile acids. Since it is highly effective in promoting the secretion of bile and therefore aids the digestion and absorption of foodstuffs, particularly fats, it is indicated particularly for the treatment of 'bilious' or 'liverish' conditions.

Dehydrocholin B.D.H. is also useful in establishing normal bowel action in patients with a deficiency of bile and in patients needing mild peristaltic stimulation. Dosage of three tablets three times a day is recommended.

## Chilblain comfort AT DEPTH

Histamine-induced local vaso-dilatation can now be regarded as the modern answer to the problem of painful or irritant chilblains. The value of topically applied histamine has hitherto been limited by the poor absorption of the substance through the skin. A new, deep-penetration histamine balm, NALGIN, overcomes this difficulty. In NALGIN the histamine is combined with methyl nicotinate—a new therapeutic agent with exceptional skin-penetrative properties which permits of a deeper penetration of the histamine into skin tissues. Light massage over the chilblain area with NALGIN results in hyperaemia followed by a pleasant sensation of warmth, leading to a marked reduction of pain and to *comfort at depth*.

For the routine treatment of burns, wounds and varicose ulcers CIMLAC GAUZE is rapidly becoming recognized as a most effective antiseptic and healing agent. For the control of local pathogenic infections due either to Gram-positive or Gram-negative organisms, CIMLAC GAUZE is a valuable and economical alternative to the more expensive sulpha drugs and antibiotics and does not, as in the case of these drugs, encourage the development of resistant pathogens.

In the treatment of chronic varicose ulcers and pressure sores CIMLAC GAUZE makes a valuable contribution to healing and, in conjunction with supportive measures, ulcers which have resisted other forms of therapy have healed with remarkable rapidity.

Deferment of recruitment for fully registered "R" practitioners (i.e., fully registered practitioners liable for call-up under the National Service Acts) is granted at the discretion of the Central Medical Recruitment Committee and (in Scotland) the Scottish Central Medical Recruitment Committee. The Committees normally allow a fully registered "R" practitioner to hold a First House Officer post (N.H.S. salary £350 per annum) provided that it commences within three months of the end of his deferment by the Ministry of Labour and National Service as a whole-time medical student; and a Second House Officer post (N.H.S. salary £400 per annum) provided that it is secured before the end of his First House Officer post and commences within one month thereafter.

An "R" practitioner requires the special written permission of the C.M.R.C. or (in Scotland) the Scottish C.M.R.C. to proceed to any further post.

The position of previously registered "R" practitioners has been made clear in a notice sent to them by the University Joint Recruiting Boards.
